LINEA 5000 _____ 5

The technology, including the sensors, is hidden behind dark glass that activates automatically when approached.

Sophisticated details and durable materials exude style and high quality.

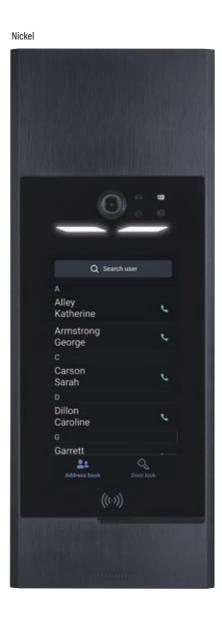

5 exclusive finishes to add value to every entrance.

Two finishes in the catalogue.

Find the solution for any room.

With 5 exclusive finishes in 60% recycled aluminium Linea 5000 with Netatmo can be easily adapted to all types of buildings, from contemporary of any size to classic architecture. Linea 5000 expresses robustness and high quality in every colour.

Three finishes on demand made to order or project.

WWW.BTICINO.COM

BTicino 2 Wires technology.

No changes to your working habits.
Same installation rules as for the 2 wires entrance panels.

Ideal for upgrading existing 2 wires video door entry systems (e.g. systems with Sfera entrance panels or traditional brass pushbutton panels). **Bring your old system to the digital era with the new Linea 5000 with Netatmo.**

Perfectly compatible with all the devices of the BTicino 2 wires video door entry system range: Classe 100 and Classe 300EOS video internal units, power supply units and system accessories.

Wide angle HQ camera

Resolution: 5 Megapixels

Digital filters

Horizontal field of view: (119°)

Viewing field angle (diagonal): 151°

NOTE: video signal is transmitted to internal units via PAL encoding on 2-Wires BUS SCS technology.

Linea 5000 is suitable for all home environments.

With 2 wires technology and the possibility of customising the finish with the desired colour, logo and street number, it guarantees maximum adaptability in any living context.

A sustainable approach

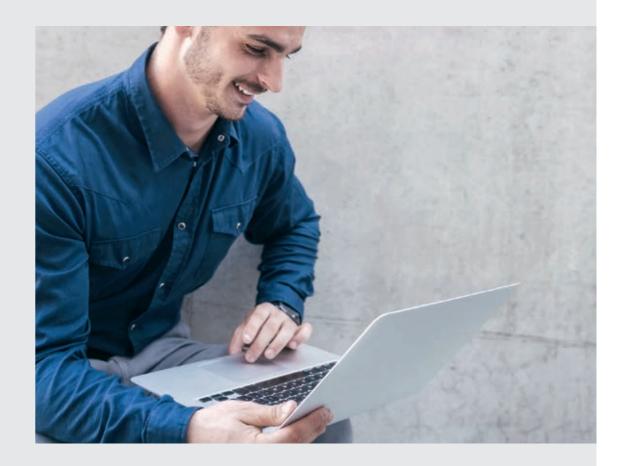

Recycled aluminium

The fixing frames of the Linea 5000 modules and the finishing frames are made of **60% recycled aluminium**.

A new experience. Completely digital.

Linea 5000 with Netatmo will allow you to make your work "digital", and therefore more efficient, for a whole new user experience. Thanks to the Home + Project app, it will also be possible to remotely digitally configure, manage and update the pushbutton panel using a smartphone or PC, quickly and without the use of physical configurators.

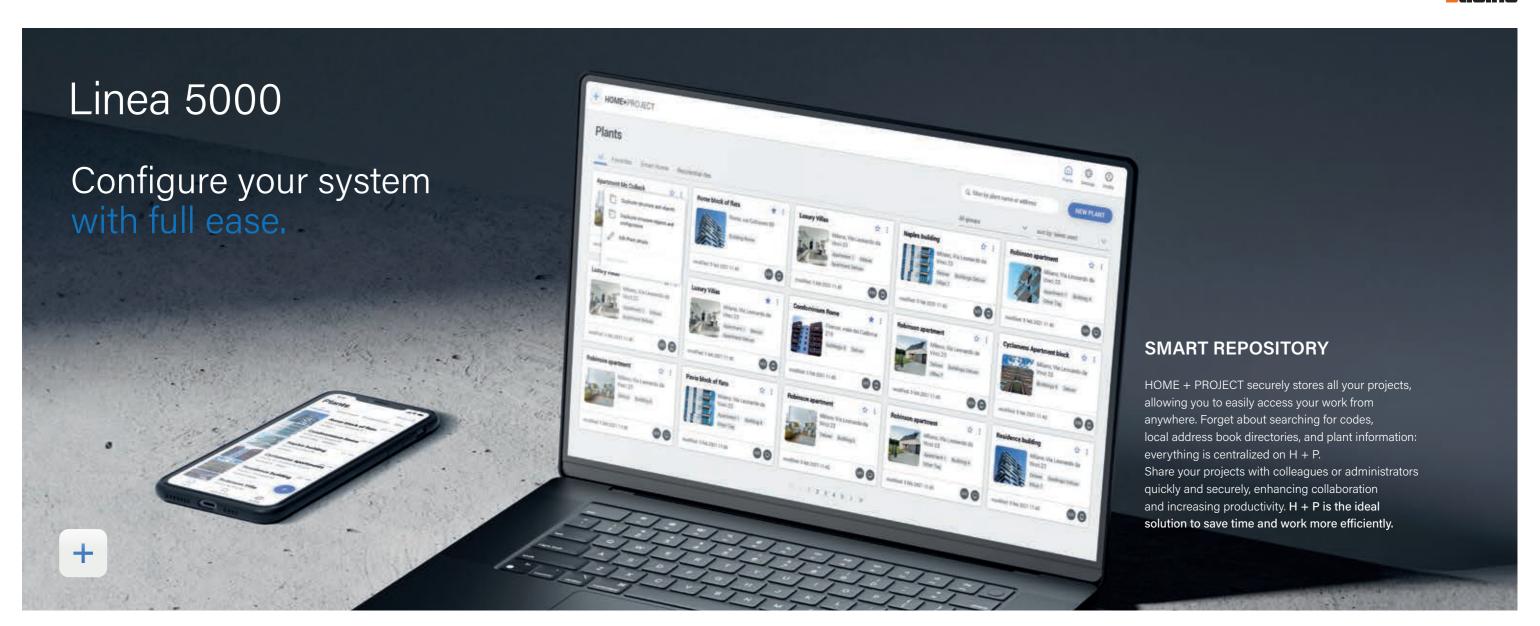

With the new Linea 5000 with Netatmo, working has never been so smart.

HOME + PROJECT IS COMPLETELY FREE AND CAN BE

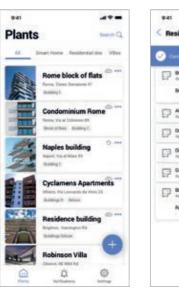

HOME + PROJECT. To digitally design, configure and customise the video door entry system

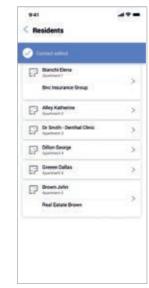

HOME + PROJECT - a new work tool for the installer.

Available as a web app for Desktop PCs

at https://homeproject.legrand.com and as a smart device mobile app for on-site configuration.

Thanks to the App, creating, configuring, and fine-tuning the system has never been easier. The Web App for desktop allows you to create and configure the entire system directly from the office, with the convenience of importing files containing entire resident directories.

REMOTE ADDRESS BOOK EDITING

This digital tool helps simplify not only the configuration process, but also maintenance and customisation. Modify system parameters, update the address book and download the new entrance panel configuration, either remotely or directly on site via Bluetooth connection.

bticino

Linea 5000

Total adaptability.

The extensive customisation options, both physical and digital, bring unique freedom of expression. Possibility of customised finishes, with frames in assorted, logo and street number for total adaptability. All this makes Linea 5000 with Netatmo particularly suitable for meeting the customisation requests from architects, design studios, real estate developers and customers.

Physical customisation of the finishing frames

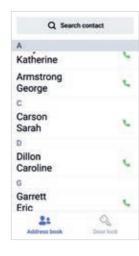

Using the specific online tool, it is possible to customise the finishing frames. Frames for customisation must be ordered using the specific custom part numbers (V/345101-02-03-04-05) - see the relevant catalogue pages.

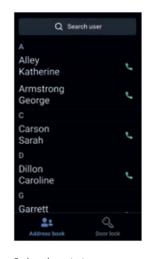

Digital customisation of the display

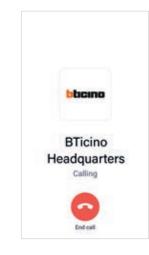

It is also possible to customise the display screens by changing the names of the residents in the address book, the display mode, adding a logo / address, as well as displaying messages for visitors/couriers, etc.

White mode: for clear and intuitive use.

Dark mode: protect your eyes and save battery life.

The logo of adds a very personal touch.

Customisable messages for Airbnb guests, couriers and visitors.

Multiple call modes. Smart call.

ADDRESS BOOK

with list of residents' names.

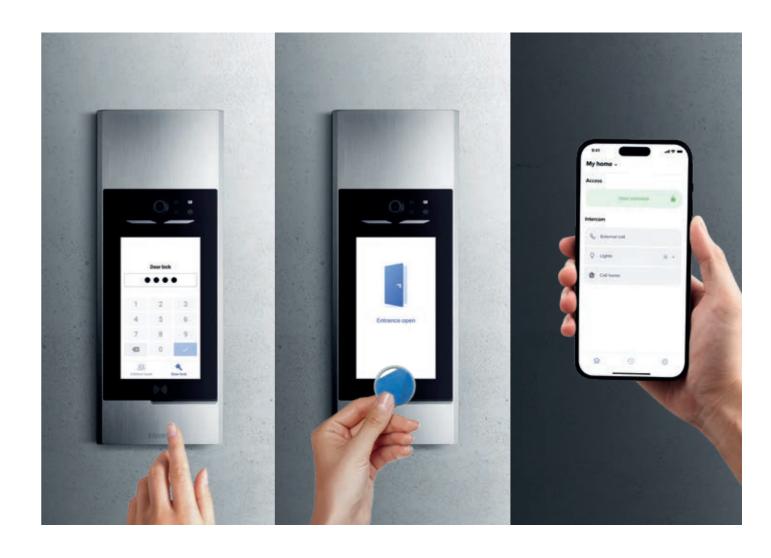

CALL WITH CODE (numeric or alphanumeric)

In this mode, in addition to the code you can also choose to have the address book.

APARTMENT BLOCK/RISER/FLOOR/ APARTMENT

Entering the exact address of the apartment to call in the system.

Multiple access modes. Smart access.

NUMERIC CODE

Pre-set.

(maximum of 5 access codes, also with date/time schedule).

RFID KEYCARD

Pre-programmed / registered. Keycards available in different colours.

Additional modules

RFID smart access accessory module

It allows the activation of an electrical door lock by means of a keycard or with Home + Security app via bluetooth. It is fitted with relay contacts (C – NO - NC) and clamps for the connection of a local door release pushbutton and can be programmed using the Home + Project app. It has some LEDs for the visual notification of the access status and night backlighting. To be completed with an appropriate finishing frame, it can be installed in 1-module flush mounted box or in wall mounted box for surface installation.

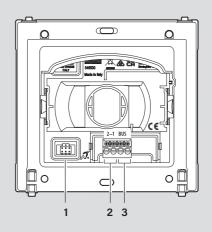

- 1 Connection of the local door lock release pushbutton;
- 2 Built-in relay contacts:
- 3 2 wires SCS/BUS connection;
- 4 Pushbutton to reset to the factory settings.

Inductive loop accessory module

It allows people wearing hearing aids fitted with (T) selector to use audio door entry communication. It is connected to the display module using the multicable supplied. To be completed with the appropriate finishing frame. Installation in 1-module flush mounted box or with the dedicated accessory for 3+1 composition.

- 1 Connection to the display module 345000;
- 2 Local power supply (2 1) connection;
 3 2 wires SCS/BUS connection.

Display module and 3-module finishing frames

Item Display module

345000 7" vertical display module

with wide-angle HQ camera (5 M Pixels).

Display and audio/video module to be combined with one of the 5 frames in different finishes for the creation of 2 wires systems. Equipped with an HQ camera with wide-angle field of view (119° horizontal - 151° diagonal), white LEDs for lighting and twilight sensor for night vision. High-resolution 7" touch screen display with shatter-proof glass (IK08), antifingerprint and proximity sensor for automatic switching on. With a digital microphone and echo eliminator for optimal sound performance. The flexible and user-friendly graphic interface is adaptable to any type of apartment block and allows a choice of 3 different call modes: address book call (list of residents' names), numeric or alphanumeric code call and block-staircase-floor-apartment logic code call. The direct call to the guard station and the customisation of the homepage logos also make it suitable for solutions with concierge or for commercial establishments. With advanced features such as voice feedback, automatic theme change (light/dark), customisation of welcome messages or instructions and temporary access code forwarding, it is suitable for residents and visitors of all ages and abilities. It also supports different modes for accessing the building: lock release with display code, RFID badge or Bluetooth via the Home + Security App, the resident's app. Programming and configuration requires the use of Home + Project (App or PC), the digital tool for the professional. Using this tool, it is possible to complete the entire configuration at the office, share it with other professionals and upload it to the display module via Bluetooth. Changes to residents' names and access codes are quick and smart, either on-site (via Bluetooth) or remotely (if the module has an active WiFi or Ethernet connection). Installation with 3-module flush mounted box 350030 or with wall mounted box 345331 or 345332.

I he book-like opening of the module allows for easy wiring. It allows the activation of an electrical door lock directly connected to clamps S+ and S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and of connecting a local door lock release pushbutton on clamps PL.

Item RFID Smart access module

345520 Additional RFID Smart access module

RFID/bluetooth smart access module for door lock opening in 2-wire systems where there is at least one Linea 5000 display module (345000), using the badge or using the Home + Security App via bluetooth.

The smart access module is fitted with relay contacts (C – NO - NC) and clamps (CP - P1) for the connection of a local door release pushbutton and can be programmed using the Home + Project app.

It has a programming reset pushbutton, LEDS for the visual

It has a programming reset pushbutton, LEDS for the visual notification of the access status and night backlighting. The device, to be completed with an appropriate finishing frame, can be installed in 1-module flush mounted box 350010 or in wall mounted box 345311 or 345312.

Inductive loop module

345530 Additional Inductive loop module

Inductive loop module to be used in conjunction with the display module Linea 5000 (345000). It allows people wearing hearing aids fitted with (T) selector to use audio door entry communication. In this mode, the hearing aid receives the audio signal directly from the amplification system, bypassing the microphone of the hearing aid itself, improving audio quality and reducing background noise. It is connected to the display module using the appropriate multicable supplied. To be completed with the appropriate finishing frame (available in 5 finishes) The device CANNOT be used stand-alone but only as additional module in conjunction with the Linea 5000 display (345000). To be installed in 1-module flush mounted box 350010 or with the dedicated accessory 345341 or 345342 for 3+1 composition.

Online design, budgeting and customisation tools

YouDiagram

Software for the design and budgeting of BTicino audio and video door entry systems (2 wires, IP, 8 wires, analogue).

It gives the possibility of creating a single line diagram of the system, which can then be exported in PDF and DXF format, of selecting the products and their finishes, of configuring the devices and checking current consumptions.

Can be downloaded from: https://www.bticino.com/tools/design-software/youdiagram

Video door entry system Configurator

Web app for the configuration and budgeting of audio and video door entry systems for villas and apartment blocks.

What it allows to do:

- 1. System creation, depending on the type of system and the characteristics of the property.
- **2. Get an estimate.** At the end of the configuration, a detailed and complete list of materials is generated.
- Access the project at any time.Access the restricted area to view or modify the project.

Accessible from: https://vdeconfigurator.bticino.com/

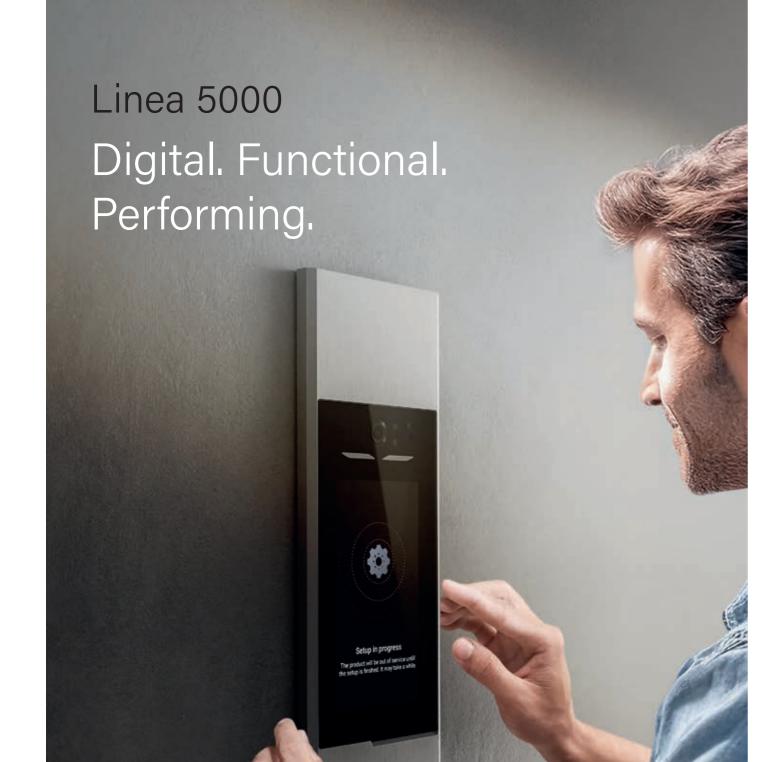

Online tool for the customisation of the Linea 5000 finishing frames

Online application for the customisation of Linea 5000 finishing frames with specific text, logos and graphics.

After completing the online customisation process, the user can print a PDF file with a unique code.

The wholesaler receives the PDF file from the installer/commercial representative and sends it to BTicino together with the order. At BTicino, the order is processed as a "special order".

Accessible from: YouDiagram software

BTicino SpA Viale Borri, 231 21100 Varese - Italy www.bticino.com
