Light up Your world. Now

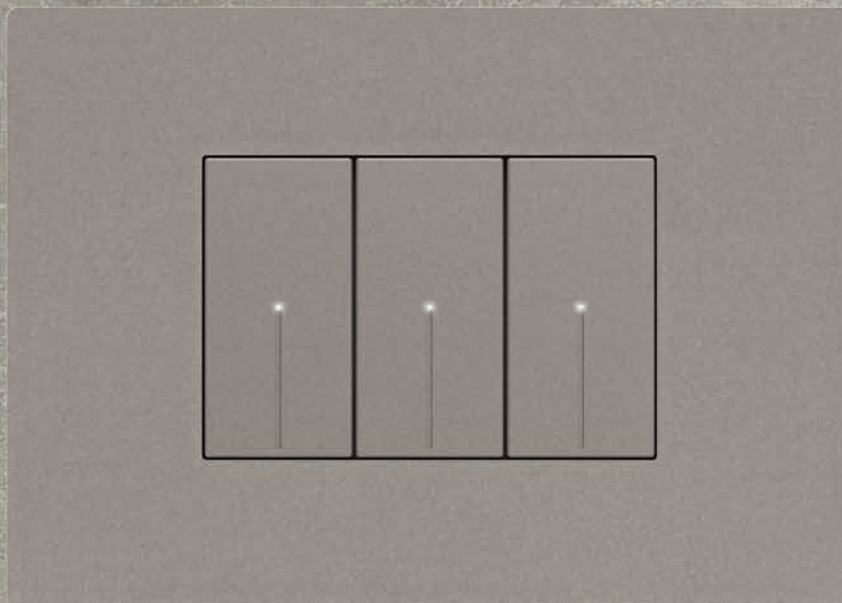

#ImprovingLives

bticino

A brand of  legrand®

LIGHT *now*

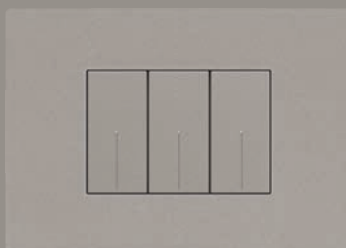

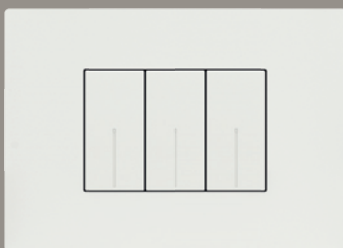

Light up Your world. Now

Merging timeless minimalist design with cutting-edge smart technologies, Light Now redefines your home management experience. Compatible with both traditional installation systems and the latest smart home solutions, Light Now is also an eco-friendly range that prioritizes sustainability by minimizing energy use and utilizing green materials, to reduce the ecological footprint.

Step into the next era of the smart home - light up your world, reduce impact, live smarter. Now.

Design

Extreme minimalism. Timeless beauty.

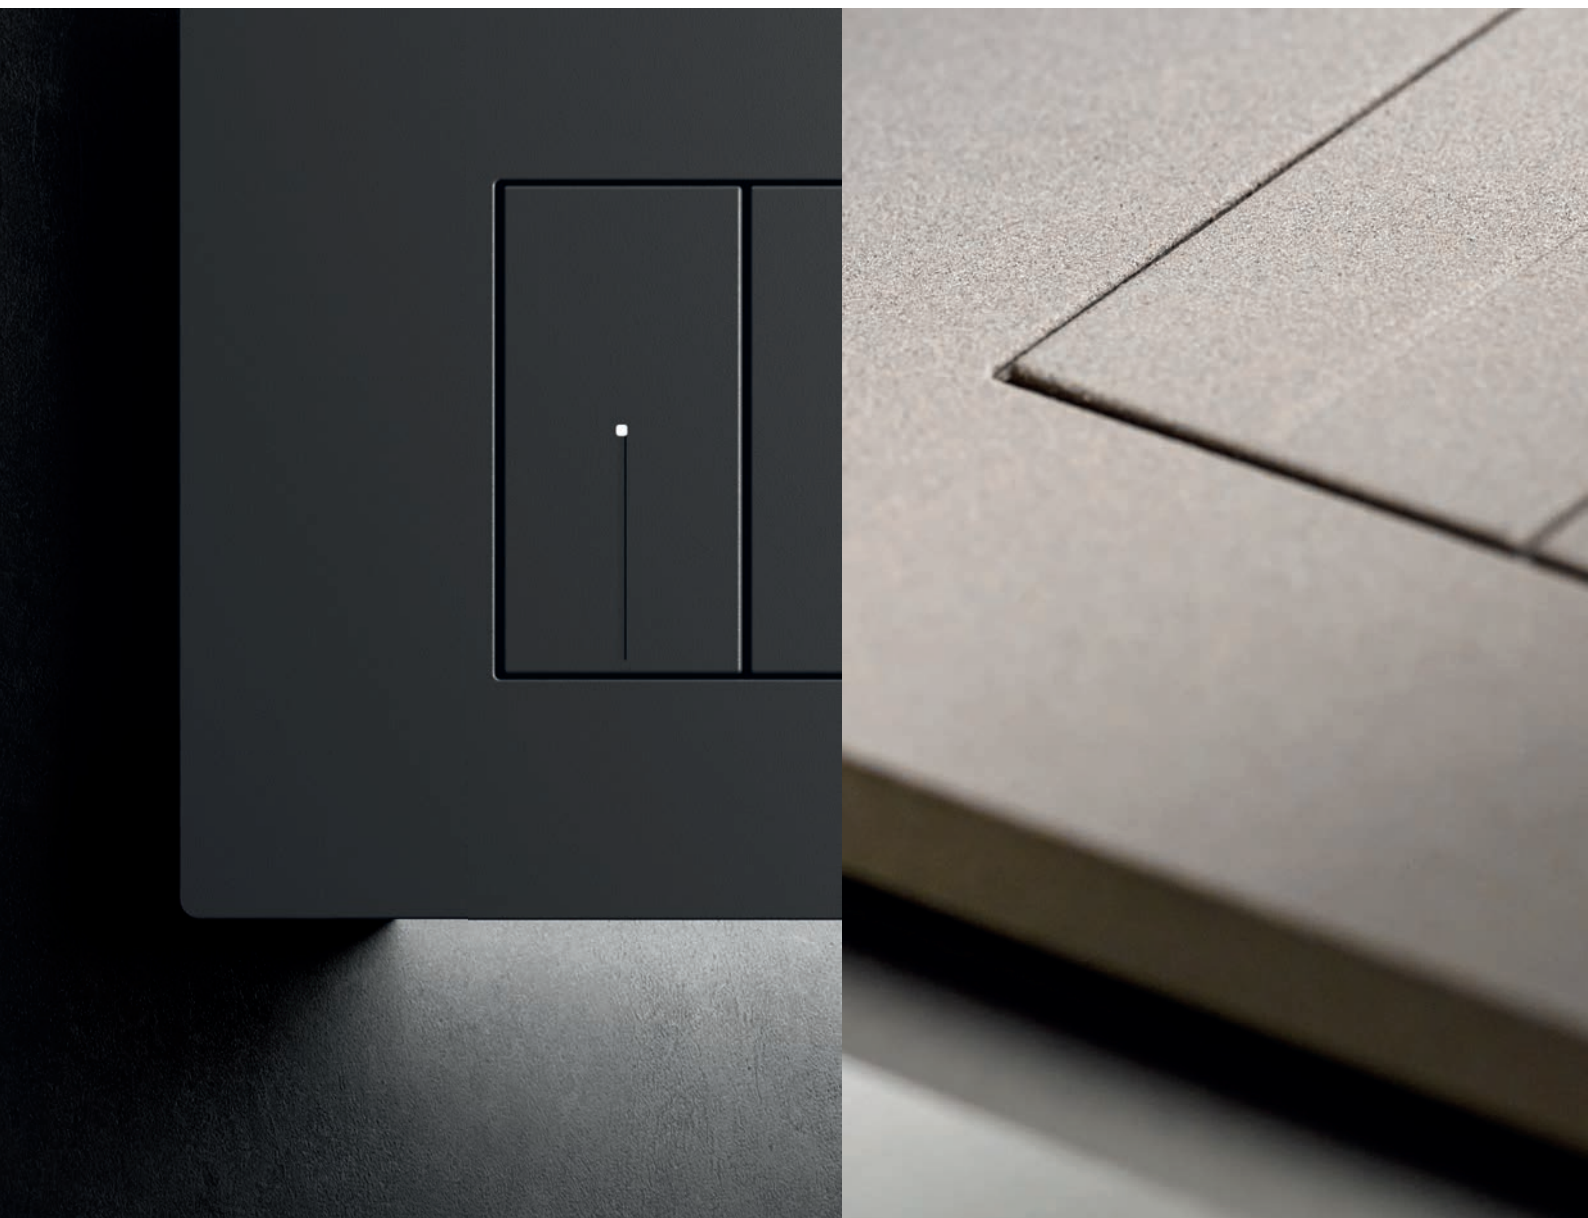

Pure design

A minimal and pure design where every detail becomes the protagonist.

Perfect alignment between cover plates and axial controls. Slightly rounded edges.

Light Now has won this prestigious international award, confirming BTicino's ability to combine technology and design.

Light

The distinctive element

Central LED

A discreet central LED, illuminated in white or blue, at the end of the soft signature, makes the control more ergonomic, facilitating its identification.

Lighting frame

A supporting led, optional, and installable even at a later time, allows for elegant illumination at the bottom of the cover plate.

Matter

Tactile sensations

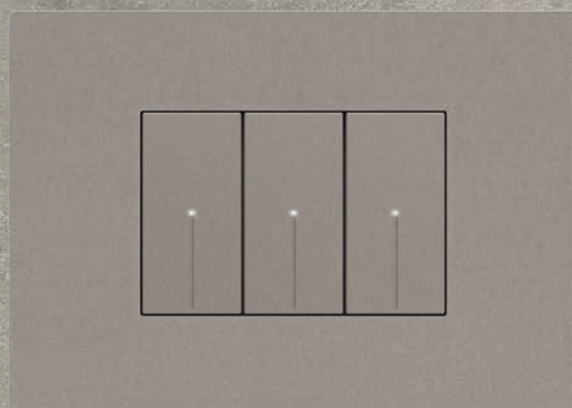

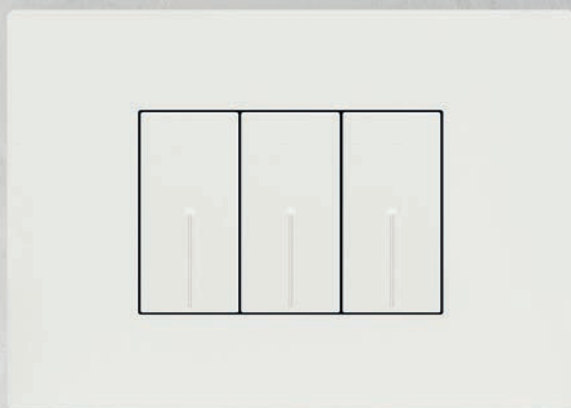

A touch of style

Light Now enhances the material component with slightly grainy surfaces that create sophisticated textures. This feature offers a unique tactile experience and allows for meticulously detailed material combinations.

The ability to choose between smooth or rough surfaces allows you to select the texture that best suits your decor and personal taste.

Colors

A careful selection

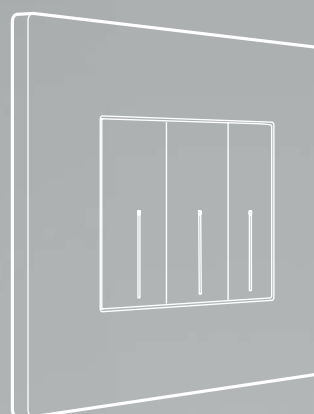

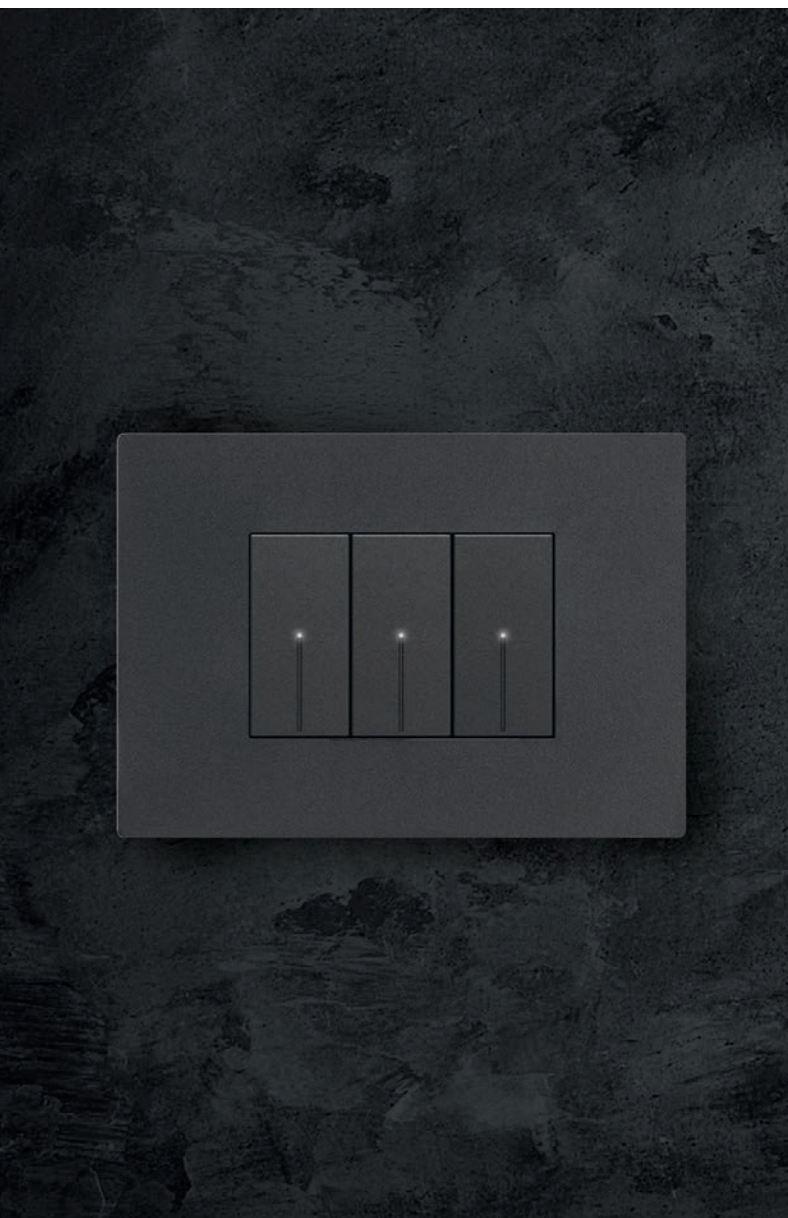

Refined matt

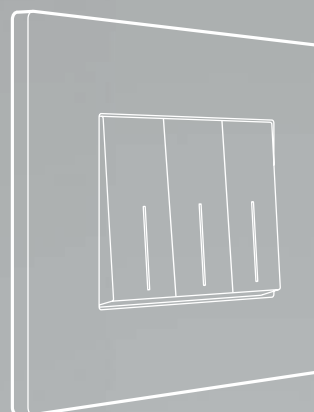

Light Now offers elegant monochromatic or tone-on-tone solutions, providing customers with numerous options to integrate the electrical system into sophisticated and harmonious environments.

Monochromatic elegance

Three colors for the mechanisms-White, Stone and Dark-perfectly complement the plates with the same finish, creating a flawless monochromatic effect.

AXIAL

ROCKER

Finishings

Light Now enhances the material component with slightly grainy surfaces that create sophisticated textures. This feature offers a unique tactile experience and allows for meticulously detailed material combinations.

Axial and rocker controls

Axial control

Allows mechanisms to always be aligned with each other to achieve the maximum elegance.

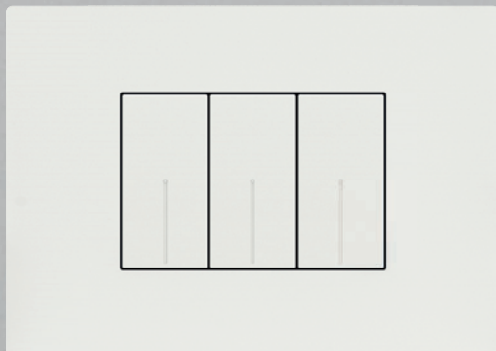

Rocker control

For those who like traditional controls in line with the standard habits.

Finishing collection

Circular. A story about recycling

WHITE

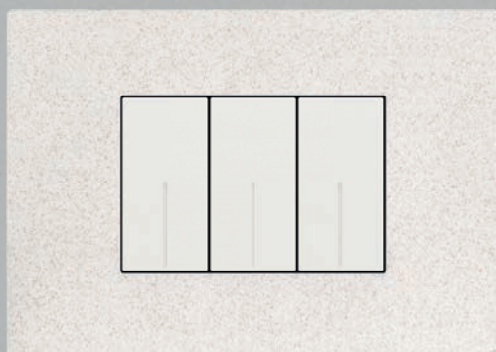

Light Now's Circular collection represents the conscious transformation of pure, all-natural materials.

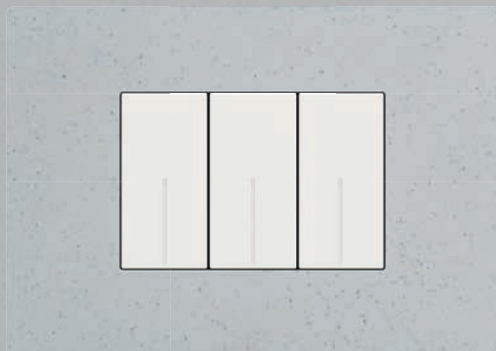

This innovation aims to reduce the use of virgin materials, fitting harmoniously into circular economy practices.

Available in three chromatic variants: pure white with a matte finish, a must-have that is always appreciated and modern, and two exclusive finishes that give surfaces an elegant texture on a smooth surface.

WHITE FIBER

WHITE MICA

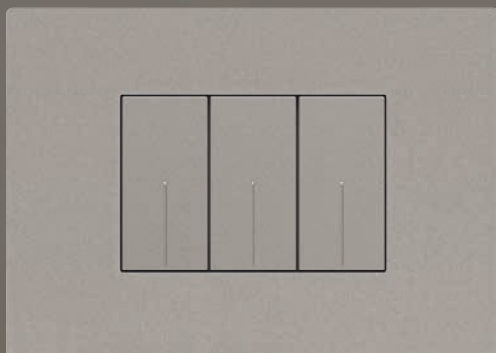

Finishing collection

Stone. Inspired by nature

STONE

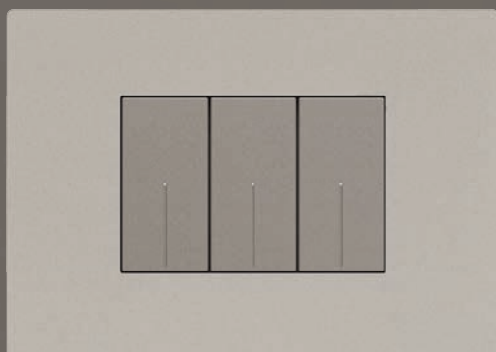

It draws inspiration from natural elements such as sand and building materials, appreciated for their texture and granularity. This collection, created on a recycled polymer, is distinguished by a new texture that is stunning both to the touch and to the eye.

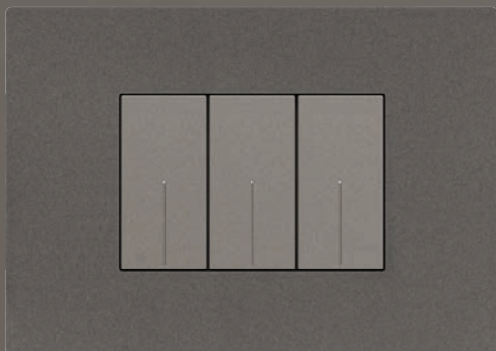

Three new finishes adapt to evolving lifestyles and spaces: the monochromatic Stone, a lighter one that recalls the shade of sand, and a darker one that recalls concrete.

The water-based paint is made from organic raw materials obtained by fermenting biomass, and the characteristic textured effect is due to insoluble spheres.

SAND STONE

MOKA STONE

Finishing collection

Patina. Celebrating imperfection

DARK

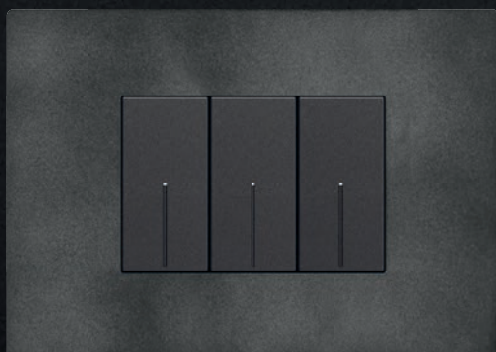

The Patina collection is distinguished by its consciously "imperfect" appearance, celebrating natural beauty and non-uniformity on a recycled polymer.

This effect, ideal for dark rooms that reflect the latest trends, infuses life and personality into any space, defining a sophisticated style that highlights furniture details.

The finish is achieved by applying a lightly pigmented water-based paint, used in controlled quantities. The end result is both durable and distinctive, adding a unique touch to any space.

DARK GREY

DARK GREEN

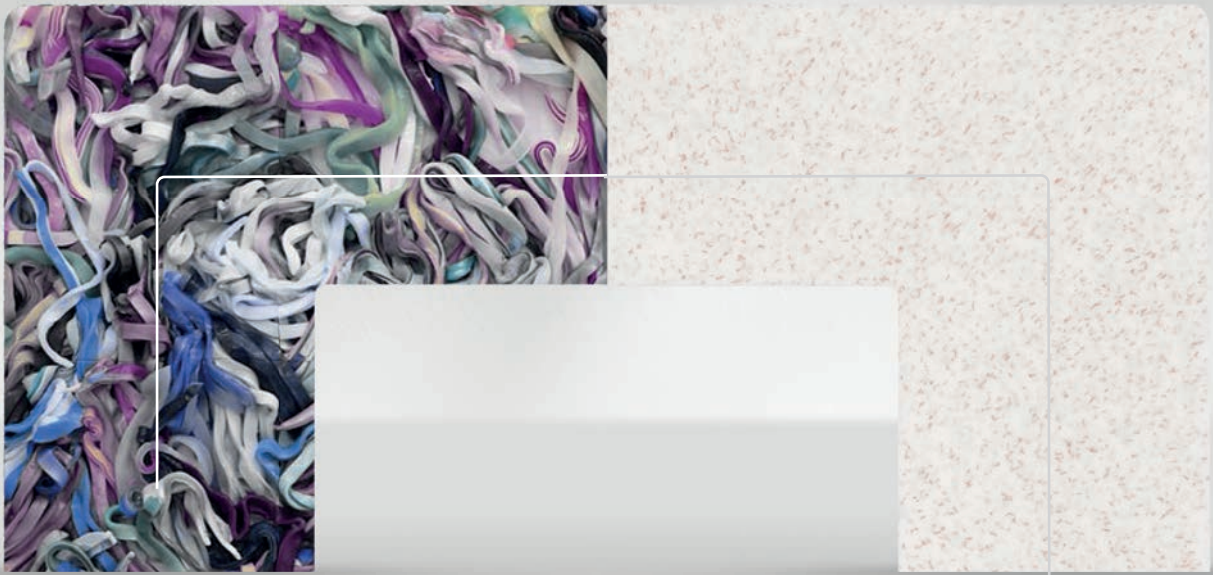

Materials

Giving a second life to waste

Circularity of materials is a cornerstone of the ecological transition

Light Now involves reduced use of raw materials and broader reuse, recycling, and regeneration of existing materials, thereby reducing waste and minimizing environmental impact.

White Fiber

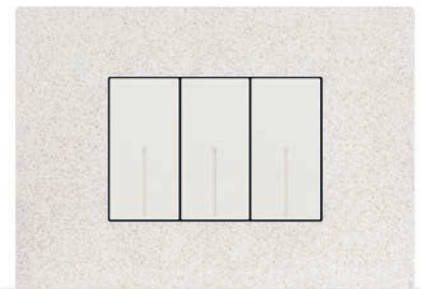

Composed of

VISCOSA FIBERS

RECYCLED-ABS

Fast fashion generates a large amount of waste, which seeks a new existence.

We combined viscose fibers with recycled ABS, achieving an aesthetically intriguing result.

White Mica

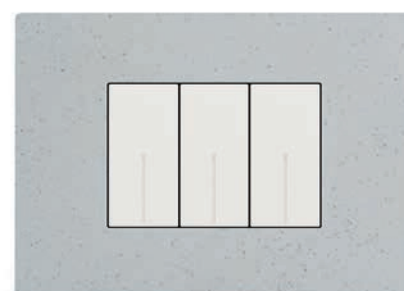

Composed of

OLIVE STONES

RECYCLED-ABS

Mica is an interesting mineral of natural origin.

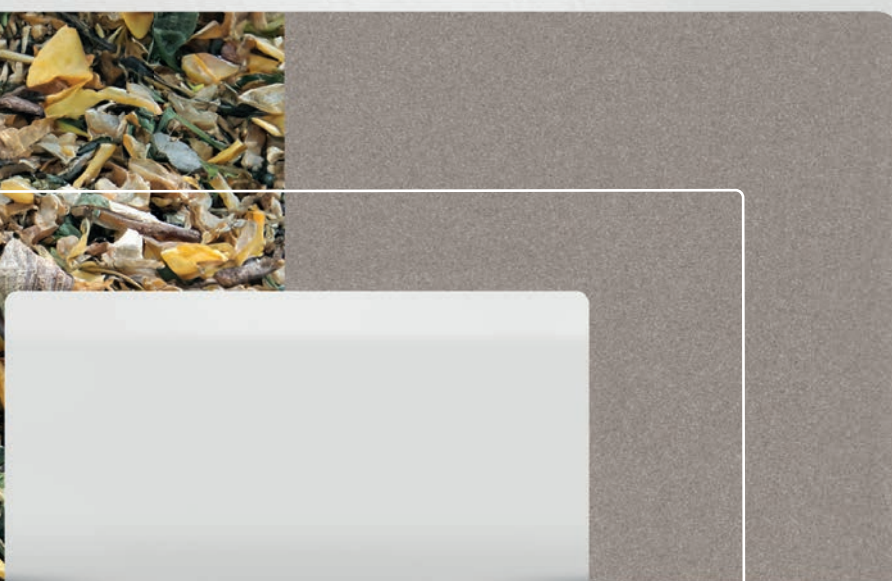

We achieved a stunning mica-like effect using olive stones, resulting in better technical characteristics, and an interesting visual appeal.

Materials

Giving a second life to waste

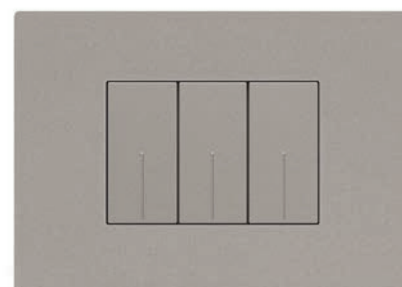

Stone

Composed of

RECYCLED ABS
and water-based
paint from biomass

The plate, made from recycled ABS, is painted with water-based paint formulated using organic raw materials and materials obtained from biomass fermentation.

Responsible Packaging

100% recyclable paper
and cardboard packaging

Plastic free packaging

100% recyclable paper and cardboard.
Box closure: use of ecological glues only.

Print

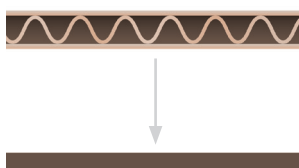

Water-based ink
One color only (black)
Use of a lesser amount of ink

Environmental labelling

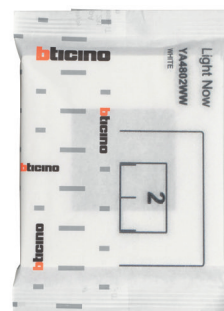

Reduction of weight and volume

Reduction of packaging
weight and volume through
the use of solid cardboard
instead of fluted one for box
interiors, along with smaller
packaging sizes.

Flow pack

100% Paper
100% Recyclable paper
FSC MIX Certificate.

Green Vision

Our commitment to the environment

The entire Light Now project, in continuity with BTicino values, is based on a sustainable approach which concerns procedures, technologies, environmental impact of the product, materials and packaging.

50% recycled and certified material

Light Now uses 50% recycled materials for coverplates and supports from mechanical and chemical recycling. All plastic suppliers are certified by third parties (QA-CER certified and Polycert Europe certified), demonstrating a real and concrete commitment.

Plastic free

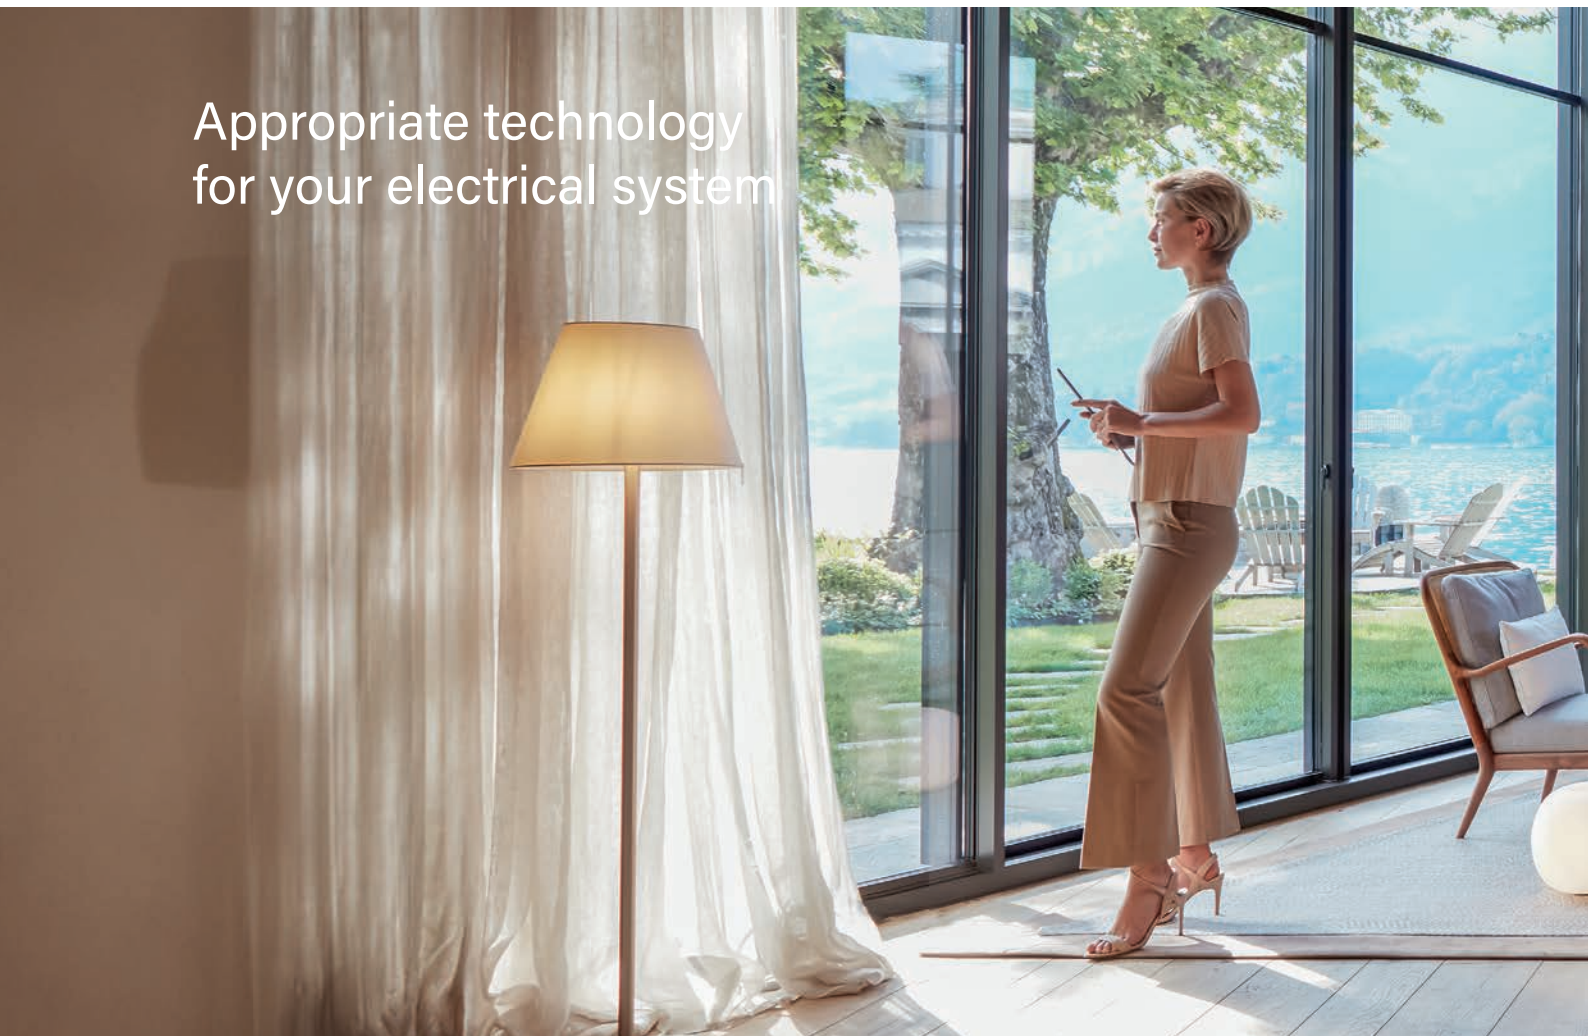

All Light Now product packaging is entirely plastic-free. Additionally, we have optimized weight and volume to the fullest extent possible, significantly minimizing the carbon footprint.

Embracing a sustainable future

Light Now's dedication to sustainability exemplifies BTicino's commitment to a better future. By harnessing solar energy and optimizing all production cycles and processes, BTicino consistently reduces the weight of all product components without compromising quality. This approach underscores our unwavering commitment to eco-sustainability, as the actions we take today shape the world of tomorrow.

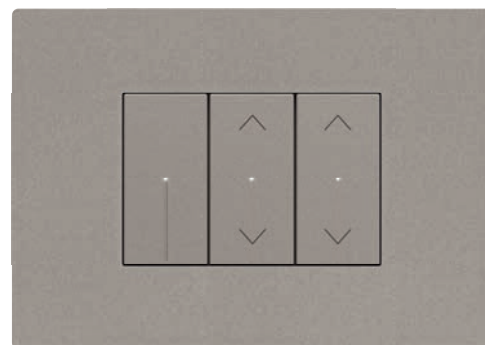

Appropriate technology for your electrical system

Beyond traditional systems

With Light Now, in addition to traditional systems with classic wired devices, you can create Smart Home systems with devices radio connected, with MyHOME BUS technology or BUS with KNX standard. With Light Now you are free to choose the technology for every user need and for every type of building.

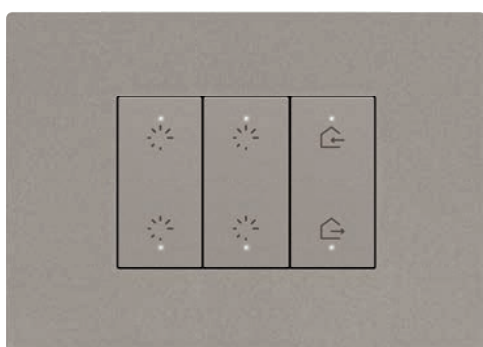

Light Now with Netatmo

Connected controls for the smart home, which communicate via radio. Fast&easy setup and use. Perfect for retrofit.

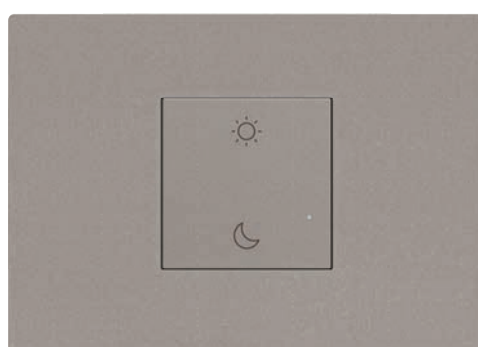

Light Now MyHOME

Connected controls for the home automation, which communicate via SCS BTicino BUS. Perfect for new and big installation. Endless possibilities.

Light Now KNX

Connected controls for the home and building automation, which communicate via KNX standard bus. Perfect for limitless expectations. Open to full integration.

One single App,
many connected advantages

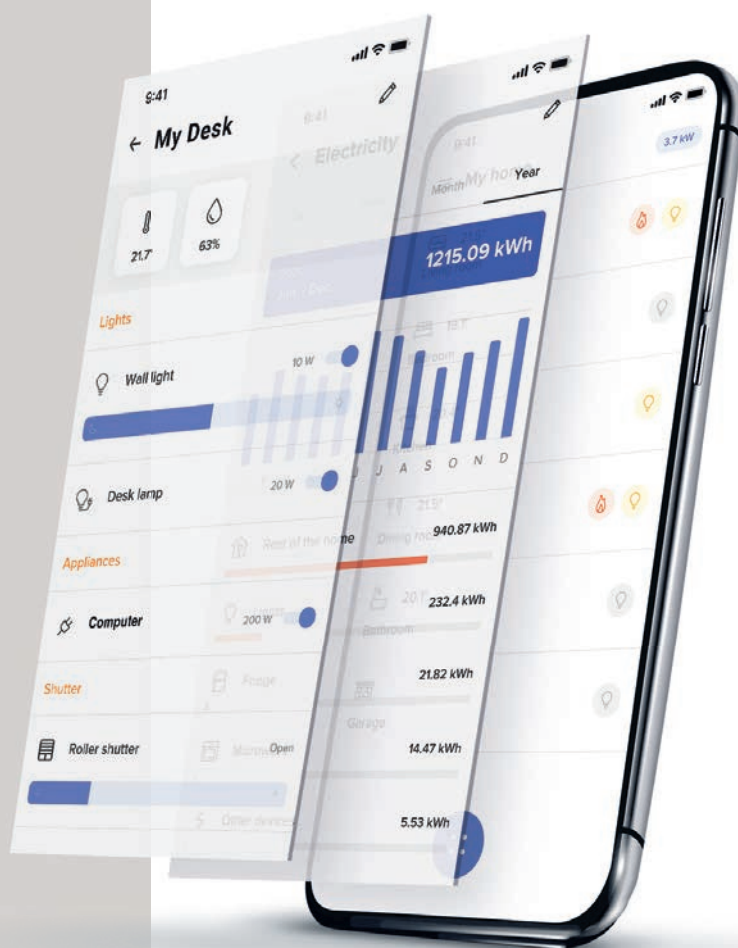

App Home + Control

Manage your home in a simple and intuitive way

Regardless of the technology used to create the Smart Home system, via radio or MyHOME BUS, your Customer will be able to manage all the functions in a simple and intuitive way, both inside and outside the home, using iOS or Android mobile devices and the specific Home + Control app.

What your customer can do:

1. Check the lights, shutters and connected loads dealing with.
2. Manage the temperature in the various rooms of the house based on personalized profiles.
3. Check electricity consumption.
4. Receive notifications about the status of the system and of loads.
5. Avoid disconnection (black-out) of loads in case of excessive absorption.
6. Create and manage custom scenarios as well as enable or disable those pre-set during system installation.

Light management,
roller shutters and scenarios:
everything within reach of your voice
with your favorite voice assistants.

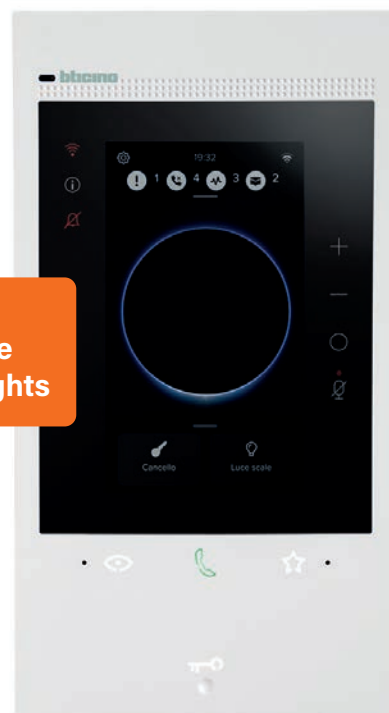

Voice control

Thanks to the integration with voice assistants Amazon, Google and Apple, your Customer will be able to manage the functions of the Smart system by voice and by hand free, regardless of technology used to create the system, via radio or via BUS MyHOME.

If the video door entry system is integrated into the system with the Classe 300EOS with Netatmo internal unit, your customer will also be able to use this device to manage all the functions by voice, thanks to the natively integrated Alexa assistant.

**Alexa,
turn on the
kitchen lights**

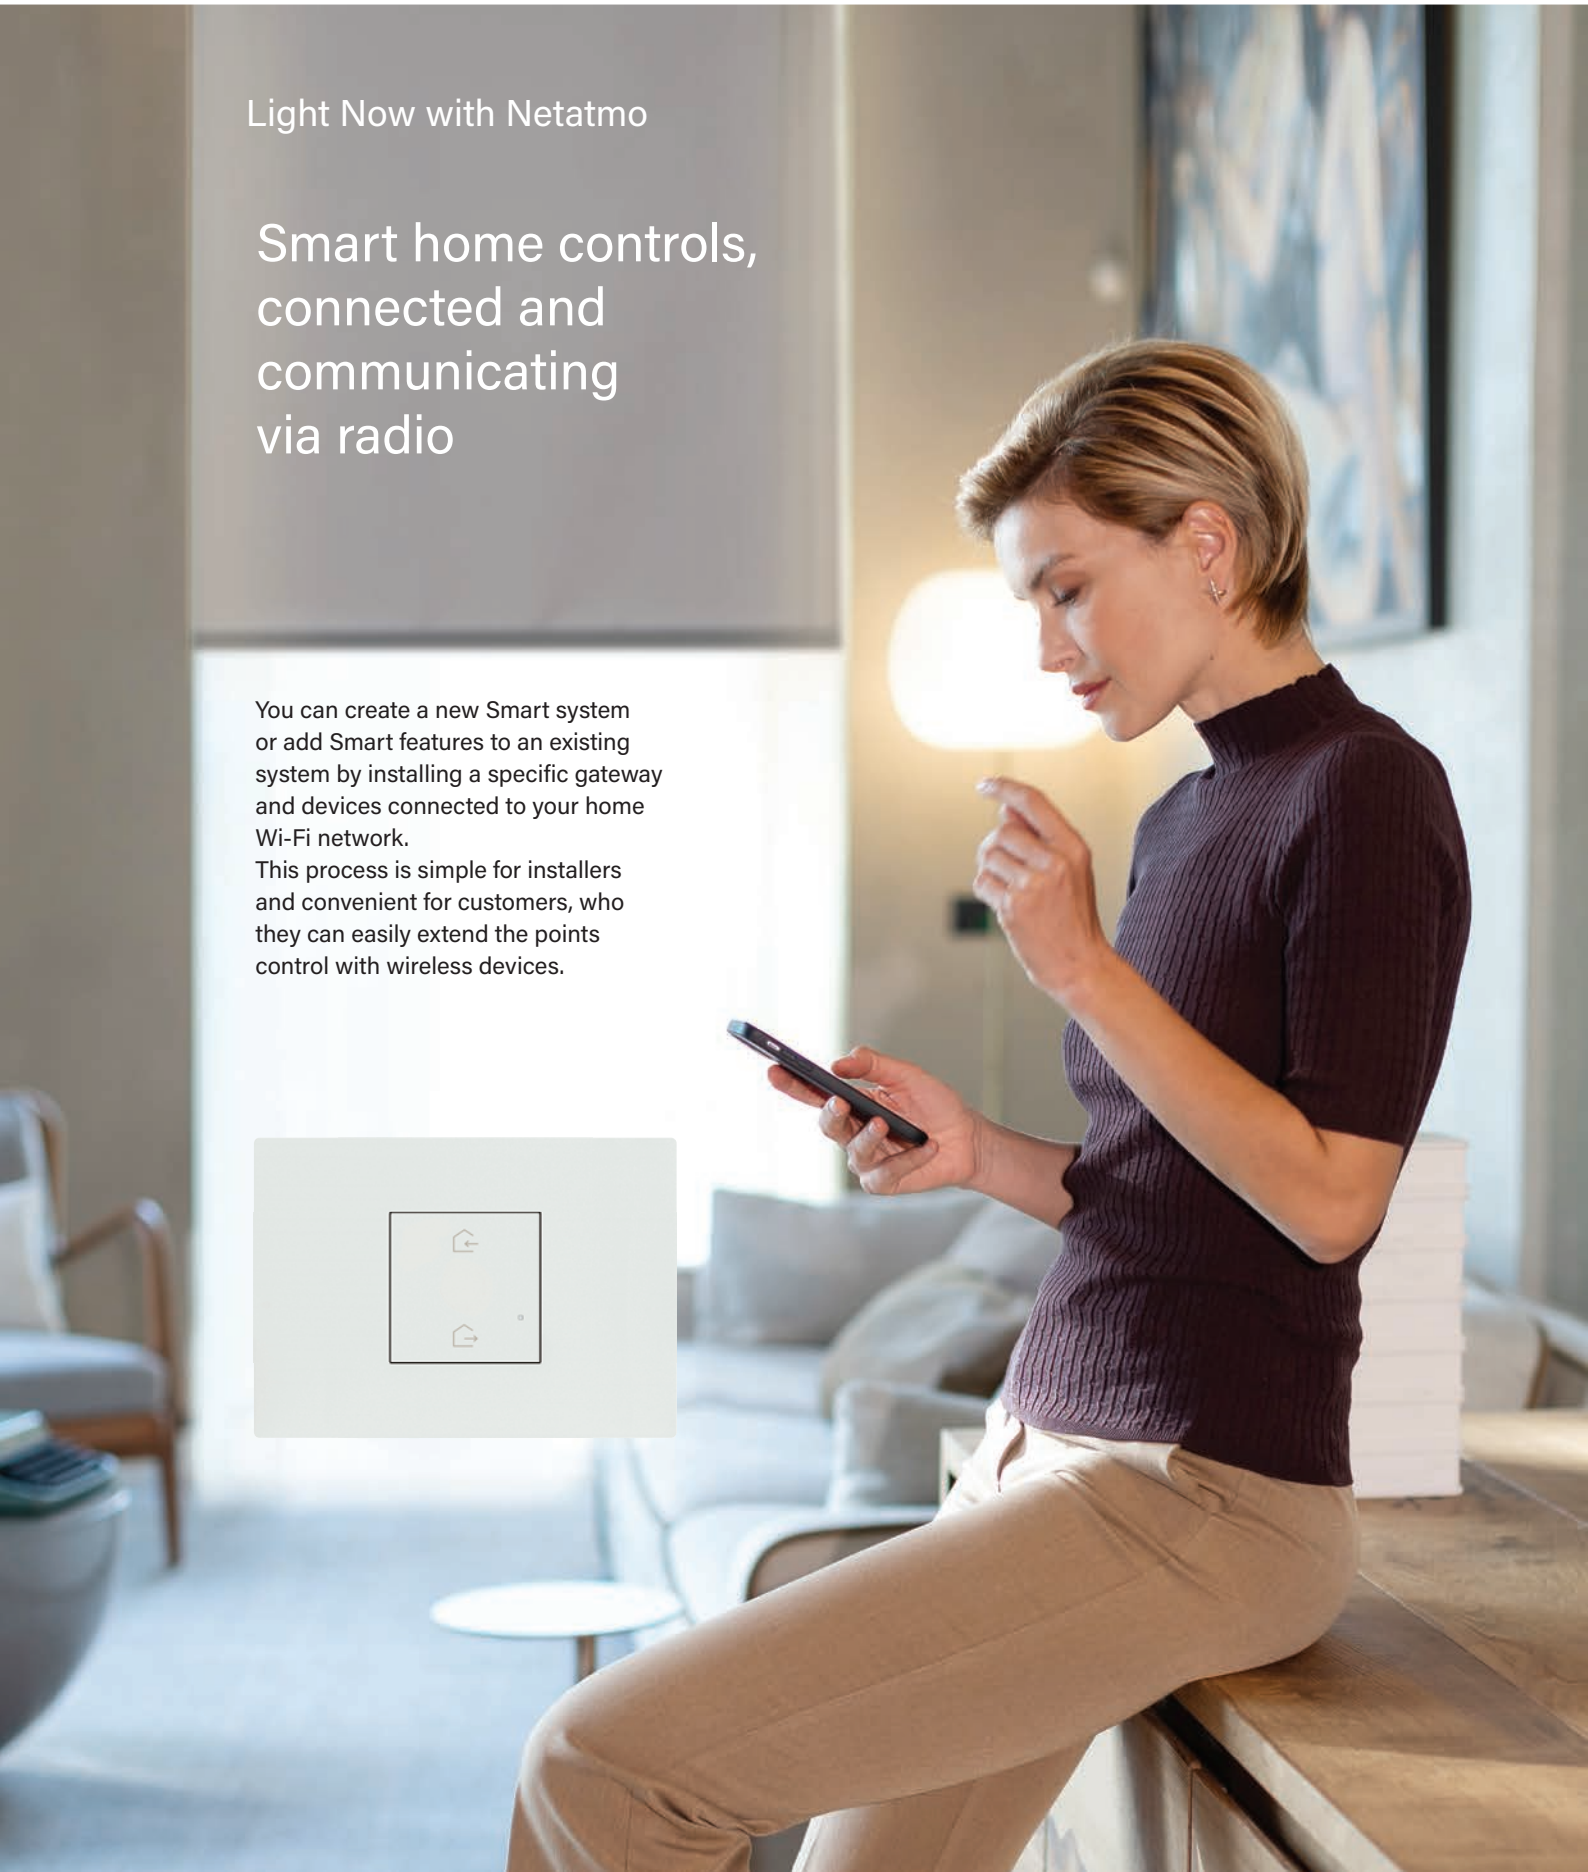

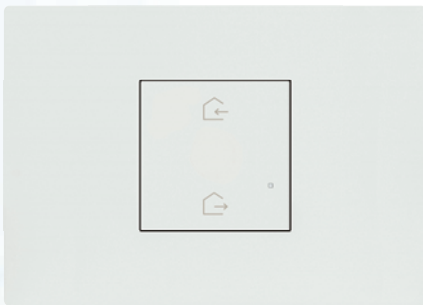

Light Now with Netatmo

Smart home controls, connected and communicating via radio

You can create a new Smart system or add Smart features to an existing system by installing a specific gateway and devices connected to your home Wi-Fi network.

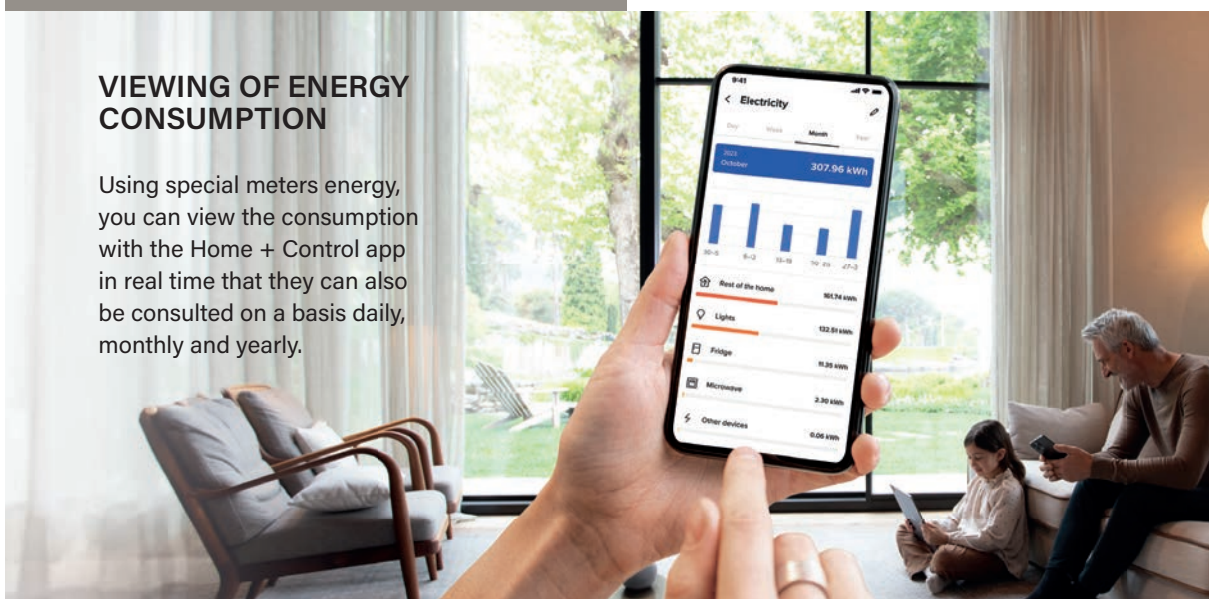

This process is simple for installers and convenient for customers, who they can easily extend the points control with wireless devices.

Energy saving functions

VIEWING OF ENERGY CONSUMPTION

Using special meters energy, you can view the consumption with the Home + Control app in real time that they can also be consulted on a basis daily, monthly and yearly.

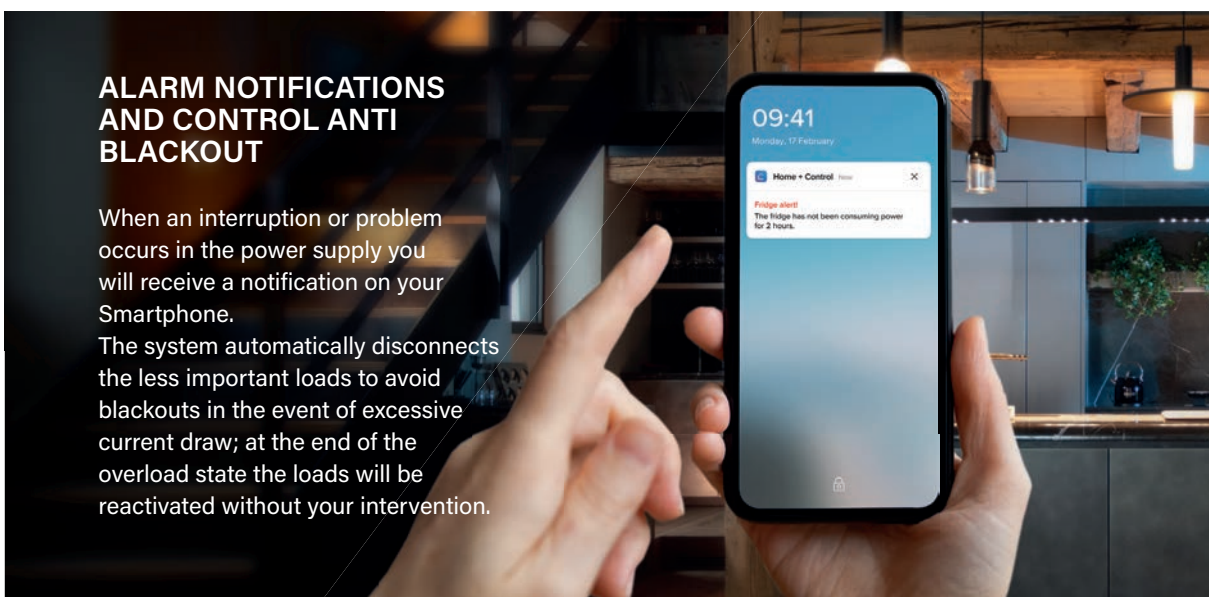

CONTROL OF TEMPERATURE

Control and manage the temperature of your home in a smart way, wherever you are, thanks to integrated wi-fi connectivity, the Home+ Control App and compatibility with voice assistants. You can choose to use the Smarter thermostat for managing the heating or the Smarter AC for cooling the air conditioning with split and fan coil.

ALARM NOTIFICATIONS AND CONTROL ANTI BLACKOUT

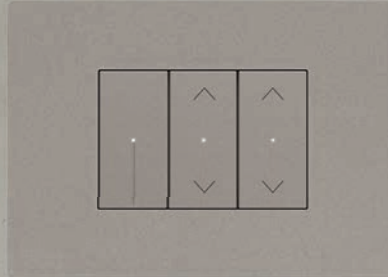

When an interruption or problem occurs in the power supply you will receive a notification on your Smartphone. The system automatically disconnects the less important loads to avoid blackouts in the event of excessive current draw; at the end of the overload state the loads will be reactivated without your intervention.

Light Now with Netatmo - Functions for comfort and safety

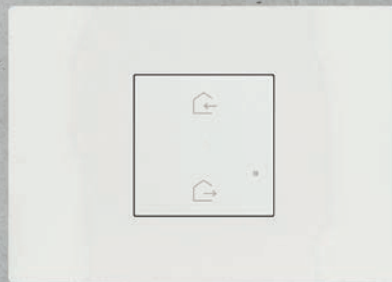

LIGHT AND SHUTTERS CONTROL

Management of standard lamps and colored with ON/OFF and dimmer modes for optimal comfort. Management of the UP/DOWN position of the roller shutter with level control capability and quick recall of the preferred position. Lights, shutters and loads connected to the sockets can also be activated at times and days set by the user via the Home + Control app.

ACTIVATION OF SCENARIOS

One touch activation on the control device or using the Home + Control app, of more lights and shutters and ideal temperature for creating personalized comfort situations by the user. You can also use the pre-setted EXIT scenario to turn off all the lights and lower all the shutters when you leave the house.

INTEGRATION WITH NETATMO SAFETY DEVICES

At the electrical system can be integrate security solutions Netatmo, such as cameras, sensors for doors and windows, smoke detectors etc.; functions will be managed from the dedicated Home + Security app.

SYSTEM EXPANSION WITH WIRELESS DEVICES

The number of control points in the system can be increased using wireless devices that can be installed anywhere by the user and repositioned according to any new needs.

Wireless controls are available in two versions:

battery-powered and no battery; the latter they are particularly suitable in environments where you want to minimize maintenance of the electrical system.

WIRELESS DEVICES FOR OUTDOORS

For applications where greater protection is required from water, dust and external agents, wireless controls are available without batteries and with IP55 protection rating. Control points for turning on the lights or opening of the gate can be added outside the house without the need for wiring.

Light Now MyHOME

Smart home controls connected via SCS BTicino BUS

The MyHOME system offers advanced solutions for the design, configuration and management of advanced SmartHome functions. MyHOME is a customisable, flexible and integrable BUS system to meet the needs of comfort, energy saving and safety through local and remote control, applicable in any residential context, even in large environments (*).

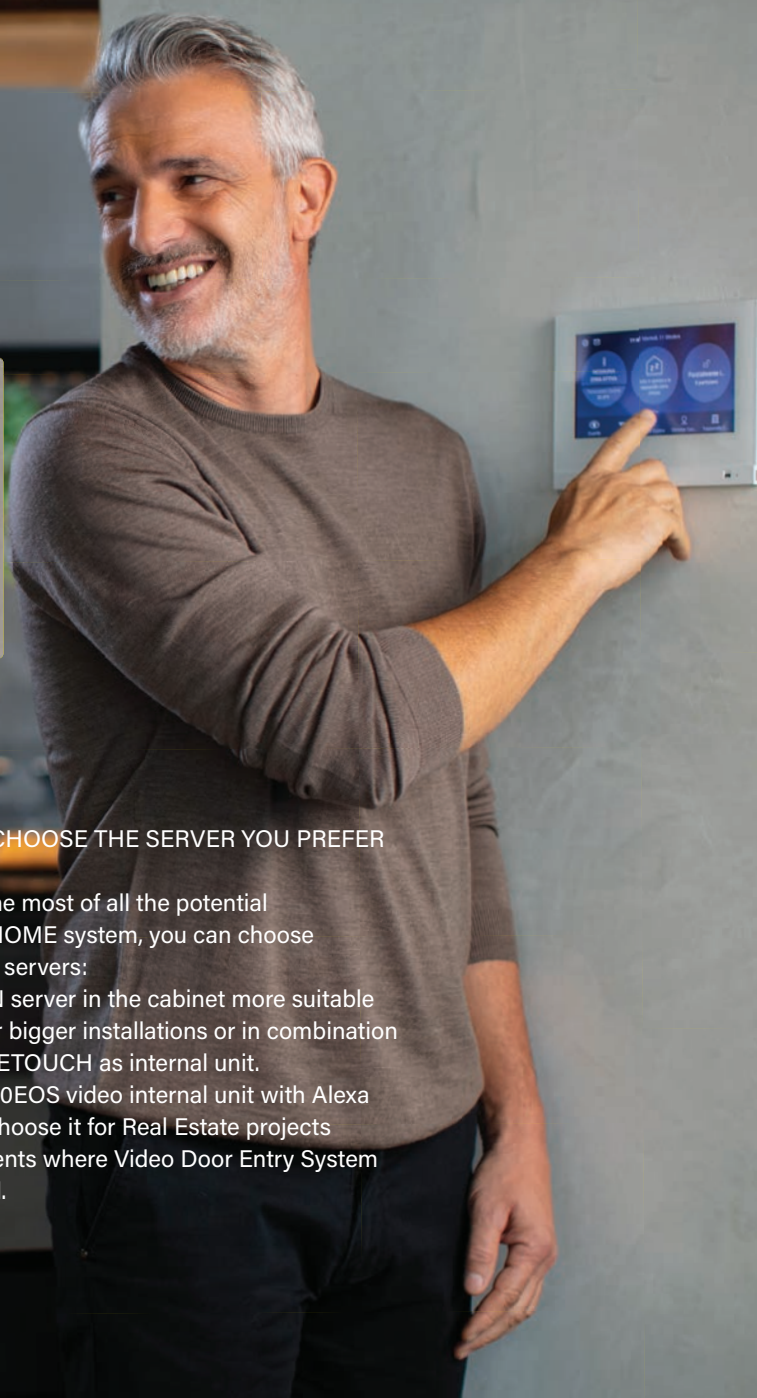

FREE TO CHOOSE THE SERVER YOU PREFER

To make the most of all the potential of the MyHOME system, you can choose between 2 servers:

- F460 DIN server in the cabinet more suitable for villas or bigger installations or in combination with HOMETOUCH as internal unit.
- Classe300EOS video internal unit with Alexa Built-In. Choose it for Real Estate projects or apartments where Video Door Entry System is included.

Note (*): up to 525 addresses.

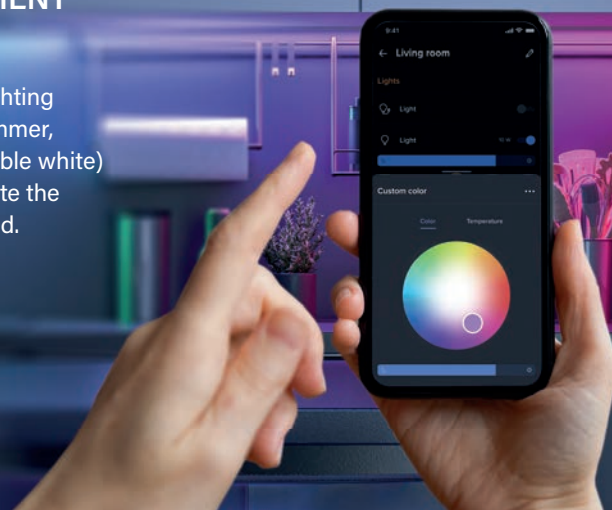

NEW MULTIFUNCTION COMMAND

The control experience is now improved with the management of multiple functions (up to 4 functions on 2 modules) over the same modularity following market trends and the advanced home automation systems. Functions can be combined in different ways and personalized with new dedicated key covers.

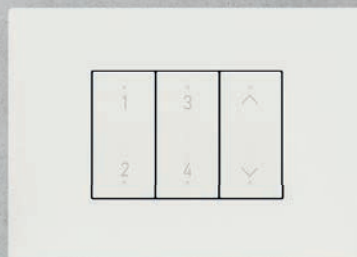

LIGHTING MANAGEMENT

MyHOME is now compatible with Dali2 Protocol for the lighting management of ON/OFF, dimmer, RGB RGBW (colour and tunable white) & fade in-out in order to create the ideal atmosphere for any need.

SCENARIOS MANAGEMENT

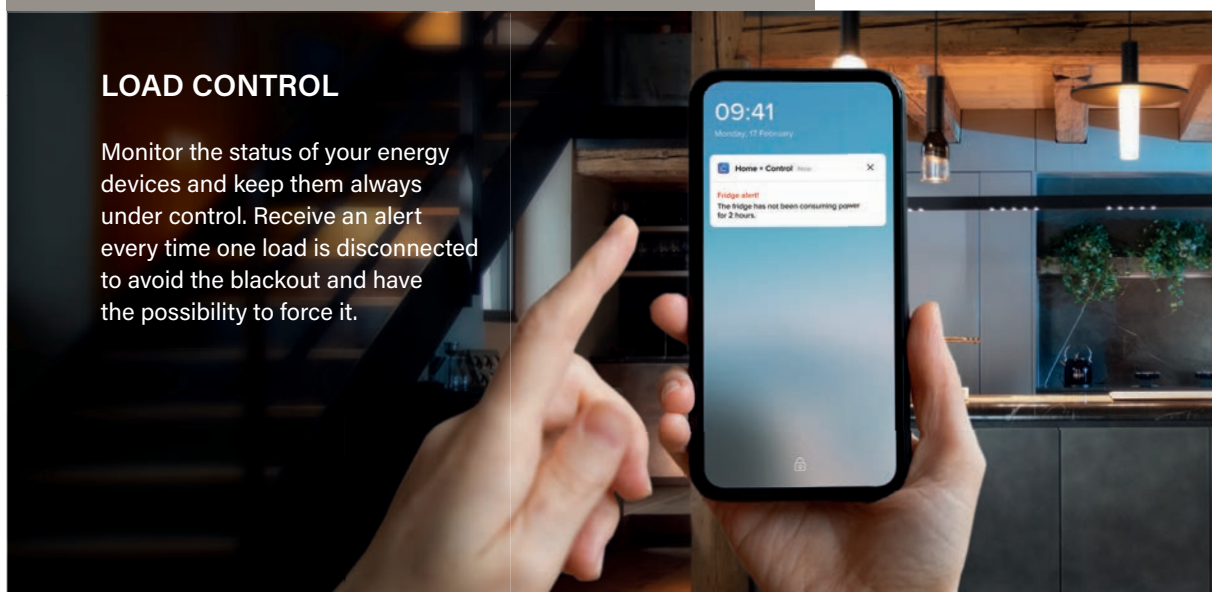

Since MyHOME is able to manage large installations, up to 525 addresses, it is possible to manage scenarios (setting with just one touch of the lights, of the shutters and the temperature) up to 150 in the Home +Project app and up to 100 in the Home + Control app.

Light Now MyHOME - Energy saving functions

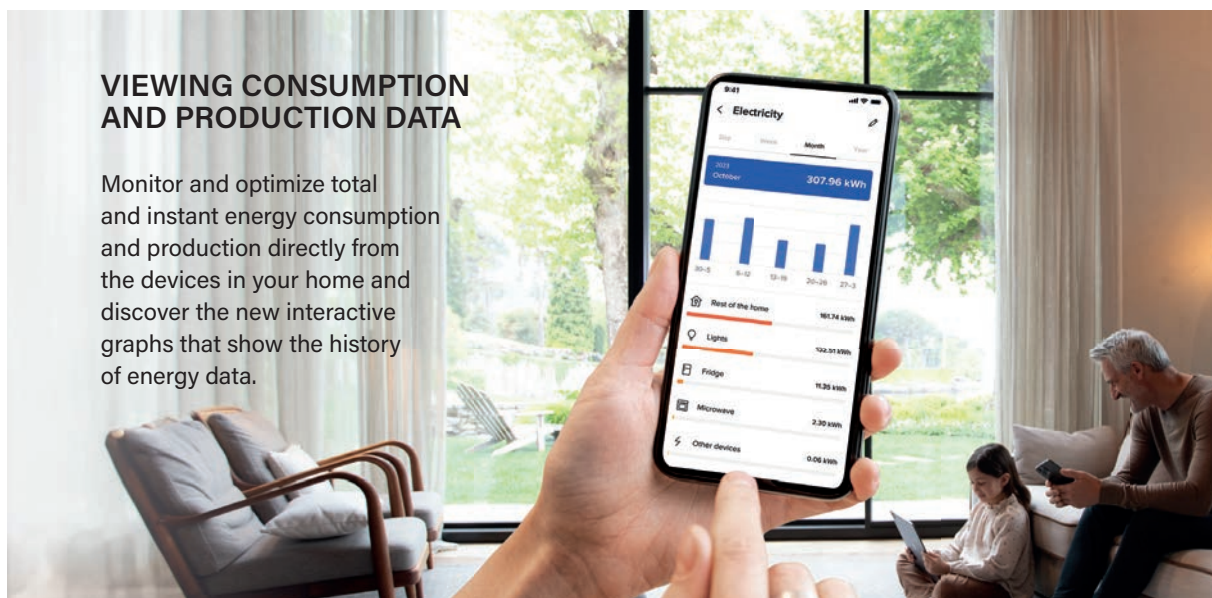

LOAD CONTROL

Monitor the status of your energy devices and keep them always under control. Receive an alert every time one load is disconnected to avoid the blackout and have the possibility to force it.

VIEWING CONSUMPTION AND PRODUCTION DATA

Monitor and optimize total and instant energy consumption and production directly from the devices in your home and discover the new interactive graphs that show the history of energy data.

ZONE TEMPERATURE CONTROL

By installing multiple temperature probes in the rooms of the house it is possible carry out zone control (max. 99) of the temperature for optimize consumption. The profile of ideal temperature is set and customized by the user through the Home + Control app.

App Home + Project

Design and configure the system easily

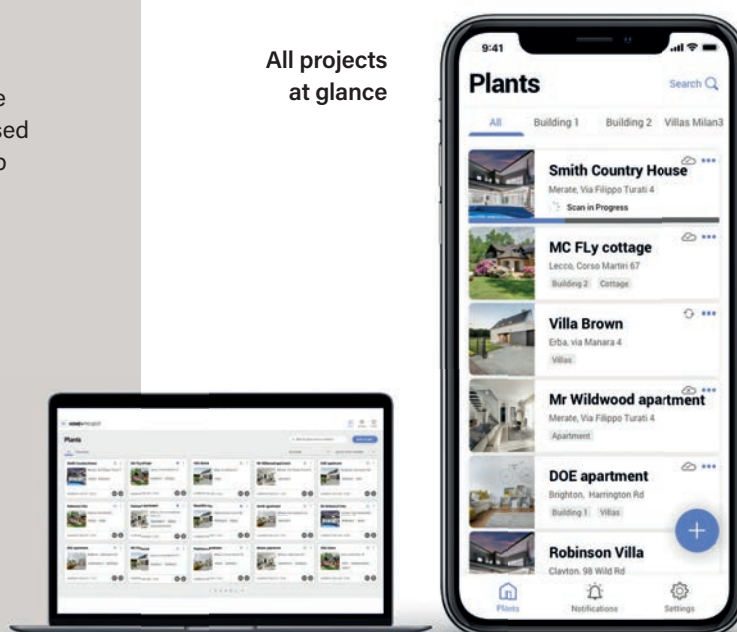

Home + Project is a tool dedicated to the installer, which simplifies the design and configuration process of the MyHOME system, regardless of the server used, item F460 or Classe 300EOS with Netatmo. It is available in 2 versions: a web App version for designing in the office via a desktop, accessible via the site <https://homeproject.legrand.com/> and an App version for iOS and Android Smartphones and Tablets suitable for use on site.

Discover its new features

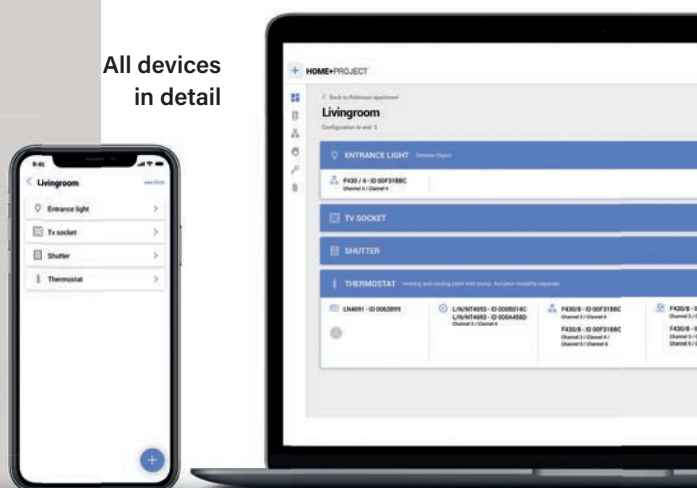

To make the installers' experience even more flexible, discover all the new functions released which simplify configuration, making the app more intuitive and complete:

1. Configuration backup and restore
2. Testing of system functions
3. Export of device addresses
4. System configuration even when the Internet is not available
5. Firmware update of the devices
6. "Identify" test for the recognition of the loads
7. Calibration of the temperature probe
8. Association of several control devices with one actuator
9. Automatic association of controls with actuators
10. Even more stable connection to the system
11. Compatibility with Tablet devices
12. Replacement of a device without reconfiguring the system

All projects at glance

All devices in detail

Light Now KNX

Connected controls
for the Home and
Building automation,
which communicate
via KNX standard BUS.

Dress KNX systems with Light Now aesthetics.

The Light Now range of devices is completed with a KNX certified multifunction control device that guarantees interoperability both between the KNX products of the BTicino offer and the products of different manufacturers. It will thus be possible to create advanced solutions for the intelligent management of comfort and energy saving functions in hotels, hospitals, tertiary and residential environments.

MULTIFUNCTION CONTROL

Advanced device to be combined with the relevant key covers equipped with graphics, to manage up to 4 functions different configurable with the ETS software and editable at any time.

BUS

Light Now KNX - Functions

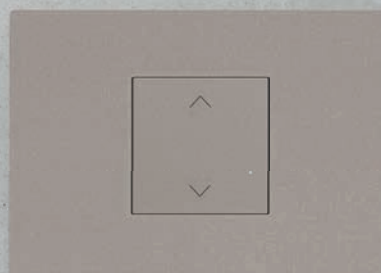

LIGHT CONTROL

Management of standard lamps and colored with ON/OFF mode and dimmer for optimal comfort.

SHUTTERS MANAGEMENT

Control of the position UP/DOWN with memorization of favourite position.

MANAGEMENT OF SCENARIOS

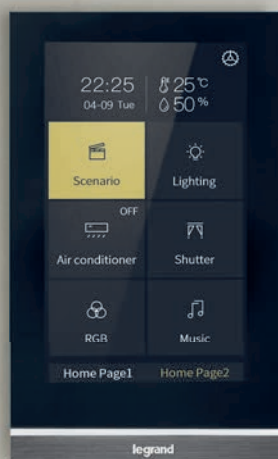

Setting with just one touch of the lights, of the shutters and temperature to create comfort situations or prepare the environment for when it's not busy.

Light Now KNX - Devices

TOUCH SCREEN

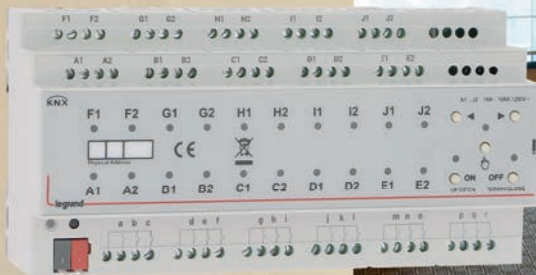

Devices available with 4" and 5" screen, equipped with a temperature and proximity sensor for centralized management of all functions via dedicated pages.

CONTROLLER

Multi-purpose devices for management of:

- Lighting with ON/OFF or dimmer mode
- Motorized shutters and doors
- Devices HVAC thermoregulation

PRESENCE SENSORS

Apart from simple ON/OFF and dimming controls, sensors provide access to the advanced automation functions required in any "green" building: stand-by/maintained dimming, programmed lighting maintenance as well as scenario triggering dependent on presence/absence, natural light levels or time.

FULL INTEROPERABILITY WITH ALL THIRD PARTY APPLICATIONS AND SYSTEMS

Beyond providing optimum control of lighting, shutters, temperature and socket outlets, the KNX protocol is interoperable with all applications installed: you are free to complete your project with other products (heating and ventilation, fire alarms, emergency lighting, etc.) or software leveraging the KNX standard, whoever supplies them!

BTicino KNX solutions can therefore be integrated into an active general building management system, making it possible to display consumption or to be alerted when a fault occurs!

Lighting

A high-quality installation

LIGHTING FRAME

A led can be added to the frame to create an elegant light in the ambient, and to provide discreet guide lighting to improve living in the spaces.

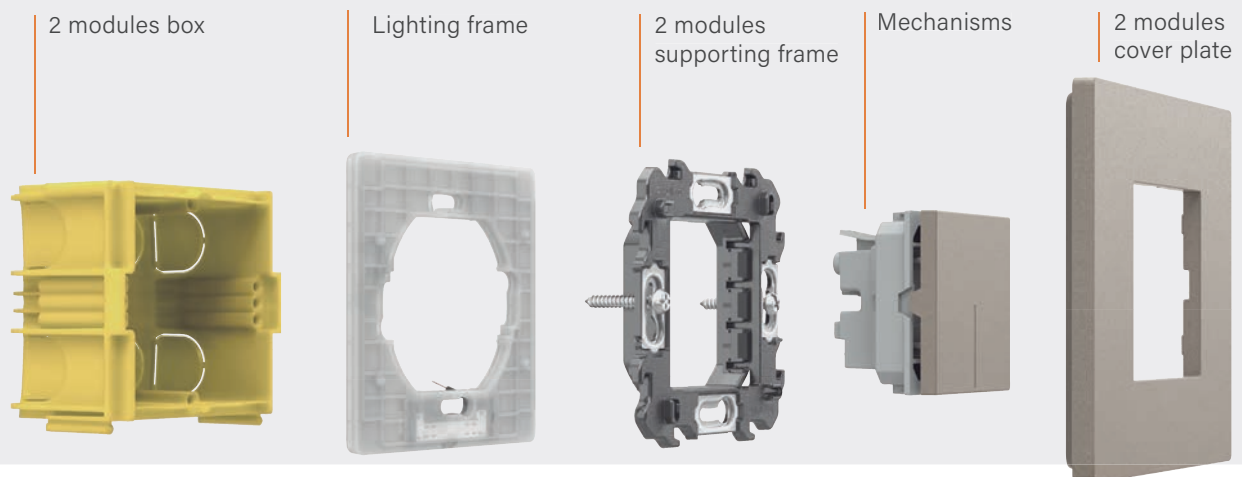

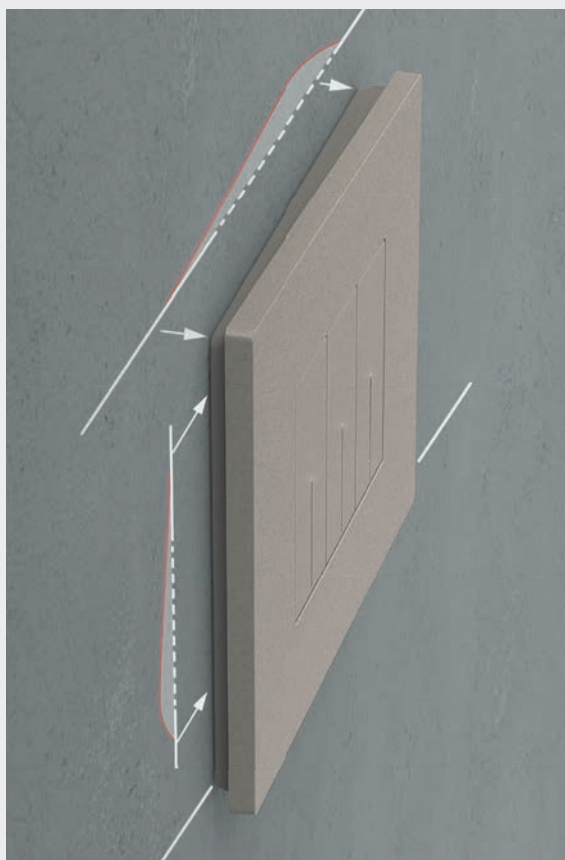

Example of use in the hallway or entrance hall

Cases of use

- **Hallway or Entrance:** installed at skirting board height, it turns on when it's dark (e.g., manually via a switch or automatically using a twilight sensor) to assist the movement of people living there.
- **Internal Staircases:** installed at skirting board height, it automatically turns on via a motion sensor when people pass by, facilitating movement in the dark.
- **Children's Bedroom:** Installed at skirting board height and/or light switch height, it turns on when it's dark (e.g., manually via a switch or automatically using a twilight sensor), providing a "courtesy light" in the room.
- **Terrace:** installed at the switch point for terrace light lights up to highlight the status of the terrace light (on/off)

Lighting frame installation

FLOATING FRAME

It's the flexible frame at the back of cover plate that assures perfect alignment and fitting in any condition.

The floating frame gives the possibility of:

- 1) hiding wall defects;
- 2) hiding any irregularity in flush mounted boxes positioning;
- 3) hiding the external collars of plasterboard boxes.

AUTOMATIC TERMINALS

Fast: just a few seconds required for wiring the device.

Simplicity: no special wiring tools required.

Reliable and Resistant: cable connection strength guaranteed across the time

Flexibility: possibility of using cables of different sections.

BETTER PROTECTION

The support has a protective shell, which can be used to protect supports and mechanisms from possible damage during decorating activities, for example when painting the walls.

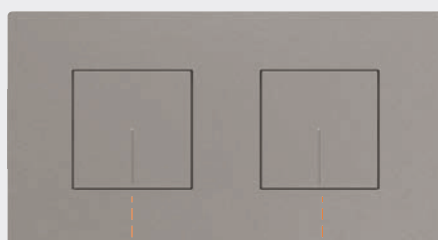

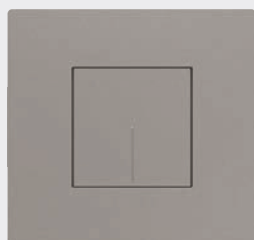

STRONGER SUPPORT

Up to 4 times stronger than the current version, thanks to the new geometry and high performance materials.

IR switches

Switch with passive infrared ray movement sensor, suitable for all types of load including LED lamps - 3 wires – variable-threshold twilight circuit with possibility of exclusion – timing circuit to delay switching off adjustable from 30 seconds to 10 minutes - 230 V~ power supply - 1 module

Switch with passive infrared ray movement sensor, suitable for all types of load including LED lamps - 2 wires – variable-threshold twilight circuit with possibility of exclusion – timing circuit to delay switching off adjustable from 5 seconds to 10 minutes - 230 V~ power supply - Standby consumption < 0,01W. Detection field 170°.

Detection range 8m.

Light level threshold setting from 5 to 1275 lux. 4 levels of sensitivity setting.

Accepted power by lamp type :

- LEDs, CFLs : 2 to 100W LED
- Halogens, incandescent : 2 to 150W
- LEDs, CFLs, Halogen, fluo tube with ferromagnetic or electronic transformer: 2 to 150VA. If several sensors are installed on the same circuit, the minimum load changes: refer to the technical sheet. Possibility to install up to 3 sensors in parallel. - 2 modules.

Switch with passive infrared ray movement sensor, suitable for all types of load including LED lamps - 2 wires – variable-threshold twilight circuit with possibility of exclusion – timing circuit to delay switching off adjustable from 5 seconds to 10 minutes - 230 V~ power supply - Standby consumption < 0,01W. Provided with a selector switch to change the operating mode (ON-AUTO-OFF)

Detection field 170°

Detection range 8m

Light level threshold setting from 5 to 1275 lux. 4 levels of sensitivity setting.

Accepted power by lamp type :

| Item | Lighting |
|---|---|
| <input type="checkbox"/> YW4362 <input checked="" type="checkbox"/> YG4362 <input checked="" type="checkbox"/> YD4362 | Reading lamp dimmable - installing the head of the bed allowing you to have a directional light. It is equipped with a flexible arm (length 31 cm) that allows you to orient the illuminating ends. The light intensity can be dimmed by pressing and holding the On / Off integrated command. It can also be connected to a remote control and, if necessary, you can disable the built-in command with a 30 sec pressure - LED light - Consumption 3 W - Luminous Flux 110 lumens (equivalent to 15 W incandescent) - Duration 40.000 hours - 1 module (recessed) |
| <input type="checkbox"/> YW4382 <input checked="" type="checkbox"/> YG4382 <input checked="" type="checkbox"/> YD4382 | Step marker lamps with white light LEDs - 127/230 V~ - on-off switch - 0.15-0.5 W - 2 modules |
| <input type="checkbox"/> YW4382IR <input checked="" type="checkbox"/> YG4382IR <input checked="" type="checkbox"/> YD4382IR | Step marker light + IR sensor, with white light LED and ON-OFF switch - 230 V~ 0,5 W - 2 modules |
| <input type="radio"/> Y4380 | Removable and rechargeable torch with automatic switching on device - it lights up automatically when there is a power cut - push&pull pull-out system complete with recharge base- white light LED with high luminous efficiency - ON/ OFF switch and SPOT pushbutton to increase the brightness when necessary - interchangeable Ni-MH batteries without "memory" effect - 2 hour life - low consumption in stand-by 0.4 W - 230 V~ power supply - 2 modules |
| <input type="radio"/> Y4380NB | Spare battery for removable led lamp |
| <input type="radio"/> Y4381 | LED safety lamp with automatic operation when there is a power cut. 230 V~ 50/60 Hz - power consumption 2.5 VA (0.1 W) - rechargeable non-replaceable NiMH 3.6 V 140 mAh battery - complete charge in 48 hours - life 2 hours - maximum cable section 1 x 1.5 mm ² - light intensity 2400 mcd - angle of emission 120° - not pull-out - 1 module |
| <input type="radio"/> J4383 | Emergency LED light with automatic activation in case of power cut. LED voltage presence signaling. Rechargeable and replaceable Lithium LiFePO4 3,2 V 1,5 Ah battery. Preset autonomy of 1 hour (98 lumen) can be set to 3 hours (70 lumens) via special jumper. Complete charge in 24 hours. Power supply 230 V~, power consumption 1.8 W - monoblock stand alone - 3 modules |

Bulkhead light indicator for off-door signalling and lamp holders. One product for four different colours.

Example with lamp holder item Y4370V230 or item Y4370V12

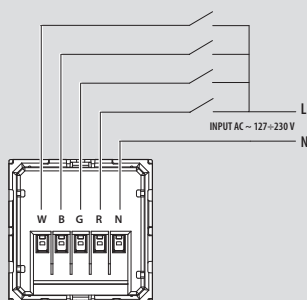

Choose the product according to the operating voltage and set it with the light colour you need.

Wiring diagram

Y4370V230 and Y4387V230

Note: for 12/24 V powered versions use a suitable transformer

YW4500C

| Item | Gateway |
|--|--|
| <input type="checkbox"/> YW4500C <input type="checkbox"/> YG4500C <input type="checkbox"/> YD4500C | Gateway for remote home control (lights, sockets and shutters) using a smartphone (HOME + CONTROL APP required) and/or voice controls (voice assistance required). Supplied with wireless master IN&OUT scenario control, required for the association of all connected devices. Power supply 100-240 V~ - 2 modules |
| <input type="checkbox"/> YW4510C <input type="checkbox"/> YG4510C <input type="checkbox"/> YD4510C | Gateway as above. Supplied with the flushmounted Home/Away wireless master switch 1 module required for the association procedure of all connected devices. Power supply 110-230 V~ - 2 modules |
| <input type="radio"/> FC80GT | Gateway as above for DIN switchboard. Supplied without wireless In&Out master scenario control item YW/YG/YD4570CW - 2.5 DIN modules |

| Item | Gateway with socket |
|--|---|
| <input type="checkbox"/> YW4501C <input type="checkbox"/> YG4501C <input type="checkbox"/> YD4501C | The gateway creates a connected installation in the home. It can be used to control lights, shutters, and electric appliances plugged into connected sockets:- using the smartphone and the Home + Control app- using the voice assistants- from the general control at the home entrance. It integrates a 2P+E 16 A 250 V~ German standard connected socket for the remote control of electric devices and to monitor their consumption (instantaneous, daily, monthly). Compatible with all the electric devices with power up to 16 A 3680W (with overload protection). It can be installed instead of an existing socket in a 40 mm deep box. Screw fixing and connection using automatic clamps. It has a blue LED that lights up when the socket is ON and that can be configured by means of the Home + Control APP. It can be associated to one or more wireless light controls. It is also supplied with wireless master IN&OUT scenario control, required for the association of all connected devices. Power supply 110-230 V~ |
| <input type="checkbox"/> YW4502C <input type="checkbox"/> YG4502C <input type="checkbox"/> YD4502C | Gateway as above. It integrates a 2P+E 16 A 250 V~ French/ belgian standard connected socket. |

Note: for the use of the connected devices, the gateway must be installed as part of the system.

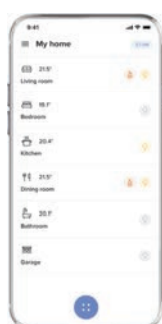

If the gateway is connected to the internet through the Wi-Fi network, it will be possible to manage the system from the home using the specific **HOME + CONTROL App and the vocal commands Google, Alexa and Siri.**

And if the internet does not work?

The devices continue to operate with manual control. The Home+Control app cannot be used.

wired devices for light

| Item | Connected 1-way switches |
|--|---|
| <input type="checkbox"/> YW4001C <input checked="" type="checkbox"/> YG4001C <input checked="" type="checkbox"/> YD4001C |  <p>Connected 1-way switch. It controls the lights locally or remotely. It can be installed like a traditional two-way switch and is compatible with all loads with max. power 250 W. It has a blue LED, which can be configured using the Home + Control App for the localisation and load status functions. It can be associated to one or more wireless controls. Caution: neutral connection is necessary. Power supply 110-230 V~ - 1 module</p> |
| Item | Connected 2-way switches |
| <input type="checkbox"/> YW4003C <input checked="" type="checkbox"/> YG4003C <input checked="" type="checkbox"/> YD4003C |  <p>Connected 2-ways switch. It allows to control lights locally or remotely. The connected 2-ways switch has the same installation and usability of a traditional 2-ways switch and it is compatible with all loads with max power 250 W. It is equipped with a blue LED light used always on for localization modality or on, when the light is on for the load status modality. It can be associated with "wireless light switches". Caution: Must be connected to the neutral Power supply 110-230 V~ - 1 module</p> |
| Item | Connected lighting micromodule |
| <input checked="" type="radio"/> 3584C |  <p>Connected lighting micromodule. It allows to control lights locally or remotely. It is compatible with all loads with max power 300 W. It can be connected to one or more traditional push-button or associated with "wireless light switches". It is installed as a traditional relet in the box (behind the button) or in derivation boxes. Caution: Must be connected to the neutral. Power supply 110-230 V~</p> |
| Item | DIN smart relay for light control |
| <input checked="" type="radio"/> FC80RC |  <p>DIN smart relay for light control with maximum absorption $I_n = 16$ A. Equipped with contacts for control with remote buttons, up to a maximum of 10. The smart relay allows the lights to be controlled locally and remotely through radio commands, wired buttons, smartphone with the "Home + Control" App or via a voice assistant. Dimensions 1 DIN module. Power supply 110-230 V~ 50/60 Hz.</p> |

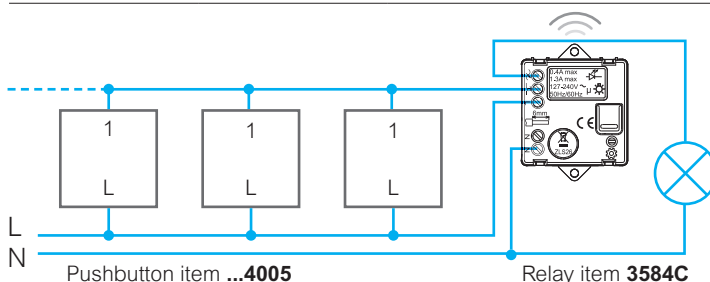

| Item | Connected dimmers |
|--|---|
| <input type="checkbox"/> YW4411C <input checked="" type="checkbox"/> YG4411C <input checked="" type="checkbox"/> YD4411C |  <p>Dimmer/switch. It allows to control lights locally or remotely, with the dimmer functionality that can be activated from the APP Home+Control. It has the same installation and usability of a traditional switch and it is compatible with all loads (LED, halogen) with max power 150 W at 230 V (or 75 W at 110 V). It is equipped with a blue LED light used for localization modality or load status modality, configurable by APP. It can be connected to one or more traditional push-button or associated with "wireless light switches". Caution: Must be connected to the neutral. Power supply 110-230 V~ - 1 module</p> |
| <input type="checkbox"/> YW4412CM2 <input checked="" type="checkbox"/> YG4412CM2 <input checked="" type="checkbox"/> YD4412CM2 |  <p>Dimmer/switch. It allows to control lights locally or remotely, with the dimmer functionality that can be activated from the APP Home+Control. It has the same installation and usability of a traditional switch and it is compatible with all loads (LED, halogen) with max power 150 W at 230 V (or 75 W at 110 V). It is equipped with a blue LED light used for localization modality or load status modality, configurable by APP. It can be connected to one or more traditional push-button or associated with "wireless light switches". Caution: Must be connected to the neutral. Power supply 110-230 V~ - 2 modules.</p> |
| <input type="checkbox"/> YW4413CM2 <input checked="" type="checkbox"/> YG4413CM2 <input checked="" type="checkbox"/> YD4413CM2 |  <p>Dimmer/switch without neutral. It allows to control lights locally or remotely, with the dimmer functionality that can be activated from the APP Home+Control. It has the same installation and usability of a traditional switch and it is compatible with all loads (LED, halogen) with power 5-300 W at 230 V. It is equipped with a blue LED light used for localization modality or load status modality, configurable by APP. It can be connected associated with "wireless light switches". It doesn't require connection to the neutral, it comes with an active compensator. Power supply 110-230 V~ - 2 modules</p> |

Three-point lighting control with connected two-way switch, item ...4003C, installed instead of a traditional two-way switch.

☐ White colour ☒ Stone colour ☒ Dark colour ☐ Neutral item

Three-point lighting control with pushbuttons and connected lighting micromodule, item 3584C, installed instead of a traditional relay.

wired devices for shutter and garage, door and gate

YD4027C

YW4027CM2N

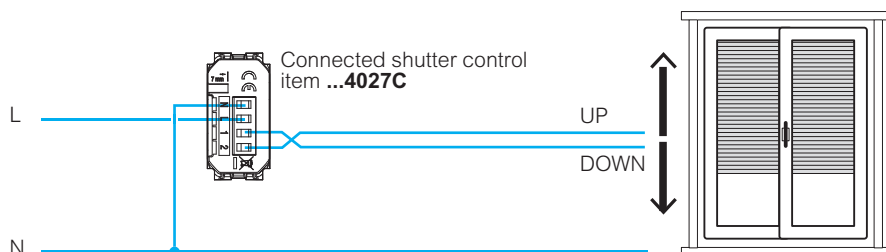

4027C

3586C

| Item | Connected devices for shutters |
|---|--|
| <input type="checkbox"/> YW4027C <input checked="" type="checkbox"/> YG4027C <input checked="" type="checkbox"/> YD4027C | Connected shutter control. It controls a shutter locally or remotely. Compatible with all standard shutter motors (with mechanical or electronic limit switch and maximum power 500 VA), controlled by a wired shutter changeover switch (changeover with the same power supply as the motor). Not compatible with radio controlled or pulse controlled shutter motors. It can be associated to one or more wireless controls. Power supply 100-240 V~ - 1 module |
| <input type="checkbox"/> YW4027CM2N <input checked="" type="checkbox"/> YG4027CM2N <input checked="" type="checkbox"/> YD4027CM2N | Connected shutter control. It controls a shutter locally or remotely. Compatible with all standard shutter motors (with mechanical or electronic limit switch and maximum power 500 VA), controlled by a wired shutter changeover switch (changeover with the same power supply as the motor). Not compatible with radio controlled or pulse controlled shutter motors. It can be associated to one or more wireless controls. Power supply 100-240 V~ - 2 modules |
| ○ 4027C | Connected micromodule for shutters. Associated to one or more shutter wireless controls, it controls a shutter locally or remotely. Compatible with all standard shutter motors (with mechanical or electronic limit switch and maximum power 500 VA), controlled by a wired shutter changeover switch (changeover with the same power supply as the motor). Not compatible with radio controlled or pulse controlled shutter motors. It can be installed in the existing shutter box with no need of masonry works. Power supply 110-230 V~ |

| Item | Connected module for garage, door and gate |
|---------|---|
| ○ 3586C | Enables open/close control of a garage door or gate, locally, remotely or via voice assistant. Status display (open/closed/half open) in the Home + Control App. Can be steered using a wireless shutter control or can be controlled from the remote control art.3528C. Supplied with 2 wired position sensors and specific fixtures. Can be installed into an IP55 box 80 x 80 mm or larger. Fitted with 2 separable fixing points. CAUTION: to operate optimally, the gate engine must be setup in step-by-step mode. In this mode the engine workd with the following cycle: OPEN-STOP-CLOSE-STOP-OPEN- |

For correct operation, connect also the neutral conductor to the connected devices.

connected devices for energy management

| Item | Connected devices for energy management |
|--|---|
| <input type="checkbox"/> YW4531C <input checked="" type="checkbox"/> YG4531C <input checked="" type="checkbox"/> YD4531C |  Connected module for socket. When connected to a power socket, it allows remote control of electric devices and also to monitor their consumption (instantaneous, daily, monthly). It is also possible to receive notifications of abnormal consumption levels. Compatible with any electric devices with power up to 3680W with absorption 16A (with overload protection). It has a blue LED, which can be configured using the HOME + CONTROL APP for the localisation and load status functions. Power supply 100-230 V~ - 1 module. |
| ○ FC80CC |  Smart DIN contactor suitable for controlling single-phase loads < 20 A. The smart contactor allows you to remotely control (ON / OFF) loads such as water heaters, swimming pool pumps, induction plates and charging sockets for electric vehicles, from smartphones with the Home + Control App or via a voice assistant. Equipped with a meter for the current absorbed by the load. Dimensions 1 DIN module. Power supply 100-240 V~ 50/60 Hz. |
| ○ F20T60A |  Smart DIN meter. It allows to measure the electrical energy consumption of the entire single-phase system of the house (instantaneous, daily, monthly) and of the single electrical power lines. It allows the reception of notifications in case of reaching the maximum power foreseen by the contract to avoid annoying black-outs. A toroid is supplied to measure the input current. Power supply 100-240 V~ 1 DIN module. (Only for single-phase systems). |
| ○ F40T125A |  Smart DIN meter as F20T60A but for three-phase systems. |
| ○ FC80GCS |  Connected DIN load management module for the monitoring of the consumptions of the whole electric system, the powering or disconnection of the loads, and the setting of scenarios with priority or non-priority loads. When the maximum intended power is reached, the non-priority loads are temporarily disconnected to avoid black-outs. A toroid for the current reading is provided Power supply 110-230 V~ - 1 DIN module |

| Item | Connected devices for energy management |
|---|---|
| ○ FC80AC |  Smart device for controlling and measuring the consumption of equipment fitted with dry contacts. Rating 12V/30 Vd.c. or 230 V~ 2A max. Ideal for controlling and measuring heating appliances, wallboxes and electric vehicle charging stations, ventilation systems, irrigation systems and any other device with a control dry contact. Not suitable for shutter automation. A toroid is supplied, for the measurement of the current absorbed by the load, max 80 A. Function management through the Home + Control App, compatible with load management module FC80GCS. 1 DIN module. 100-240 V~ power supply 50/60 Hz. |
| ○ 4141PC | Connected PLUG & PLAY socket  Connected plug&play socket - Directly connected to an existing socket, it allows remote control of all the connected electrical appliances. It also monitors the instantaneous, daily and monthly consumption. Compatible with all the devices with power up to 16 A 3680 W (with overload protection). It can be associated to wireless light controls. Power supply 110-230 V~ - white Shuko standard socket |
| <input type="checkbox"/> YW4141AC <input checked="" type="checkbox"/> YG4141AC <input checked="" type="checkbox"/> YD4141AC | Connected socket  2P+E 16 A 250 V~ German standard connected socket. It allows remote control of electric devices and also to monitor their consumption (instantaneous, daily, monthly). It is also possible to receive notifications that can be configured. Compatible with all the electric devices with power up to 16 A 3680W (with overload protection). Integrated with a 2-module support, it can be installed instead of an existing socket in a 40 mm deep box. Screw fixing and connection using automatic clamps It has a blue LED that lights up when the socket is ON and that can be configured by means of the Home + Control APP. It can be associated to one or more wireless light controls. Power supply 110-230 V~ - 2 modules |

The Smarter with Netatmo connected thermostat, together with the dedicated HOME+CONTROL APP, is a device which allows you to adjust and monitor the temperature in the rooms precisely and accurately; all the programming and most of the functions are performed simply and intuitively using the APP. Thanks to its Wi-Fi connection, Smarter with Netatmo can be programmed and controlled remotely; it can also display the temperature and humidity measured in the room. The temperature level can be set locally for manual operation and the Boost mode can be activated. The Boost forces the switching on of the system for a limited time (30, 60 or 90 minutes) independent of the measured and programmed temperature. It's also possible to set a different temperature in each room of the house for the maximum comfort, thanks to its compatibility with Netatmo's smart radiator valves. Smarter with Netatmo can also be controlled with Google, Amazon Alexa and Apple Home Kit voice assistants.

Features:

- 110 ÷ 230 V~, 50/60 Hz power supply;
- 2 W max absorption;
- maximum cable section 1 x 1.5 mm²;
- temperature measurement 5 ÷ 40 °C;
- temperature set-point 5 ÷ 40 °C,
- increase of 0.5 °C;
- 1-contact output in switching free of potential 5(2) A.
- Radio link: short range communication, frequency 868MHz/915MHz, transmission power < 25mW e.r.p. (*).

Types of installation:

- flush mounted, on boxes item 503E or 500 (for item 500 use the wall dowels)
- plasterboard, on boxes 2 module e 3 module

It is available in three colours: white (XW8002), sand (XM8002) and black (XG8002).

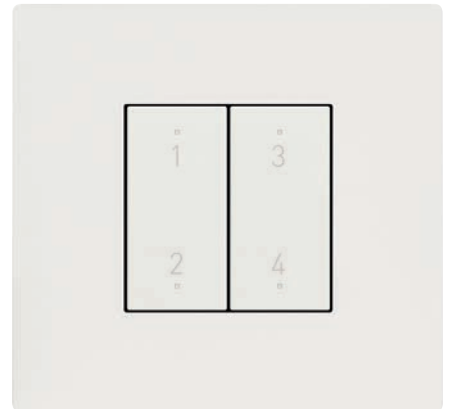

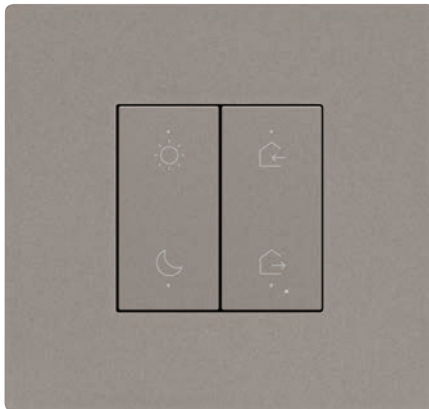

```
features: as ..8002.
```

Installation: on the wall, using screws and dowels suitable for the installation surface (brickwork, plasterboard, tiles etc.). It is only available in white.

Note(*): 868MHz/915MHz radio link not available in Malaysia, China, Japan, Singapore and Taiwan.

CLASSE 300EOS with Netatmo connected video internal unit

2 wires/Wi-Fi handsfree connected video internal unit with built-in Amazon Alexa voice assistant, 5" vertical touch screen LCD display and video door entry answering machine. It has a physical key for door lock release and capacitive keys for the control of the main video door entry functions: handsfree communication, entrance panel activation / camera scrolling and Favourite key (can be configured to activate the quick actions most frequently used – e.g. additional door locks, staircase light control, intercom). There are notification LEDs for: Wi-Fi network connection status, info / notifications and call exclusion. It is possible to easily interact with the built-in Alexa voice assistant, either using the dedicated capacitive keys or with your voice, and activate several functions, such as the video door entry functions, Smart Home, scenarios, reminders etc. Using the touch display, it is possible to access the notification list, as well as your favourite door entry, security and Smart Home controls (if any). The device must be configured by physically connecting the configurators or using the menu, which will give better possibilities of customisation of associated functions and texts. Thanks to the Wi-Fi connection, you can associate the video internal unit to the Home + Security App (available for Android and iOS). The App allows to use the main video internal unit functions (receiving calls, door lock release, display of the event timeline and activation of the entrance panel/camera cycling). Through the Home + Security App, it is also possible to manage the products of the Netatmo security range (outdoor and indoor cameras, door and window sensors, indoor siren and smoke detector). This allows you to quickly and easily create a Smart security system. The device also allows to create and manage Smart Home functions using the wired SCS BUS solution, without the need for adding dedicated webserver. Wall mounted installation using the supplied bracket Possibility of Wi-Fi connection or using RJ45 ethernet cable with the dedicated accessory 344844.

As above - black

Ethernet accessory

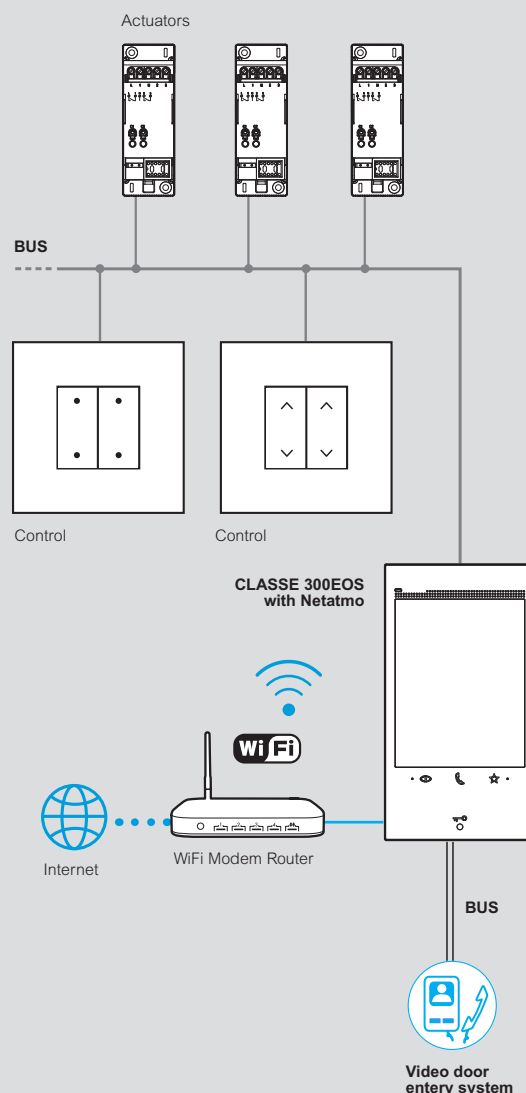

Accessory cable for wired connection of Classe 300EOS with Netatmo video internal unit via RJ45 Ethernet cable. To be purchased separately.

2 DIN Additional power supply

Additional power supply to be used to supply entrance panels and internal units locally. 2 DIN modular enclosure. Power supply 230 V~ at 50-60 Hz. The output provides 27 Vdc continuous low voltage, with maximum current of 600 mA and it is protected on the PRI side (with fuse) against overload and short circuit. It is a SELV double insulation safety device.

| Item | Control devices | Item | Actuator/control for lights and generic loads |
|-----------|---|------------|--|
| ○ Y4652M2 |  Based on the selected configuration, the device can manage up to: - 4 lights ON/OFF functions and adjustment of a dimmer load - 2 Shutter UP/DOWN and advanced functions - 4 Scenarios and load & force control - VDE control call to the floor, staircase light switching on and door lock activation functions. 2 modules to be equipped with 1 or 2 modules key covers, support frames and plates. | ○ Y4672M2L |  Actuator/control with 2 independent relays for single or double loads: the device can be also configured to manage a remote actuator with the same functions of the Y4652M2 controls - 2 modules. To be completed with 1 or 2 modules key covers, support frames and plates. |
| ○ Y4652M3 |  Based on the selected configuration, the device can manage up to: - 6 lights ON/OFF functions and adjustment of a dimmer load - 3 Shutter UP/DOWN and advanced functions - 6 Scenarios and load & force control - VDE control call to the floor, staircase light switching on and door lock activation functions. 3 modules to be equipped with 1 or 2 modules key covers, support frames and plates. | ○ Y4672M2S |  Shutter actuator with relay 2 A 250 VA. In addition to the monostable and bistable UP/DOWN function, the actuator also places the rolling shutter in a stored (PRESET) position. The device can be also configured to manage a remote actuator - 2 modules. To be completed with 1 or 2-modules key covers, support frames and plates. |
| ○ 3477 |  Basic module control interface with 2 independent contacts for the control of 2 actuators for single function loads, or 1 actuator for double function loads (shutters) - the inputs accepts two traditional switches or pushbuttons with NO and NC contact, or a traditional two-way switch, or interlocked pushbuttons. | | |
| ○ F428 |  As above - 2 DIN modules | | |

| LOADS THAT CAN BE DRIVEN (230 V~ 50/60 Hz) | | | | | | | |
|--|---|---|---|---|--|---|---|
| Actuators | Type | | | | | | |
| |  |  |  |  |  |  |  |
| | Energy saving incandescence and halogen lamps | LED lamps | Linear fluorescent lamps ¹⁾ | Compact fluorescent lamps | Electronic transformers ³⁾ | Ferromagnetic transformers ^{2) 3)} | Reducer motors for shutters ⁴⁾ |
| Y4672M2L | 1380 W | 250 W Max 2 lamps | 250 VA | 250 W Max 2 lamps | 460 W | 460 VA | 460 W |
| Y4672M2S | - | - | - | - | - | - | 2 A 250 V~ |

Notes:

- Power factor corrected fluorescent lamps, discharge lamps.
- Account must be taken of the transformer yield to calculate the effective power of the load connected to the actuator. For example if a dimmer is connected to a 100 VA ferromagnetic transformer with yield 0.8, the effective power of the load will be 125 VA.
- The transformer must be loaded at its rated power and however never less than 90% of this power. It is preferable to use a single transformer rather than several transformers in parallel. For example it is better to use a single 250 VA transformer with 5 50W spotlights connected rather than use 5 50 VA transformers in parallel each with a 50 W spotlight.
- The  symbol on the actuators refers to the shutter reducer motors.

Light Now MyHOME

actuators for lights, shutters and different loads

| Item | Light control/actuator | Item | Actuators for centralisations |
|------------|---|------------|--|
| ○ 3476 | 1 relay actuator - for single loads: 2 A resistive or incandescence lamps, 2 A cosφ 0.5 for ferromagnetic transformers - a traditional pushbutton with NO contact accepted in input | ○ BMSW1003 | ON/OFF actuator, 4 independent outputs with maximum load 16 A at 230 V~, clamp connection and RJ45, IP20 protection index, power supply 100/240 V~ 50/60 Hz, pushbuttons for load direct control - zero-crossing function - 6 DIN modules |
| ○ F411U2 | Actuators for centralisations Actuator with 2 independent relays – for single and double loads: 10 A resistive and 6 A incandescence lamps, 500 W for reducer motors, 2 A cosφ 0.5 for ferromagnetic transformers and 250 W for fluorescent lamps - logic relay interlock via configuration - it has "Zero crossing" technology - 2 DIN modules | ○ BMSW1005 | ON/OFF actuator, "Zero Crossing" technology, 8 independent outputs with maximum load 16 A at 230 V~, clamp connection, IP20 protection index, power supply 100/240 V~ 50/60 Hz, pushbuttons for load direct control - 10 DIN modules |
| ○ F411/4 | Actuator with 4 independent relays - for single, double or mixed loads: 2 A resistive, 2 A incandescence lamps, 500 W for reducer motors, 2 A cosφ 0.5 for ferromagnetic transformers and 70 W for fluorescent lamps - logic relay interlock via configuration - 2 DIN modules | ○ F401 | Actuator for shutters Actuator with 2 internal relays and 4 pushbuttons. In addition to monostable and bistable UP/DOWN operation, the actuator also places the shutter in a stored (PRESET) position - 2 DIN modules |
| ○ F411/1NC | Actuator with 1 two-way NC relay for single loads, 16 A resistive, 10 A for incandescence lamps, and 4 A for fluorescent lamps. At switch on, the contact of the device is always closed (ON status), and it opens when an OFF control is sent. In this way, if there is no power input from the BUS, the device will remain in the ON status, keeping the load ON - 2 DIN modules | | |

LOADS THAT CAN BE DRIVEN (250 V~ 50/60 Hz)

| Actuators | Type | | | | | | |
|-----------|---|-----------------------|--|---------------------------|---------------------------------------|---|---|
| | | | | | | | |
| | Energy saving incandescence and halogen lamps | LED lamps | Linear fluorescent lamps ¹⁾ | Compact fluorescent lamps | Electronic transformers ³⁾ | Ferromagnetic transformers ^{2) 3)} | Reducer motors for shutters ⁴⁾ |
| 3476 | 2 A 460 W | 40 W Max 1 lamp | - - | 40 W Max 1 lamp | - - | 2 A cosφ 0,5 460 VA | - - |
| F411U2 | 10 A 1380 W | 250 W Max 4 lamps | 4 A 230 W | 250 W Max 4 lamps | 4 A 230 W | 4 A cosφ 0,5 460 VA | 2 A 460 W |
| F411/4 | 2 A 460 W | 70 W Max 2 lamps | 0.3 A 70 W | 70 W Max 2 lamps | 0.3 A 70 W | 2 A cosφ 0,5 460 VA | 2 A 460 W |
| BMSW1003 | 16 A 3680 W | 2.1 A 500 VA | 10 X (2 X 36 W) 4.3 A | 1150 W 5 A | 16 A 3680 W | 16 A 3680 W | - - |
| BMSW1005 | 16 A 3680 W | 2.1 A 500 VA | 4.3 A 10X2X36 W | 5 A 1150 VA | 16 A 3680 W | 16 A 3680 W | - - |
| F401 | | | | | | | 2 A 250 V~ |
| F411/1NC | 10 A 2300 W | 500 W Max 10 lamps | 4 A 920 W | 500 W Max 10 lamps | 4 A 920 W | 4 A cosφ 0,5 920 VA | |

Notes:

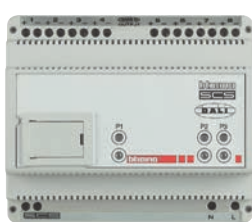

1) Power factor corrected fluorescent lamps, discharge lamps. 2) Account must be taken of the transformer yield to calculate the effective power of the load connected to the actuator. For example if a dimmer is connected to a 100 VA ferromagnetic transformer with yield 0.8, the effective power of the load will be 125 VA. 3) The transformer must be loaded at its rated power and however never less than 90% of this power. It is preferable to use a single transformer rather than several transformers in parallel. For example it is better to use a single 250 VA transformer with 5 50W spotlights connected rather than use 5 50 VA transformers in parallel each with a 50 W spotlight. 4) The symbol on the actuators refers to the shutter reducer motors.

dimmer actuators for lights and different loads

F413N

F429

F416U1

F418U2

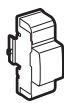

F429G

F429D

| Item | Dimmers for centralisations |
|----------|--|
| ○ F413N |  1-output dimmer to supply fluorescent lamps or LED sources with input 1-10 V for single loads up to 2.5 A at 230 V~ – type of screw connection - power supply 27 Vd.c. – absorption 30 mA – max 10 ballast that can be connected (clamps 1-2) - with pushbutton for load direct control - version for fastening on DIN rail - 2 modules |
| ○ F416U1 | Multi-load dimmers for centralisations  Multi-load dimmer, 1 output with maximum load 4.3 A at 230 V~, clamp connection and RJ45, IP20 protection index, power supply 100/240 V~ 50/60 Hz, pushbutton for load direct control - 6 DIN modules |
| ○ F418U2 |  Two-channel dimmer for the management of dimmer LEDs, dimmer compact fluorescent lamps (CFL), energy saving halogen lamps and electronic transformers at 110-230V. Possibility of parallelisation of the two channels to increase the maximum power which can be managed. power supply 27 Vd.c., absorption 18 mA - version for fastening on DIN rail - 4 modules |

| Item | Devices for DALI lamps management |
|---------|---|
| ○ F429G |  DALI-2 Gateway - The device is an interface between MyHOME/Lighting Management systems and devices driven using the DALI (Digital Addressable Lighting Interface) protocol. It has 1 independent outputs to manage up to 64 ballast DALI2. The functionalities supported are: ON/OFF, dimmer, RGBW (colour and tunable white) e phase in-out. The device can be installed in a MyHOME system through H+P app configuration. Suitable in houses where the installation is made with all Dali2 lamps. |
| ○ F429D |  DALI-2 dimmer - The device is an interface between MyHOME/Lighting Management systems and devices driven using the DALI (Digital Addressable Lighting Interface) protocol. It has 2 independent outputs to control up to 32 ballasts (2 groups of 16 DALI-2 lamps). The functionalities supported are: ON/OFF, dimmer, RGBW (colour and tunable white) e phase in-out. The device can be installed in a MyHOME system through H+P app configuration. Suitable for installations with few DALI-2 lamps. |
| ○ F429 |  DALI dimmer with 8 independent outputs for the connection of up to 16 DALI reactors for each output – 230 V~ power supply 50/60 Hz; 110 - 240 Vd.c. – absorption 5 mA - with pushbutton for load direct control - version for fastening on DIN rail - 6 modules |

LOADS THAT CAN BE DRIVEN (230 V~ 50/60 HZ)

| Actuators | Type | | | | | | |
|-----------|---|---|---|---|---|---|---|

lighting/movement sensors

BMSE3001

BMSE3003

0 882 40

BMSO4003

YW4658

0 488 75

| Item | Lighting/movement sensors |
|---|---|
| ○ BMSE3001 |  <p>Passive infrared SCS sensor for the detection of movement and the lighting level. Ceiling flush mounted installation using springs or installation boxes; surface installation using surface installation box, item 048875; IP20 protection index; RJ45 clamp connection; 8 m (50 m²) diameter coverage area for a 2.5 m installation height, maximum installation height 6 m; 27 V.d.c. power supply from bus, absorption 12 mA; regulation with basic/advanced remote control (BMSO4003 and BMSO4001) or through configuration software, of the lighting level, from 5 to 1275 LUX, of the time delay, from 30 s to 255 h, and of the main operating parameters; Push&Learn pushbutton</p> |
| ○ BMSE3003 |  <p>Double technology SCS sensor: passive infrared for the detection of presence and the lighting level. Ceiling flush mounted installation using springs or installation boxes; surface installation using surface installation box, item 048875; IP20 protection index; RJ45 clamp connection; 8 m diameter (50 m²) infrared coverage area for a 2.5 m installation height, 11 mm diameter (95 m²) ultrasound coverage area for a 2.5 m installation height, maximum installation height 6 m; 27 V.d.c. power supply from BUS, absorption 17 mA; regulation with basic/advanced remote control (BMSO4003 and BMSO4001), or through configuration software, of the lighting level, from 5 to 1275 LUX, of the delay, from 30 s to 255 h, and of the main operating parameters; Push&Learn pushbutton</p> |
| <input type="checkbox"/> YW4658 <input checked="" type="checkbox"/> YG4658 <input checked="" type="checkbox"/> YD4658 |  <p>Green Switch: dual technology presence sensor, passive infrared and ultrasound (PIR + US), suitable for the presence detection in the work areas (offices, meeting rooms). Equipped with manual on/off switch. Mode of operation (automatic or manual), delay time (from 5s to 59min) and brightness threshold (from 20 to 1275 lux) settable by means of advanced/basic configuration remote control (BMSO4003), physical or virtual configuration. 2 modules.</p> |

| Item | Remote control and configuration gateway |
|------------|--|
| ○ 0 882 40 |  <p>The Gateway allows you to adjust the time delay, the brightness threshold and the detection sensitivity. Possibility to store, share, prepare all of the product settings for a construction site advance. Possibility of duplicating the parameters of a product 0 882 40. Works with the App "Legrand Close Up" available on Google Play and Apple Store via Bluetooth Low Energy technology for smartphone. Allows the configuration of windows, management systems lighting and emergency lighting units and offers advanced features to facilitate the management of facilities.</p> |
| ○ BMSO4003 |  <p>The basic configuration remote control, with IR transmitter, adjusts the main operating parameters of: Switch Sensor, Green Switch and SCS compatible sensors. Modification of parameters only possible for preset values, battery recharge not available</p> |
| ○ 0 488 75 | <p>Installation accessories</p> <p>Ceiling mounted box compatible with the sensors: BMSE3001 and BMSE3003, IP20 protection index, dimensions Ø 100 x 50 mm</p> |

Features of the lighting/movement sensors

| SCS sensors | BMSE3001 | BMSE3003 | JYW/YG/YD4658 |
|------------------------|----------------------------|----------|-----------------------------|

temperature control

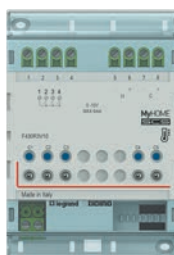

H4691

3454

F430/2

F430R8

F430V10

| Item | Thermostat |
|---------|---|
| ○ H4691 |  <p>Probe with backlit display that controls the temperature of an individual zone. It features an input for the connection of a contact line (e.g. window contact). It can be used for the management of different types of systems, and the adjustment of the fan speed when fan coils are used. Possibility of automatic operation (summer/winter), with compatible systems - 2 modules</p> |

| Item | Probe without display |
|-------------|---|
| ○ 3454 |  <p>Temperature probe in basic module with wired sensor - to be associated to the temperature sensor item 3457 and Vantage probe item 8051</p> |
| ○ 3457 | Accessories  <p>Temperature probe to be associated to the probe item 3454</p> |
| ○ F430/2 | Actuators for valve control  <p>Actuator with 2 independent relays – for single and double loads: 6 A resistive, 2A motor driven valves and pumps - configuration based logic relay interlock - 2 DIN modules</p> |
| ○ F430/4 |  <p>Actuator with 4 independent relays - for single, double or mixed loads: 4 A resistive, 1 A motor driven valves, pumps and fan coils - configuration based logic relay interlock - 2 DIN modules</p> |
| ○ F430R8 |  <p>Actuator with 8 independent relays for the control of on-off valves, motorised valves (open-close and three points), pumps and fan coils with 2 and 4 tubes - 4A resistive, 1A motor valves, pumps and fan-coils- SCS-bus connection - 4 DIN modules</p> |
| ○ F430R3V10 |  <p>Actuator with 3 independent relays and 2 x 0-10 Volts outputs for the control of fan coils with 2 and 4 tubes with proportional 0-10 Volt valves - 4A resistive, 1A fan coil - SCS-BUS connection - 4 DIN modules</p> |
| ○ F430V10 |  <p>Actuator with 2 x 0-10 Volt outputs for the control of 0-10 proportional valves - SCS-BUS connection - 2 DIN modules</p> |

Light Now MyHOME

energy management

| Item | Consumption display | Item | Energy data logger - centralisation of energy consumption data |
|---------|---|-----------|---|
| ○ F520 |  Meter for the measurement of electricity on a maximum of 3 lines, by connecting 3 toroids to the appropriate inputs. Version for fastening on DIN rail. The device is fitted with 1 toroid. Data visualization with Home+Control app. - 1 module. | ○ F524 |  Device for the centralisation of energy consumption data measured using meters with toroids, item F520, load control central units, item F521. The data can be displayed in appropriate integrated web pages by connecting the device to a network through the Ethernet port. It gives the possibility of configuring different tariffs, of downloading the data, and of adding up or subtracting the lines, as well as of performing multiplications by a certain factor. The device has a microSD slot for the backup of the data recorded, and OPENWebNet controls for the display of consumptions. Version for installation on DIN modules - 1 module - Power supply from BUS 27 V. |
| ○ 3523 |  Additional electricity meter toroid, item F520 and for actuator with sensor, item F522 for the measurement of the earth leakage current. Cable length 400 mm. | | |
| ○ 3522N |  Impulse counter interface for the data measurement from meters (water, gas, etc...) with impulse output. The values measured can be displayed on all the MyHOME user interfaces (HOMETOUCH and HOME+CONTROL App). Basic module version for hidden installation. Power supply from BUS 27 V. | | |
| | Load control management | | Accessories |
| ○ F521 |  Central unit for the management and control of the actuators of the load control system, to prevent the risk of detachment of the limiter of the electricity supplier. The central unit manages up to 63 loads, a contract power between 1.5 and 18 kW, and tolerance up to +/- 20%. It integrates an electricity meter for the controlled line. Version for fastening on DIN rail. The device is fitted with 1 toroid. Data visualization with Home+Control app. - 1 module | ○ 3508BUS |  removable clamp for BUS connection - width 3.81 mm |
| ○ F522 |  Actuator with integrated current sensor for the measurement of the controlled load consumptions. 1 relay - 10 A for incandescence lamps and 4 A for fluorescent lamps or ferromagnetic transformers, and 500 W for compact fluorescent and LED lamps - Bistable relay with zero crossing for the Automation and/or Load control management functions. Version for fastening on DIN rail - 1 module. Earth leakage control by connecting the additional toroid, item 3523. Data visualization with Home+Control app. | ○ 3508U2 |  removable clamp 2 poles |
| ○ F523 |  1 relay actuator - for incandescence lamps and 4 A for fluorescent lamps or ferromagnetic transformers, and 500 W for compact fluorescent and LED lamps - bistable relay with zero crossing for the Automation and/or Load control management functions. Version for fastening on DIN rail Data visualization with Home+Control app. - 1 module. | ○ 3508U3 |  removable clamp 3 poles |

Light Now MyHOME

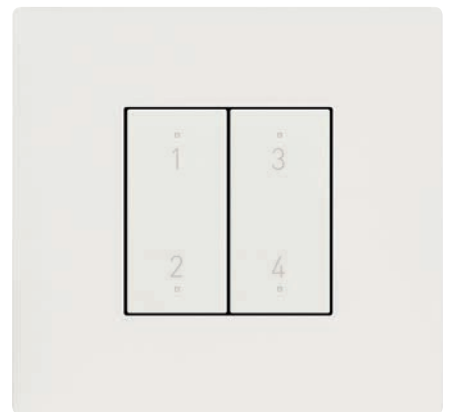

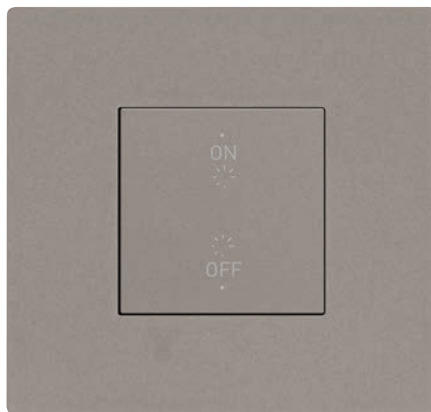

power supply, accessory and cables

| Item | SCS addresses extension interface |
|---------|--|
| ○ F422A |  2 Din modules Interface between SCS BUS based systems, dedicated just to the logic expansion of the address extension and not to all the functions supported with the previous BT-F422. It can be used with both, DIN server BT-F460 and Classe300EOS with Netatmo. Each interface can add 175 addresses, with a maximum of 2 interfaces allowed for installation (BT-F460 with max 2 F422A; Classe300EOS with max +1 F422A). By doing so thanks to this device you will be able to overcome the current limit of 175 addresses and configure huge installations with up to 525 addresses. No parameters to take into consideration because the assignment is automatic. |
| ○ F422 | SCS interface for different systems  Interface between SCS BUS based systems, dedicated to different functions - 2 lowered DIN modules |
| ○ F420 | Scenario Module  Device enabling to save 16 scenarios for Automation, Temperature control and Video door entry applications - 2 DIN modules |
| ○ F425 | Memory Module  Module used for saving the status of the actuators - to reset the light automation system in case of power cut - 2 lowered DIN modules. |

| Item | Power supply |
|-------------|--|
| ○ E56 |  Power supply with input voltage 110 - 240 V~ @ 50 - 60 Hz. It provides two output power supplies in very low safety voltage (one of 27V DC 1.2A on the SCS terminals, one of 28.5V c.c. on terminal 1 - 2) to be used alternatively e NOT simultaneously. It can be used also as an additional power supply (output 1 - 2) for the local power supply of the devices automation (in this case it is not possible use no other output). The device is electronically protected against overload and short circuit. It is a device SELV double insulation safety device - Overall dimensions 6 DIN modules. |
| ○ E49 |  Compact power supply for Temperature control and Automation systems - input 230 V~, output 27 Vdc - maximum power delivered 600 mA - 2 DIN modules. |
| ○ L4669 | Connection cables  Sheathed pair made up of 2 flexible wires with unshielded plaited sheath - insulation 300/500 V - complies with standards CEI 46-5 and CEI 20-20 - coil length 100 metres |
| ○ L4669/500 | as above - in 500 m coils |
| ○ L4669KM1 | As above - reel length 1000 m |
| ○ 336905 | As above - low toxicity cable without halogens - ideal for application in environments where fire hazard safety is critical - coil length 200 metres |
| ○ 336904 |  Specific cable with 2 twisted conductors. It can be installed in underground piping, in accordance with standards (CEI 20-13 and CEI 20-14). It ensures the best performance in video systems (higher distance between EP and Handset when compared with other cables). 200 m coil |
| ○ 3508BUS | Accessories  removable clamp for BUS connection - width 3.81 mm |
| ○ 3508U2 |  removable clamp 2 poles |
| ○ 3508U3 |  removable clamp 3 poles |
| ○ 3515 |  spare removable clamp |

Light Now KNX

Connected controls for the smart home, which communicate via KNX standard bus.

How to choose devices for the composition of the electrical system

SECTION 4

SECTION 1

| Type of system | Catalog section |
|---|-----------------|
| Light Now standard system (Switches, sockets and cover plates for the residential electrical system) | 1 |
| Light Now with Netatmo (Connected controls for the smart home, which communicate via radio) | 2 + 1 |
| Light Now MyHOME (Connected controls for the smart home, which communicate via SCS BTicino bus) | 3 + 1 |
| Light Now KNX (Connected controls for the smart home, which communicate via KNX standard bus) | 4 + 1 |

Light Now KNX

manual control units and sensors

Constantly check for presence and light levels, switching OFF as soon as the natural light level is sufficient.

Switch ON and OFF automatically

Accurate set-up on site with configuration device

Connected directly to KNX cable (supplied with tap-off connector)

The detector must be programmed using ETS software

| Item | Light Now wired control units |
|--------------|--|
| Y4651KNX |  2 channels control unit - 4 buttons. Used to control (ON/OFF, dimming, scenario, forcing), roller shutters (up, down, stop), awnings, and other receivers. Fitted with programmable RGB LEDs (12 colors available) for displaying load status and system status feedback (normal, forced, override, day/night pilot light, etc.) and alarms. To be fitted with Light Now key cover, plate and support frame. |
| 0 029 00 | Touch screen control units With built-in temperature & proximity sensor. Max. 16 timings, 8 group events, 8 logic functions To be installed in a flush-mounting box. |
| 0 029 01 | 4" touch screen - 9 control pages including switch, dimming, RGB control, shutter, scene control, HVAC control, audio control and energy metering. |
| 0 489 19 | Special sensors for corridor Ceiling mounted motion sensor Double passive infrared detection 360°, lateral range 2 x 12 m - IP 20. Recommended fixing height: 2.5 m. Fits directly in suspended ceiling with springs (supplied) or is installed in a 50 mm deep Batibox item 0 893 58. Surface mounted on ceiling using accessory item 0 488 75. |
| CP-MWS3A-KNX | Ceiling mounted presence sensor MW (microwave) detection, range up to 23 m Flat and compact sensor with adjustable head for special applications - IP 40. Recommended fixing height: 2.8 m. Fixes directly in suspended ceiling with springs (supplied). |

| Item | Special presence sensors for work areas |
|----------------|---|
| 0 489 18 | Suitable for meeting rooms, classrooms, open areas, etc. Ceiling mounted - Dual technology 360° passive infrared and ultrasound detection, range 8 m - IP 20. Fixes directly in suspended ceiling with springs (supplied) or is installed in a 50 mm deep Batibox Surface mounted on ceiling using accessory item 0 488 75. Connection by KNX red/black connector. |
| 0 489 22 | 360° passive infrared detection with high density lens, range 8 m - IP 20. Fixes directly in suspended ceiling with springs (supplied) or is installed in a 50 mm deep Batibox Surface mounted on ceiling using accessory item 0 488 75. Connection by KNX red/black connector. |
| CP-EBDSPIR-KNX | 360° passive infrared detection, range 7 m Flat and compact sensor for standard heights - IP 40. Fixes directly in suspended ceiling with springs (supplied). |
| CP-MWS6-KNX | 360° MW (microwave) detection, range 16 m Flat and compact sensor - IP 40. Fixes directly in suspended ceiling with springs (supplied) |
| CP-EBDHS-KNX | Special presence sensor for high bay Ceiling mounted 360° passive infrared detection, high sensitivity, range 40 m. Flat and compact sensor for high heights- IP 65. Recommended fixing height: 15 m. |
| 0 489 21 | Special motion sensor for outdoor car parks and cellars Wall or ceiling mounted - surface mounting Passive infrared detection with 270° adjustable head, range 20 m - IP 55. Recommended fixing height: 2.5 m. Can be fixed in a corner with a special accessory item. 0 489 72. |

| Item | Modular controllers for dimming |
|----------|--|
| 0 026 65 | Each output can be controlled by a sensor and/or KNX control unit. For DALI control 1 output DALI bus (64 DALI ballasts max) to control up to 16 DALI groups and up to 64 DALI scenes. 4 DIN modules. |
| 0 026 99 | 1 output DALI bus (64 DALI ballasts max) to control individually up to 64 DALI luminaires and up to 16 DALI scenes. 4 DIN modules. |
| 0 026 68 | For 1-10V control 10 outputs 1-10 V also controlling 10 ON/OFF circuits (16 A max). 10 DIN modules. |
| 0 026 54 | For LED and all others LV and ELV load 2 outputs 2 x 300 W/VA maximum per output. 4 DIN modules. |
| | Modular ON/OFF controller |
| 0 026 80 | Each output can be controlled by a sensor and/or KNX control unit. 4 x 16 A outputs. 4 DIN modules |
| | Modular multi-applications ON/OFF controllers |
| 0 026 72 | Each output can be controlled by a sensor and/or KNX control unit. Multi-applications controllers with independent input channels and outputs configurable to control lighting loads, power sockets, roller shutters, and HVAC equipment. |
| 0 026 73 | 8 x 16 A outputs. 6 DIN modules |
| 0 026 74 | 8 x 16 A outputs - 8 inputs. 6 DIN modules |
| 0 026 76 | 12 x 16 A outputs - 6 DIN modules |
| 0 026 78 | 16 x 16 A outputs - 10 DIN modules |
| 0 026 79 | 20 x 16 A outputs - 10 DIN modules |
| 0 026 79 | 20 x 16 A outputs - 18 inputs. 10 DIN modules |
| | Room Controller Unit |
| 0 484 18 | Power modules equipped with output contacts for controlling: - different types of ON/OFF load (lighting, roller shutters, contactors, motors, etc.) - a DALI dimming output for 64 ballasts max. Loads are managed by the controls to which they are linked: either by KNX controls, or by wired connection input terminals (switches, push-buttons, volt-free contacts). Multiphase connection and consumption measurement. |
| 0 484 22 | 8 inputs - 10 outputs. 8 DIN modules 16 inputs - 16 outputs. 12 DIN modules. |

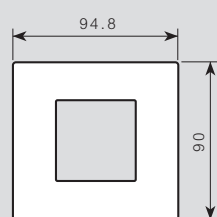

| Item | KNX interface - voltage contact |
|----------|--|
| 0 026 93 | Connects voltage free contacts devices (switches, push-buttons, alarms, etc.) to the KNX. |
| 0 026 92 | Modular 4 inputs 0 to 265 AC/DC powered. 2 DIN modules. |
| | Flush mounting For installation in a flush-mounting box. 4 inputs - 4 outputs. |
| 0 035 46 | Line coupler Provides galvanic isolation between lines Necessary in an installation where there are more than 64 KNX participants. 2 DIN modules. |
| 0 035 45 | IP/KNX router Can act as main line or backbone coupler Links different KNX networks to each other via the IP infrastructure. 2 DIN modules. |
| | Modular power supplies and accessory |
| 0 035 06 | Powers one KNX line Integrated filter to prevent the short-circuit of BUS messages. Voltage 230 V \pm - 30 V= With additional 30 V unfiltered output. |
| 0 035 07 | 7 DIN modules. Output 320 mA Output 640 mA |
| 0 488 79 | KNX connector Black and red. Supplied in boxes of 50 |
| | KNX cables |
| 0 492 91 | Length 500 m 0.8 mm dia. quad Isolation 4000 V. 1 pair: red/black |
| 0 492 92 | 2 pairs: red/black and yellow/white |
