WHY MAKE A SMART ELECTRICAL SYSTEM?

A Smart Home for all

BTicino, world leader in electric systems for homes and buildings, offers you the power to connect your projects easily. You can create **reliable, customized and flexible solutions** that provide benefits in terms of **comfort, energy savings and freedom to control** the home remotely.

These solutions are designed to be integrated into a genuine, coherent and scalable ecosystem that can be managed intuitively through the **Home+ App Suite**.

A reliable, customizable and flexible system, in which the various functions are designed to be integrated with each other and to respond perfectly to the specific needs and requirements of those who will use them.

The smart electrical system is already a reality!

WORLDWIDE:

- Number of homes with smart devices: **422.2 million** (annual growth +17%)
- The global market for **smart speakers with built-in voice assistants** will see **154 million** products sold in 2024.

Sources: We are social, Digital 2025
Report Prime Research Team, 2025

Why propose smart devices to your Customer?

THE WORLD IS ALREADY SMART

Everyone has a smartphone and a voice assistant, and **already knows about Smart Homes.**

YOU DON'T HAVE TO CHANGE YOUR HABITS

Connected objects are installed **in the same way** as traditional ones

PROFESSIONALISM

You can introduce yourself to your Customers as a **professional up to date** with the latest developments

UP-SELLING

You can offer **scalable solutions** that enable greater up-selling of products and functions.

THE HOME VALUE INCREASES

Innovative features and smart products **increase the value** of the home, making it intelligent and Smart

ENERGY SAVING

Smart systems allow energy efficiency promoting the reduction of carbon footprint, healthy leaving and flexible spaces.

OPEN AND INTEROPERABLE SOLUTION

Through the Apple, Google, Amazon and API platforms, or specific drivers with bus wiring.

The benefits for your Customer

SIMPLE TO USE

Use the smart system **as easily** as a traditional system, **but with many more features**.

MORE CONTROL AND SAFETY

Control and management of all the home functions in an easy, intuitive and safe manner, thanks to the **Smartphone remote control**.

MORE CUSTOMISATION

A **customized home** that adapts to your lifestyle and **can evolve as needed over time**.

GREEN WELLBEING APPROACH

The **monitoring and control of consumption** promotes **daily comfort**, but also peace of mind through **energy savings** and a reduced carbon footprint.

ADVANCED FUNCTIONS AT AFFORDABLE PRICES

A smart home offers all the **advantages** of a traditional home, with the added bonus of innovative features with a **smaller and smaller cost gap**.

MORE INTEGRATION

Control and management of all the home devices and functions from **a single application** or using **voice commands**.

BTicino and Netatmo. The Smart Home

All the advantages of a Smart Home are available through BTicino and Netatmo products. Netatmo branded products are in fact fully compatible with the BTicino offer, which has allowed us to develop together new and modern smart solutions.

The range of connected products for the BTicino-Netatmo Smart Home allows for better living, managing the home in an innovative, simple and connected way.

The Ecosystem is based on **Home+ App suite**: Home + Security and Home + Control.

bticino

 **Netatmo**

HOME + CONTROL

HOME + SECURITY

Choose the Smart Home that's right for you

BTicino products allow for Smart Homes of different levels, so that your needs can be fully met. **Our connected solutions are scalable, modular and flexible.** From a few basic solutions, possible with a few connected functions that can be managed using smartphones or voice assistants, up to advanced systems that can manage multiple home functions with predefined voice commands, all integrated in one single application.

**CHOOSE BASED
ON THE SIZE OF YOUR HOME AND YOUR INVESTMENT**

Everything within the reach of an App

You can access the **Home+ App Suite** with the BTicino Smart Home. The installer only needs **one single tool to design the whole Smart Home** (mobile and webApp), while the end customer only needs **one APP to manage all the home comfort functions, and one App dedicated to smart security.**

FOR THE CUSTOMER

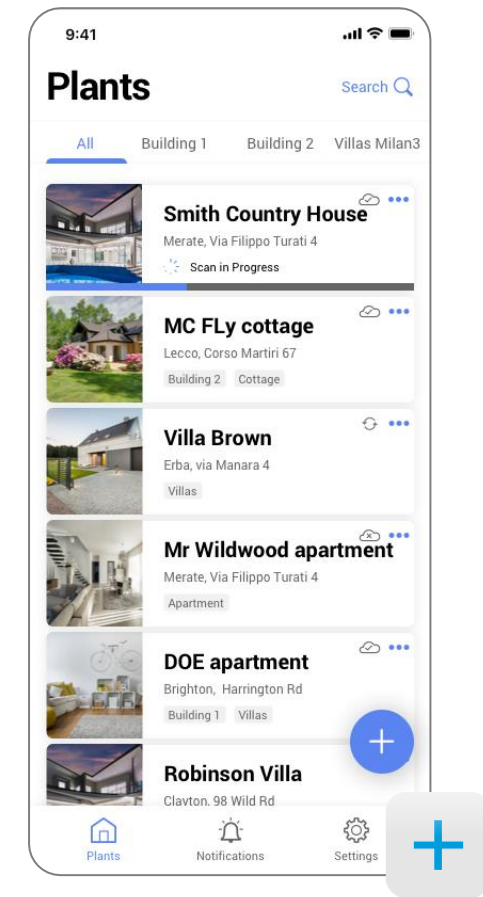

HOME + CONTROL
Controls all the home comfort functions.

HOME + SECURITY
Controls the video door entry system and Netatmo products.

FOR THE INSTALLER

HOME + PROJECT
Designs and configures the system (local configuration without Internet / possibility of copy-paste for the management of similar projects).

Manage the home also with the voice

BTicino Smart Home solutions are compatible with the **Google, Amazon and Apple** platforms. Thanks to the preferred voice assistant, it is possible to control the home hands-free: an extremely useful function also for those with mobility problems.

Notes: Home Pod, Google Home and Amazon Echo are available from Apple store, Google Store, Amazon, or from authorised retailers.

«Hey Siri,
close all the shutters»

«Alexa, set the ground
floor temperature
to 20 degrees»

«OK Google,
fully switch on the
kitchen light»

The Smart Home is now an open and interoperable system

The Smart Home is an open system that can be easily integrated, without requiring any system changes, with the best third-party technologies, systems and devices.

«**Works with Legrand**» is the innovative Legrand program dedicated to the acceleration of the spread of the connected devices in its offer. Compatible with the main global players, IoT allows to connect to the Legrand ecosystem in many ways.

Systems and products from other IoT players that can be integrated as needed thanks to a dedicated program.

For BTicino, privacy and security come first

Today, user concerns about security and privacy are growing. It is vitally important for BTicino to remove such concerns and provide its users with an even more **reliable and secure experience**, while ensuring complete confidentiality of personal data. BTicino collectively undertakes various actions to enhance the security of its products, network, and users.

01

Information
Security

Techniques, processes and governance aimed to protect access to Products and Data

App Home + Control

Movement sensors

THE LIGHTS
TURN ON AND OFF
AUTOMATICALLY
WHEN NEEDED.

Automatic or timed switching on

There are various possibilities for automatic or timed switching on of light points, after presence detectors have triggered or for hourly programmings. They can switch off after a certain period of time has elapsed or after another event on the system.

I stay in the room.

The detector keeps the lights on as long as my presence is detected.

Daylight is sufficient.

The detector switches off automatically. With the dimmer function active, it gradually lowers the intensity of the lights before turning them off.

The daylight fades.

The detector switches on automatically. With the dimmer function active, the intensity adapts and complements the natural light level, to achieve the required brightness.

Smart Wheater Station

MEASURE AND ACT PRECISELY ON YOUR ENVIRONMENT

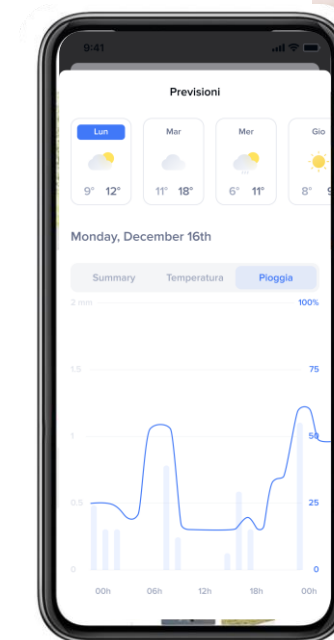

The Netatmo Smart Weather Station has a special sensor system that **measures indoor and outdoor temperature and humidity, noise levels, indoor air quality, and atmospheric pressure** with extreme accuracy and precision.

Enhance your indoor and outdoor measurements by **adding up to 3 additional Indoor Modules, 1 Rain Gauge, and 1 Anemometer** to the Smart Weather Station.

Create automations with other devices connected to Home + Control for those who want to transform weather data into concrete actions for home comfort and efficiency.
