For individual boilers

NTH-PRO

Smart **thermostat**

Daily comfort and energy savings

Benefits for you

☑ High compatibility

Compatible with most boiler models, whatever the energy used.
Check compatibility at:
check.netatmo.com.

☑ Easy to set-up in under one hour

Just as easy as installing a traditional thermostat. Select wired or wireless installation.

☑ Upgradeable with the additional smart radiator valves

Add up to twenty radiator valves in ten different rooms.

Product benefits

Even more savings with the heating schedule and the 'Away' and 'Frost protection' modes

The thermostat creates a heating schedule tailored to the user's daily routine based on five questions on day-to-day usage. In addition to this schedule, there are 'Away' and 'Frost protection' modes, which automatically adjust the heating when the user is away for longer periods of time.

Remote control from a smartphone, tablet or computer

Auto-Adapt feature: always the right temperature, whatever the weather

The thermostat changes the heating according to the outdoor temperature and the heating characteristics of the home.

Tools for monitoring and optimising energy consumption

The user can view their consumption history and consult a personalised Energy Savings Report to monitor and optimise energy consumption.

Works with Apple HomeKit · works with Hey Google · WORKS WITH alexa

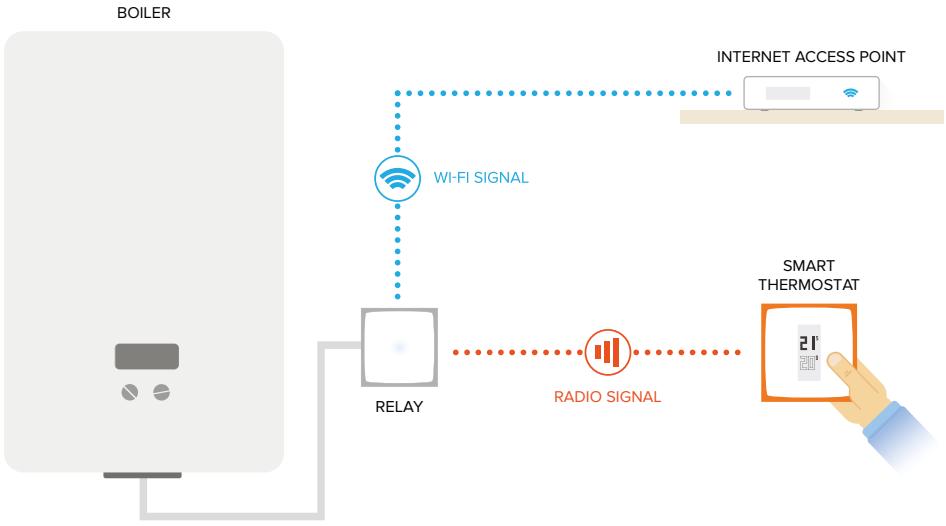
How does it work?

The Netatmo smart thermostat is compatible with most boilers and heat pumps

The thermostat connects via radiofrequency to its relay. The relay connects via Wi-Fi to the internet and enables remote control from the app. The smart thermostat is compatible with most boiler models (electricity, gas, oil, wood) and heat pumps. You can easily install it as a new thermostat, or to replace an existing wired one.

Check system compatibility on **check.netatmo.com**

Example of a wireless installation:
(also works as a wired thermostat installation)



Pack contents

1 thermostat
1 mobile stand
1 relay
1 boiler adaptor
1 UK power adaptor
1 mounting plate
4 coloured adhesive strips
3 AAA batteries
4 screws and 4 anchors

For individual
OpenTherm boilers

OTH-PRO

Smart **modulating thermostat**

Daily comfort and energy savings combined

Benefits for you

☑ High compatibility

The smart modulating thermostat is compatible with most OpenTherm system and modulating boilers, regardless of the energy it uses (gas, oil, wood).

☑ Easy to set-up in one hour

Just as easy as installing a traditional thermostat, the modulating thermostat is wireless so that it can be placed anywhere in the home.

☑ Upgradeable with the additional smart radiator valves

Add up to twenty radiator valves in ten different rooms.

Product benefits

Even more savings with the heating schedule and the 'Away' and 'Frost protection' modes

The thermostat creates a heating schedule tailored to the user's daily routine based on five questions on day-to-day usage. In addition to this schedule, there are 'Away' and 'Frost protection' modes, which automatically adjust the heating when the user is away for longer periods of time.

Remote control from a smartphone, tablet or computer

The thermostat is controlled using the Home + Control app.

A smart thermostat that adapts and keeps users updated in real time

The Auto-Adapt feature and the OpenTherm technology take into account the weather and heating characteristics of the home to maintain the right temperature.

Domestic hot water control for OpenTherm system boilers

The modulating thermostat regulates the domestic hot water supply in OpenTherm system boilers. It enables the remote activation or deactivation of hot water supply.

Works with Apple HomeKit · works with Hey Google · WORKS WITH alexa

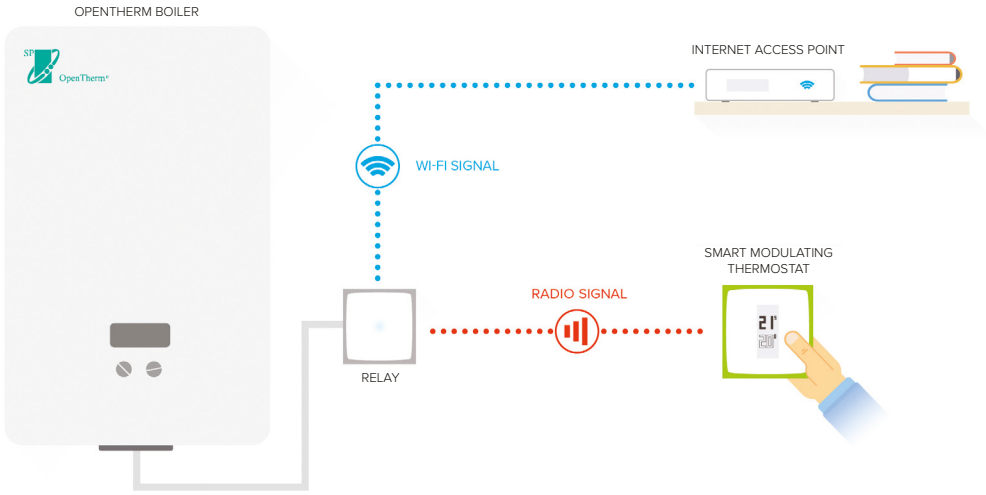
How does it work?

The Netatmo smart modulating thermostat is compatible with most OpenTherm boilers, regardless of the energy used (gas, oil, wood).

The modulating thermostat connects via radiofrequency to its relay. The Netatmo relay connects via Wi-Fi to the internet, enabling remote control from the app. The modulating thermostat creates a schedule based on lifestyle habits while changing the temperature of the water in the circuit to adjust the temperature of the home. If there are any problems with the boiler, it will notify the user of the exact error detected for easy diagnosis.

It can also regulate domestic hot water supply in OpenTherm system boilers via a separate schedule in the app. You can install it easily as a new thermostat, or as a replacement for an existing one.

The modulating thermostat can be installed wirelessly:



Pack contents

1 smart modulating thermostat
1 relay
1 mobile stand and 1 wall-bracket
1 wall mounting plate
1 boiler adaptor
4 colour adhesives
3 AAA batteries
4 screws and 4 anchors

For use with
the smart thermostat

NAV-PRO

Additional **smart radiator valve**

The right temperature in every room at all times

Benefits for you

High compatibility

Compatible with 90%* of hot-water radiators thanks to the adaptors provided. Ten adaptors are included in the pack. Check compatibility at **check.netatmo.com**.

Easy to set-up in 10 minutes

Simply replace the existing thermostatic valves - even in winter when the radiators are being used.

Upgradeable with additional smart radiator valves

Up to twenty radiators can be controlled in ten different rooms for even more efficiency.

Product benefits

Heating tailored to the user's daily routine thanks to a room-by-room schedule

Based on five questions on day-to-day usage, the radiator valves create a room-by-room heating schedule that's comfortable and economical.

Remote control from a smartphone, tablet or computer

Smart features for greater energy savings

- Auto-Adapt feature: the radiator valves change the heating according to the outdoor temperature and the heating characteristics of the home.
- Open Window Detection feature: the radiator valves automatically switch the radiators off in a room where the windows are open.

Tools for monitoring and optimising energy consumption

The user can view their consumption history and consult a personalised Energy Savings Report to monitor and optimise energy consumption.

* Estimated rate of compatibility between Netatmo smart radiator valves and radiators in Europe thanks to the ten adaptors provided in this package and the adaptor packs sold separately.

Works with Apple HomeKit · works with Hey Google · WORKS WITH alexa

How does it work?

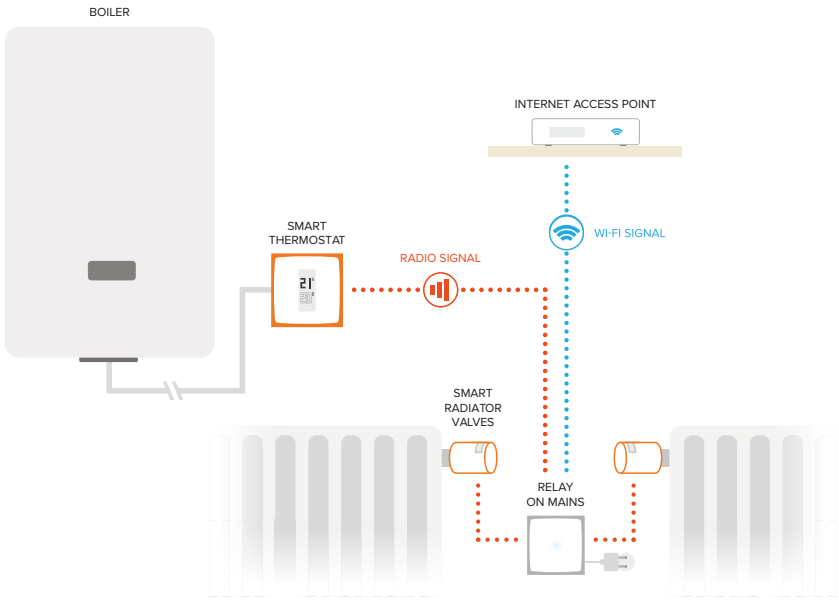
The additional smart radiator valves connect via radiofrequency to the relay of the thermostat. The Netatmo relay connects via Wi-Fi to the internet and enables remote control from the app.

Number of radiator valves per installation

If your customer already has a Netatmo smart thermostat, they can simply check the settings in the Netatmo app to find out how many smart radiator valves they can add. If you install a new Netatmo smart thermostat for your customer, you can connect up to 20 smart radiator valves.

Check system compatibility on **check.netatmo.com**

Example of an individual heating installation:
Using a Netatmo thermostat



Pack contents

1 additional smart radiator valve
10 radiator adaptors (M30x1.5, M30x1.0, M28x1.5, Danfoss RAVL, Danfoss RA, Giacomini, Vaillant, Petinarolli, Danfoss RAV, Standard M28x1.0) to suit most hot-water radiators
4 coloured adhesive strips
2 AA batteries for the additional smart radiator valve
1 adaptor selection guide
1 installation guide

NOC-PRO

Smart **outdoor camera**

Alerts users in real time so action can be taken if there is an intruder on the property

Benefits for you

Easy set-up in 30 minutes

The camera to be installed as a replacement for existing exterior lighting.

Create a smart security system with ease using several cameras

All indoor and outdoor cameras are managed through the same app: Netatmo Security. In this app, users can simply switch from one camera to another to see the events of the day.

Also available with a built-in siren

NOC-S-PRO
Smart outdoor camera with siren
This product comes with the added bonus of a 105-dB alarm to deter intruders.

Product benefits

Immediate smartphone notifications when intruders are detected

The camera can tell the difference between a person, an animal, a vehicle and a harmless movement.

With the Alert-Zones feature, users will only receive useful alerts

Define the zones to be monitored and for which users will receive alerts.

Built-in smart lighting system for even more efficiency

The floodlight lights up the path at night and can even deter intruders.

Subscription-free with no hidden costs

Videos, their storage and all features relating to the camera are fully available without subscription. App updates and new features are free, so there are no hidden costs.

Works with Apple HomeKit

How does it work?

The smart outdoor camera connects to the internet via Wi-Fi and can be easily installed in place of an existing light.

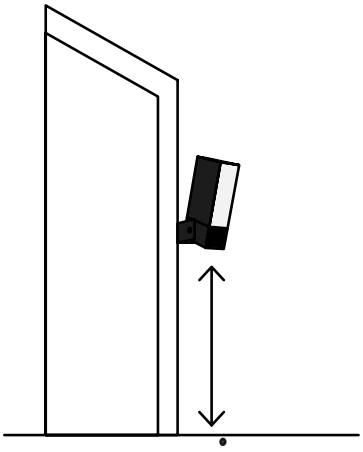
Your customer has an existing outdoor light:
→ Installation video available at:
https://pro.netatmo.com/uk/presence/installation

Your customer does not have an existing outdoor light or wants you to install the smart outdoor camera in a different location:
→ Install the product like an outdoor light.

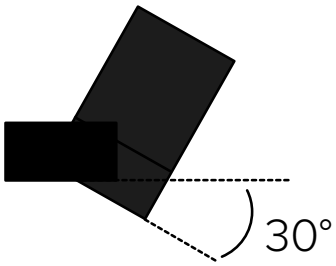
Requirements:

Wi-Fi network with high-speed internet connection required (minimum upload/download speed required: 25 Kb/s per Camera). Public hotspots are not supported.

Recommendations:



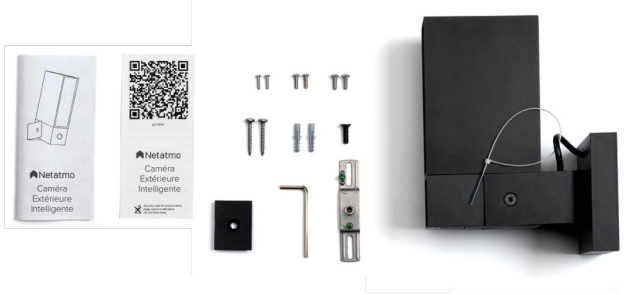
Height: 2.5 to 4 metres



Tilt angle: 30°

Pack contents

1 smart outdoor camera
1 microSD card (already inserted in the camera)
1 mounting plate
1 allen key
Wall screws and anchors
1 protective cover
1 user guide
1 QR code card



NSC-PRO

Smart **indoor camera**

Alerts users in real time so action can be taken if there is a break-in

Benefits for you

Easy set-up in a few minutes

Place the camera inside, facing the entrance of the customer's home. Plug it in and connect it to Wi-Fi via the app.

Design a smart alarm system with ease

Create a smart alarm system by combining the indoor siren, the door and window sensors and the indoor camera. This Netatmo smart alarm system with camera offers full protection for the home.

Product benefits

Real-time alerts in the event of a break-in thanks to facial recognition

Familiar face or stranger? A harmless movement? With facial recognition and detailed notifications, the camera only sends alerts when necessary.

Subscription-free with no hidden costs

Videos, their storage and all features relating to the camera are fully available without subscription. App updates and new features are free, so there are no hidden costs.

User privacy is protected

The camera recognises and respects users' privacy with the option of deactivating video recording when a familiar face is recognised.

Works with Apple HomeKit · works with Hey Google · WORKS WITH alexa

How does it work?

The smart indoor camera connects to the internet via Wi-Fi and is easy to set up.

→ Installation video available at: **https://pro.netatmo.com/uk/welcome**

Requirements:

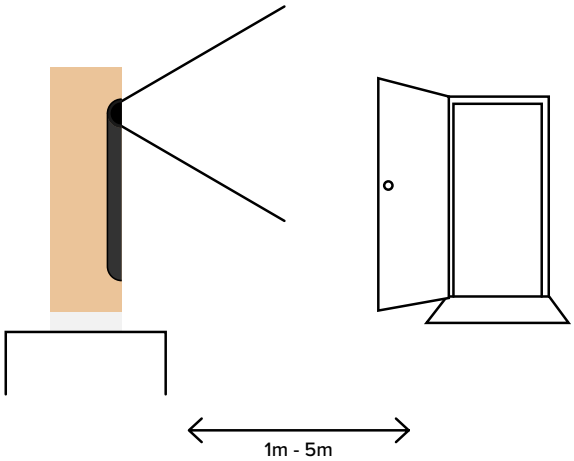
Wi-Fi network with high-speed internet connection required (minimum upload/download speed required: 25 Kb/s per Camera). Public hotspots are not supported.

Indoor use only.

Keep away from sources of heat.

Recommendations:

Place the smart indoor camera on a table or shelf facing the front door.



Pack contents

1 smart indoor camera
1 USB cable
1 UK power adaptor
1 microSD card (already inserted in the camera)

NDB-PRO

Smart **video doorbell**

See who's at the door and answer from anywhere

Benefits for you

High compatibility

Simply install a module on the existing chime, then replace the current doorbell's button with the smart video doorbell.

Extensive electrical compatibility

The smart video doorbell is compatible with most electrical installations (8-24 V and 230 V), which means it can replace any wired doorbell that has a chime.

No battery to change

The smart video doorbell is powered using the cables of the existing doorbell so it doesn't need batteries to work.

Product benefits

Always home, wherever we are

When a visitor rings the smart video doorbell, the user can see and speak to them in real time via a smartphone, whether they're at home or on the other side of the world.

Maximum protection of the front door

Thanks to the person detection and Alert-Zones features, the smart video doorbell detects if someone is lurking on the front doorstep. Is it an intruder? With the built-in loudspeaker, it's easy to scare them away.

No subscription and access to all features

A one-time purchase with no hidden fees. Videos are stored for free on the microSD card included, and users have the option to use a Dropbox account or a personal FTP server as additional storage.

See who is at the door 24 hours a day

The built-in infrared night vision ensures around-the-clock protection day and night, allowing users to see what's happening on the doorstep even when it's pitch-black outside.

Works with Apple HomeKit

How does it work?

Thanks to its 8-24 V and 230 V compatibility, the smart video doorbell is very easy to install as a replacement for an existing wired doorbell. It also allows users to keep their existing chime.

Requirements:

A private Wi-Fi network

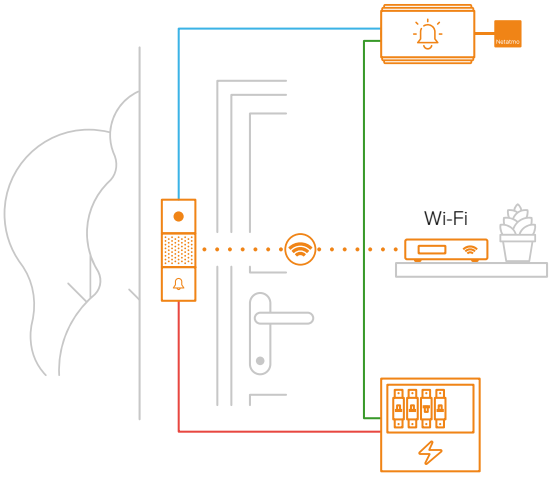
An existing wired doorbell and chime

An electrical installation between 8-24 V & 230 V

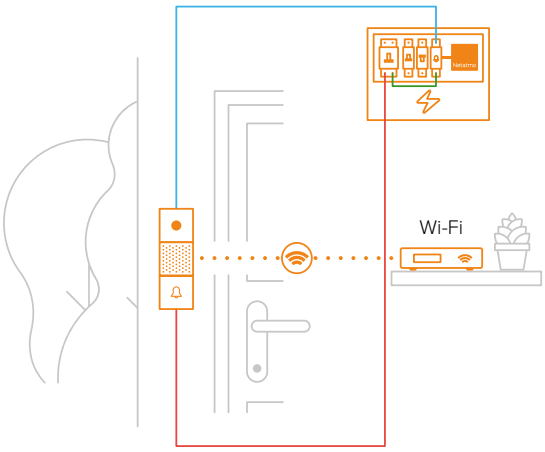
Use our online tool to check the compatibility of your customers' installations with the smart video doorbell:
https://check.netatmo.com/en-us/security/doorbell

Installation:

1) The chime is located near the door



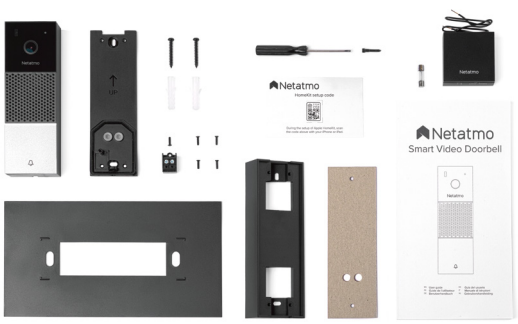
2) The chime is located in the electrical panel



The smart video doorbell also adapts to any kind of entrance.
For example, if the doorbell is positioned at an angle which would limit the camera's field of view, the smart video doorbell can be installed on the optional 25° bracket.

Pack contents

1 smart video doorbell
1 microSD memory card
(already inserted in the product)
1 wall mounting plate
1 25° bracket
1 finish plate
1 chime module
1 wire connector
1 drilling template
1 additional fuse
Screws and anchors
1 HomeKit card
1 user guide



DTG-PRO

Smart **door and window sensors**

Alert triggered even before a break-in occurs

Benefits of the sensors

Users are alerted even before a break-in occurs

The smart door and window sensors detect vibrations and the opening of doors and windows, sending an alert to the smartphone even before a break-in occurs.

Users are notified if a window has been left open

The smart door and window sensors can send alerts to the smartphone when a door or window has been open for too long.

NIS01-PRO

Smart **indoor siren**

Deters intruders to better protect the home against burglaries

Benefits of the siren

Automatic 110-dB alarm in the event of a break-in

Using facial recognition, the camera sends a warning to the smartphone if there is a break-in while the siren automatically sets off its 110-dB alarm.

Automatic alarm activation and deactivation

The alarm automatically activates and deactivates when the user leaves and returns to the house.

Pre-recorded sounds to simulate a presence in the home

The siren includes a whole range of domestic sounds that simulate a presence in the home in case of a break-in.

NBU-AS-PRO

Subscription-free

Smart
alarm system with camera

Protect homes with a complete security solution that can prevent break-ins

Benefits for you

Create a smart alarm system for full protection

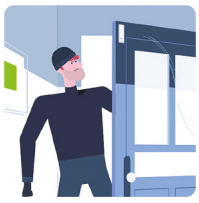
Create a smart alarm system by combining the indoor siren, the door and window sensors and the indoor camera. This alarm system with camera offers full protection for the home.

Easy set-up

Download the Netatmo app to your smartphone to connect the various elements. Simply place the smart indoor camera and smart indoor siren in the hall and fix the smart door and window sensors to the doors and windows.

The alarm system automatically arms when nobody is home.

Real-time alerts is sent on smartphone with the video of the intrusion.



Break-in detected! The siren goes off automatically.

The system disarms automatically when a family member is recognised thanks to the camera's facial recognition.

Pack contents

1 smart indoor camera
3 doors and windows sensors
1 smart indoor siren

NTH-PRO
Smart thermostat

PRODUCT DESCRIPTION

Programmable thermostat with smart features. E-paper display. Translucent plexiglass cube designed by Starck. Can be customised with one of four available colours. Temperature can be directly adjusted on the thermostat. Designed for indoor use only.

PRODUCT SIZE

Thermostat and relay: 83 x 83 x 22 mm

SENSORS AND MEASUREMENTS

Temperature (measurements): Ranges from 0°C to 50°C (± 0.1°C)

Temperature (setpoint): Ranges from 5°C to 30°C (± 0,5°C)

Unit: °C

POWER

Thermostat: 3 AAA batteries with a 2-year lifespan

Relay: 220/240 V

SETUP & COMPATIBILITY

Dry contact thermostat and relay, voltage free (ON/OFF)

Switching current: max. 4 A

Switching voltage: max. 250 VAC

Switching power: max. 120 VA

Power factor: cos φ > 0.8

PACK CONTENT

1 thermostat, 1 mobile stand, 1 relay, 1 boiler adaptor, 1 UK power adaptor, 1 mounting plate, 4 coloured adhesive strips, 3 AAA batteries, 4 screws and 4 anchors

REQUIREMENTS

High-speed wireless internet connection. Public hotspots not supported

CONNECTIVITY SPECIFICATIONS

Between the relay and the Internet box: Wi-Fi 802.11 b/g/n (2.4GHz).

Supported security: Open/WEP/WPA/WPA2-personal (TKIP and AES)

Between the thermostat and the relay: long-range radio (868 MHz)
