Different solutions for different applications

From villas to multi-family units

Villas

Small building

Building complex

Different types of constructions
mean different types of offer

EASYKIT - BASIC KITS

for standard level villas

Closed solution that provides **BASIC FUNCTIONS**, normally for simple systems:

- one or two family homes
- ready made solutions
- expandable solutions
- plug-in or DIN power supply

PROFESSIONAL KITS

for high level villas

Initial basic solution that **CAN DEVELOP** into a **MORE COMPLEX** and **CUSTOMISED** systems:

- one or two-family homes
- ready made solutions
- fully expandables
- enhanced functions

2 WIRES SYSTEM

for small buildings

The best technology when **TIME SAVING** and **EASE** of **INSTALLATION** are required:

- small buildings/homes
- easy and quick to install
- maximum versatility
- perfect for refurbishments

IP SYSTEM

for building complex

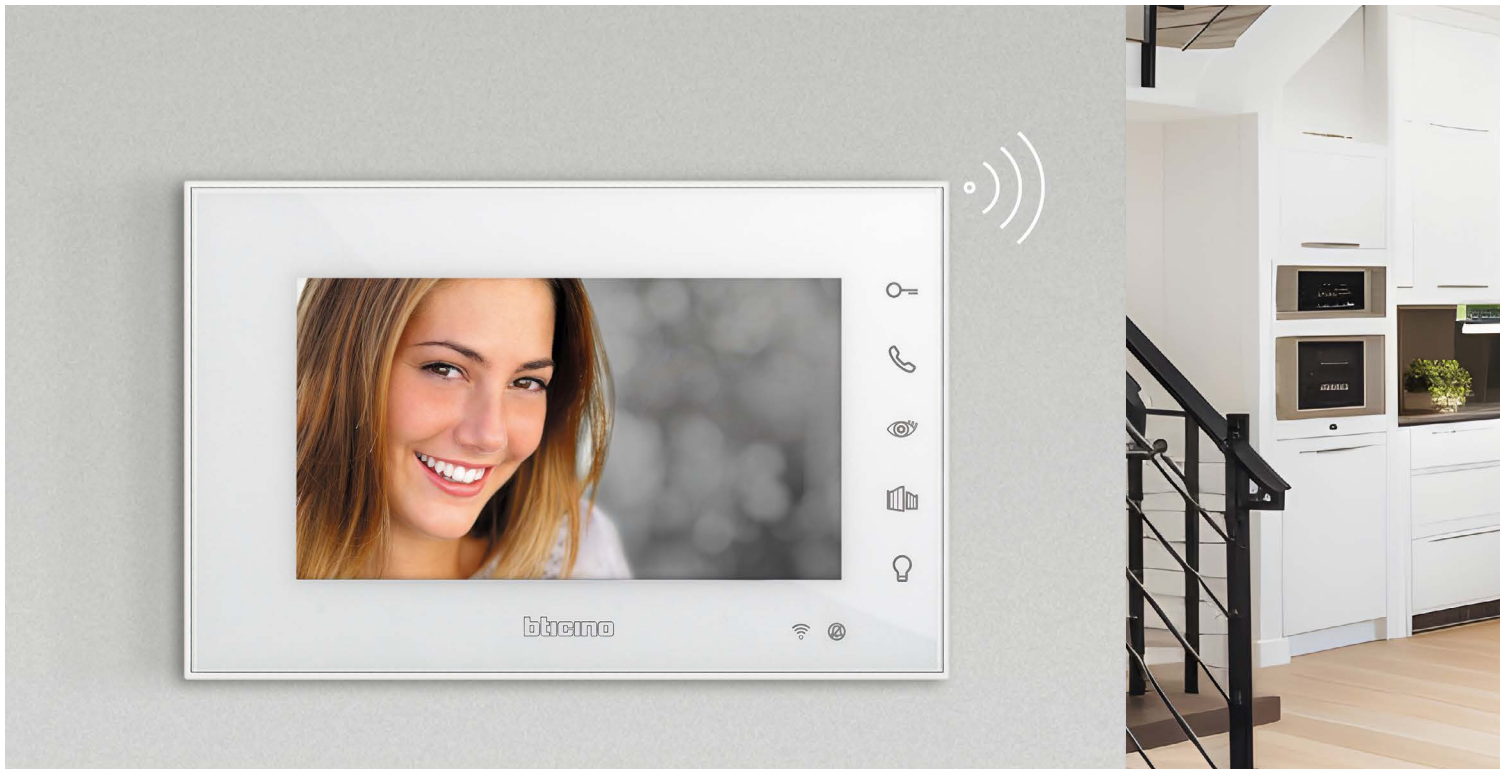

The system conceived for **BIG RESIDENTIAL BUILDINGS** where IP cabling is required.

- larger buildings and complexes
- high performances
- long distances and high number of apartments
- integrated security functions

EASYKIT

Main features:

- Easy, simple and quick installation
- SMART Wifi connected solution for your security
- 2 non-polarized wires for an error-proof connection
- Practical and functional: hands-free solutions enabling dialogue while moving freely
- High-resistant, waterproof metal entrance panels
- One family installation. Easy switch to two families by adding the additional internal unit
- Expandability with additional internal units, entrance panel and CCTV camera.

EASYKIT

"very simple" solutions

Hands-free video kits comprising:

- a wall-mounting metal entrance panel (rainshield included) equipped with a colour camera and a LED lamp for the illumination of the field of view.
- a video colour display internal unit (plug-in power supply included).

 CONNECTED VERSION	 CAMERA INTEGRATION	 PLUG-IN OR DIN POWER SUPPLY	 EXPANDABLE	 IDEAL FOR REFURBISHMENTS
------------------------------	-------------------------------	--	-----------------------	-------------------------------------

- **Easy** installation
- **Expandability** with additional internal units, entrance panel and CCTV camera
- **Connected Wifi** solution available
- **Door lock** release key and **intercom** functions
- **Plug-in** and **DIN** power supply

EASYKIT

EASYKIT Wifi

Smart solution
for your security

Home + Security

Answer the calls,
activate the electrical door locks,
activate the cameras and display
the timeline of the events

Manage up to 20 homes
with your single account

Home + Security

Incoming call

Receive notification
when someone
is calling

See who's calling

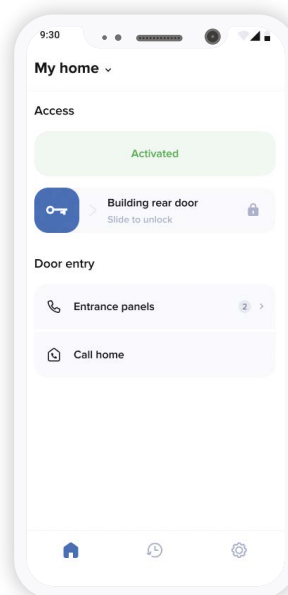

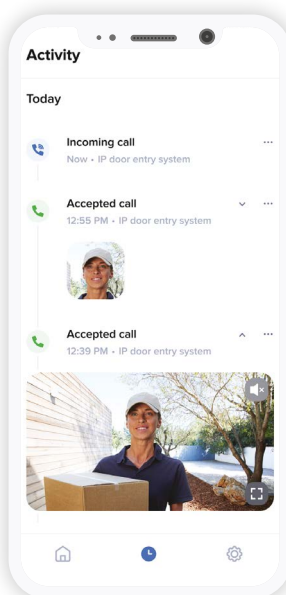

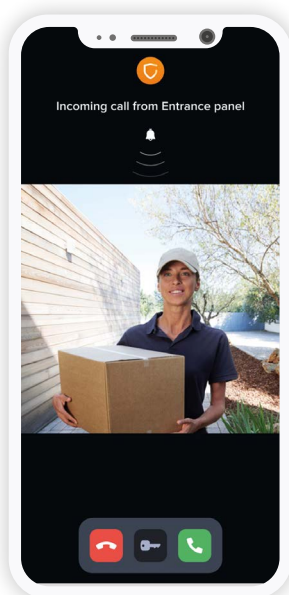

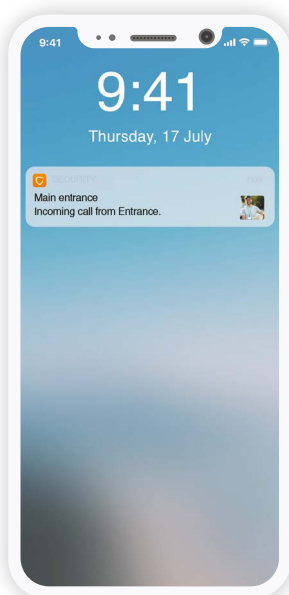

Answer the call and
open the gate for
the courier

Check the events

Check who called you
and if they left you
a message

Quick actions

- Activate the electrical door locks
- Activate the timed staircase lights
- Call home / Intercom
- Activate the cameras

Security enhancement with integration of Netatmo devices

Video door entry system and security. Together.

Video door entry system ...

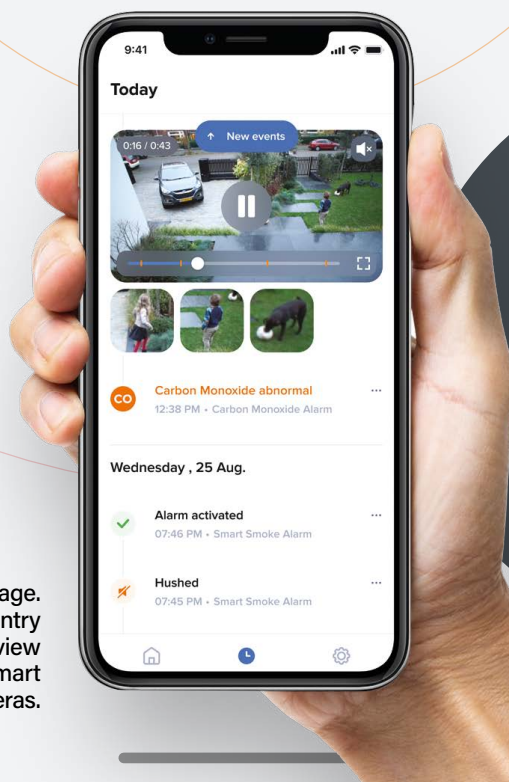

Main entrance
Incoming entrance call.

Security ...

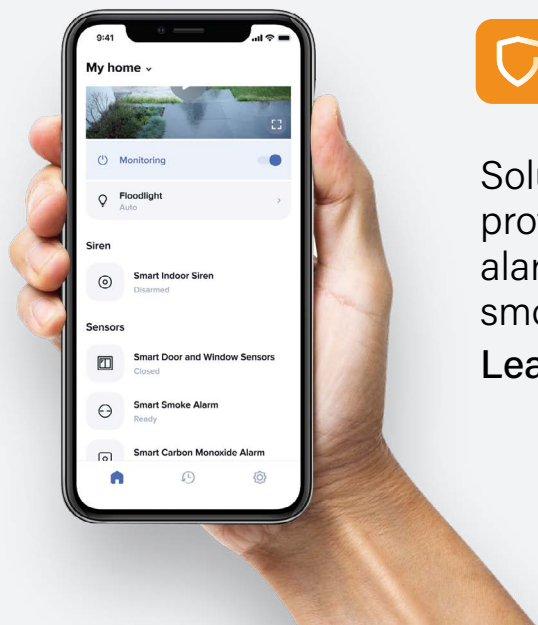

Secondary entrance and interiors
Smart Outdoor Camera with Siren and movement detection. Smart Indoor Camera with face recognition.

A single App with an intuitive home page. It allows you to answer video door entry calls, activate the door lock and view images from Netatmo smart outdoor and indoor cameras.

Professional opportunity: offer your services as an installer of simple smart security systems.
Business opportunities: access to a catalogue of smart and easy-to-install security devices.

Home + Security
 The best App for a safe home.

Solutions for a smart and complete protection of your home: security cameras, alarms, opening sensors, smoke detector...

Leave your home without worries.

FAMILY HOUSE

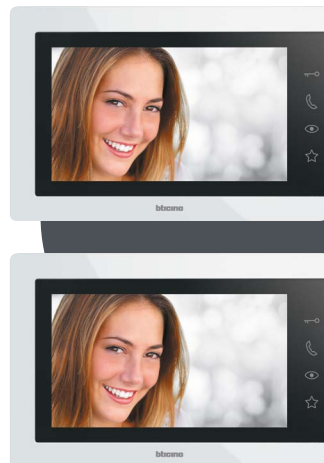

Existing internal unit

You can turn your existing system into a connected one by simply replacing the video internal unit **without structural changes.**

EASYKIT

Solutions

Choose your kit...

7" inch easykit Wifi video kits

- Wifi connectivity
- Management from smartphone via Home + Security app
- 7 Inch colour monitor with soft touch buttons
- White finish
- Double opening (door and gate)
- Light activation
- Integration with Netatmo Smart Cameras and Security devices
- Additional CCTV camera
- Entrance panel can call 2 apartments
- Plug-In or DIN power supply

7" inch easykit plus video kits - mirror effect

- Simple and modern
- 7 Inch colour monitor with soft touch buttons
- Mirror effect design
- Black finish
- Double opening (door and gate)
- Light activation
- Additional CCTV camera
- Entrance panel can call 2 apartments
- Plug-In or DIN power supply

7 inch easykit essential video kits

- Practical and essential
- 7 Inch colour monitor with soft touch buttons
- White finish
- Double opening (door and gate)
- Additional CCTV camera
- Entrance panel can call 2 apartments
- Plug-In or DIN power supply

and expand it

All Easykits can be expanded up to a maximum of 3 internal units and one additional entrance panel or CCTV camera for each apartment. Only one easy kit connected per home can be installed.

7 Inch Wifi additional internal units	7 Inch Plus additional internal units	7 Inch Essential additional internal units	Additional entrance panel additional camera

7" White finish **EASYKIT Wifi with Netatmo**

WITH PLUG-IN POWER SUPPLY

One family two wires colour **EASYKIT Wifi with Netatmo** connected video kit with plug-in power supply and wall mounted entrance panel that can be easily adapted for two family houses. An external CCTV colour camera can be directly connected to the entrance panel. Wifi connected handsfree 7" screen internal unit white finish with European Plug-In power supply included. The system can be expanded up to 3 traditional handsfree internal units. Thanks to the Wifi connection, you can associate the video internal unit to the HOME + SECURITY App (available for Android and iOS). You can manage by the App the main video internal unit functions (receiving calls, opening the door lock, view the cameras). Through the same App, it is also possible to manage the products of the Netatmo security range. This allows you to quickly and easily create a Smart security system.

7" Mirror black finish **EASYKIT Plus**

WITH PLUG-IN POWER SUPPLY

One family two wires colour **EASYKIT Plus** video kit with plug-in power supply and wall mounted entrance panel that can be easily adapted for two family houses. An external CCTV colour camera can be directly connected to the entrance panel. Handsfree 7" screen internal unit black finish mirror effect, with touch control commands for main functions and European Plug-In power supply included. The system can be expanded up to 3 traditional handsfree internal units.

7" White finish **EASYKIT Essential**

WITH PLUG-IN POWER SUPPLY

One family two wires colour **EASYKIT Essential** video kit with plug-in power supply and wall mounted entrance panel that can be easily adapted for two family houses. An external CCTV colour camera can be directly connected to the entrance panel. Handsfree 7" screen internal unit white finish with touch control commands for main functions and European Plug-In power supply included. The system can be expanded up to 3 traditional handsfree internal units.

PROFESSIONAL

KITS

Suitable for villa standard - high level applications

- The 2-wires technology allows maximum flexibility and expandability
- From basic functions to advanced functions such as call redirection on smartphone, video door entry answering machine, Netatmo cameras integration, intercom and door opening with badge
- Modular DIN-rail power supply
- Include a manual with all the technical information required for the installation, connection, features and expansion possibilities.

EXPANSION
Expand these kits with other devices such as additional entrance panels, internal units, cameras, and home automation devices.

2 WIRES

FULL EXPANDIBILITY

AUDIO KITS

VIDEO KITS

Maximum simplicity

The 2-Wires Professional Kits offer unparalleled simplicity and flexibility in installation, making them the perfect choice for both new systems and renovations.

These kits allow for the installation of both audio and video systems using just 2 wires, enabling the use of existing wiring during renovations. Additionally, there is no need to worry about polarity in the connections, which significantly simplifies the installation process.

Item **Classe 300X Light – Linea 3000 Black connected Video kit**

One-family kit with CLASSE 300X hands-free connected video internal unit (Light finish) and LINEA 3000 pushbutton panel (black finish). 2 wires/Wi-Fi hands-free connected video internal unit, Light finish, with 7" horizontal touch screen LCD display, resolution 1024 x 600 pixel. Featuring a digital echo canceller for better audio quality. Thanks to the Wi-Fi 6 connectivity, the video internal unit can connect to 5 GHz or 2.4 GHz band routers to take advantage of the functions available on the Home + Security App (available for Android and iOS): call reception, door lock release, event timeline display, entrance panel activation, camera scrolling and advanced «Professional Studio» and «Do Not Disturb» functions. Through the Home + Security App, it is also possible to manage the products of the Netatmo security range (outdoor and indoor cameras, indoor siren and smoke detector). This allows you to quickly and easily create a Smart security system. LINEA 3000 pushbutton panel with black finish zamak front cover and proximity reader with a kit of coloured RFID key cards and two clear discs for door lock release. Can be wall or flush installed with specific accessories: (350020) flush mounted box and (343063) flush mounted accessory - to be purchased separately. Can be fitted with rainshield (343053) - to be purchased separately. The pushbutton panel has a protection index IP54 - protection index against mechanical impact IK10.

363942 Complete one family kit

(Easy switch to two families system by purchasing an additional internal unit - refer to 2 Wires system internal units range).

HOME + SECURITY is the App that allows, through the smartphone, to manage calls locally and remotely of the video door phone or with a simple touch to open the gate, the activation of the cameras, and switching on of the timed lights in the garden. Allows you to activate and view images of Netatmo Smart Outdoor and Indoor Cameras. Setting up the App requires a few steps and thanks to the BTicino Cloud, the remote connection is fully automated and managed with the highest level of security.

New audio system

Wiring diagram example

2 WIRES SYSTEM

The easiest system offer

The **2 WIRES SYSTEM** is the ideal technology for situations where time-saving and ease of installation are essential. With its non-polarized design, the 2 WIRES SYSTEM allows for seamless installation across a variety of setups, ranging from single villas to apartment complexes.

This technology is particularly suitable, for example, for:

Small and medium size system

THE VILLA

Renovations

The possibility of using existing cables makes it the ideal solution when refurbishing systems.

THE APARTMENT

Remove the old entrance panel being replaced.

Use the two cables already present to connect the new entrance panel.

In addition to the extreme simplicity, the system offers **VERY GOOD PERFORMANCE**

SYSTEM MAIN FEATURES	3900	Apartments
	3900	Apartment video entrance panels
	39	Risers with independent sound mode
	5	Handsets per apartment
	600 m	Distance between entrance panel and farthest internal unit

THE 2 WIRES SYSTEM

offers a wide range of entrance panels and internal units, to meet all the customer needs.

THE SYSTEM

Composition

2 WIRES

A few accessory devices are needed to make the **2-WIRE systems**, as well as the entrance panels and the internal units and/or video internal units.

- Thanks to the use of accessory devices, additional door locks can be **activated and/or lights switched on**.

Audio door entry system

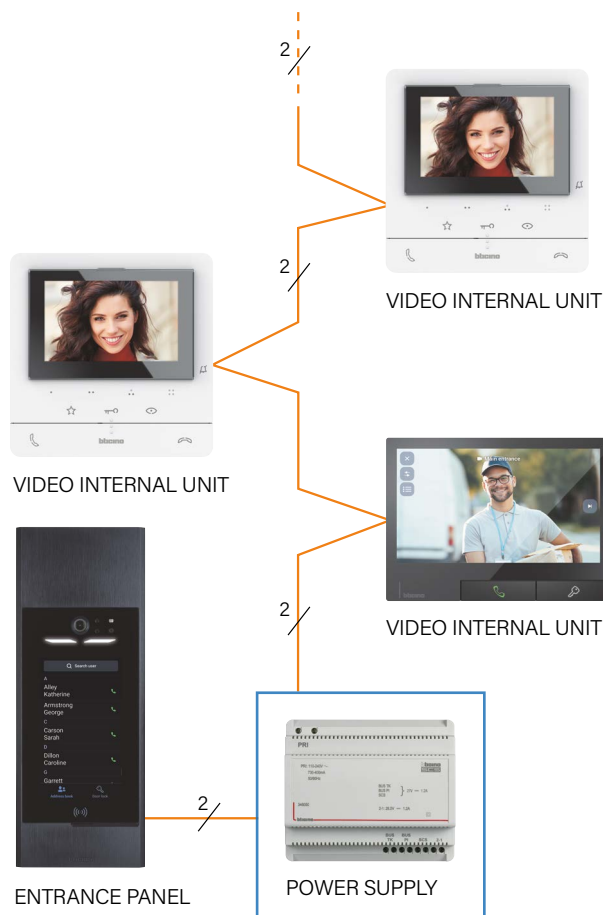

■ In apartment-block systems the switchboard can be used for **the management and centralised supervision** of the apartment-block services.

■ In systems equipped with Classe 300X, Classe 300EOS or Classe 100X connected internal units, you can **manage your door entry system calls and functions directly from your smartphone** using the dedicated Home + Security App.

Linea 5000

Digital. Functional. Performing.

**Linea 5000 is the new BTicino
2 Wires Smart entrance panel.**

Ideal for the “digitalisation” of multi-family settings, it takes access to modern buildings to the next level. Featuring a large 7” touch screen display, a 5 Megapixel wide angle HQ camera, digital filters and a modern and intuitive graphic interface, it integrates perfectly with contemporary buildings, conveying a feeling of innovation and high quality.

In summary, Linea 5000 is a modern, safe and customisable digital experience, ideal for building access control and suitable for any installation situation.

2 WIRES SYSTEM

Linea 5000

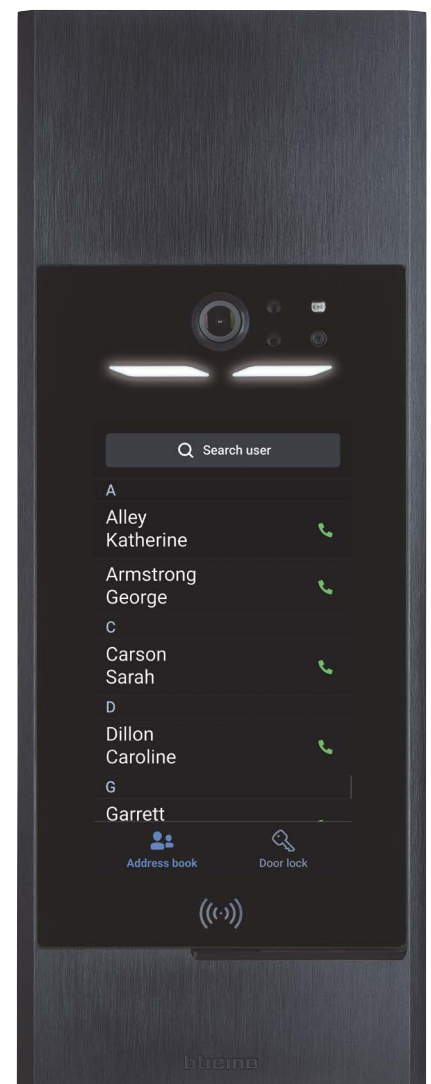

5 exclusive finishes
to add value to every
entrance.

Two finishes in the catalogue.

Aluminium

Nickel

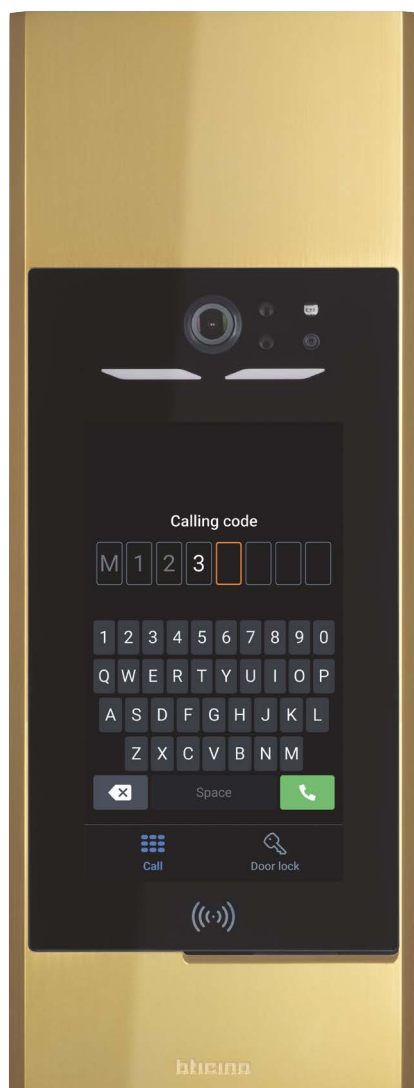

Find the solution for any room.

With 5 exclusive finishes in 60% recycled aluminium Linea 5000 can be easily adapted to all types of buildings, from contemporary of any size to classic architecture. Linea 5000 expresses robustness and high quality in every colour.

Three finishes on demand made to order or project.

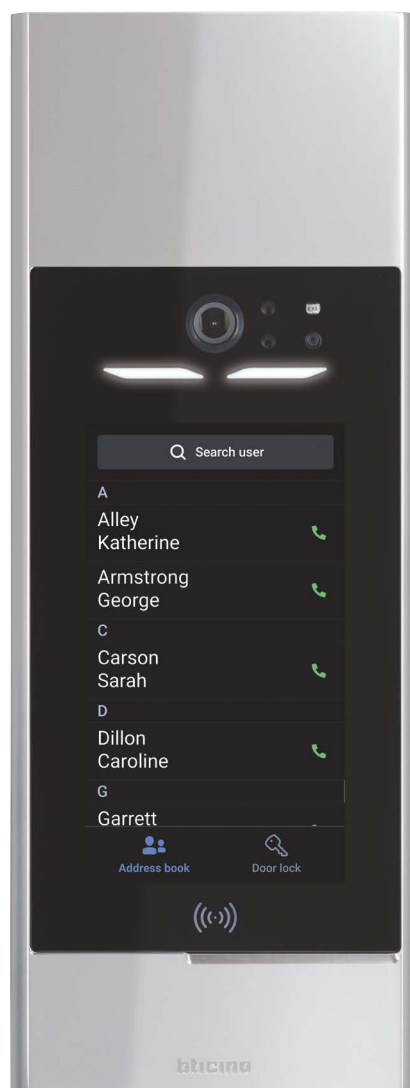

Gold

Titanium

Steel

Linea 5000

BTicino 2 Wires
technology.

No changes to your
working habits.
Same installation
rules as for the 2 wires
entrance panels.

Ideal for upgrading existing 2 wires video door entry systems (e.g. systems with Sfera entrance panels or traditional brass pushbutton panels). **Bring your old system to the digital era with the new Linea 5000.** Perfectly compatible with all the devices of the BTicino 2 wires video door entry system range: Classe 300X, Classe 100 and Classe 300EOS video internal units, power supply units and system accessories.

Wide angle HQ camera

Resolution: 5 Megapixel

Digital filters

Horizontal field of view: (119°)

Vertical field of view: (92°)

NOTE: video signal is transmitted to internal units via PAL encoding on 2-Wires BUS SCS technology.

Linea 5000 is suitable for all home environments.

With 2 wires technology and the possibility of customising the finish with the desired colour, logo and street number, it guarantees maximum adaptability in any living context.

Building

Apartment block

Villa

A sustainable approach

Only active when needed

The proximity and brightness sensors contribute to energy efficiency, as the screen only activates when needed, automatically and only when someone approaches.

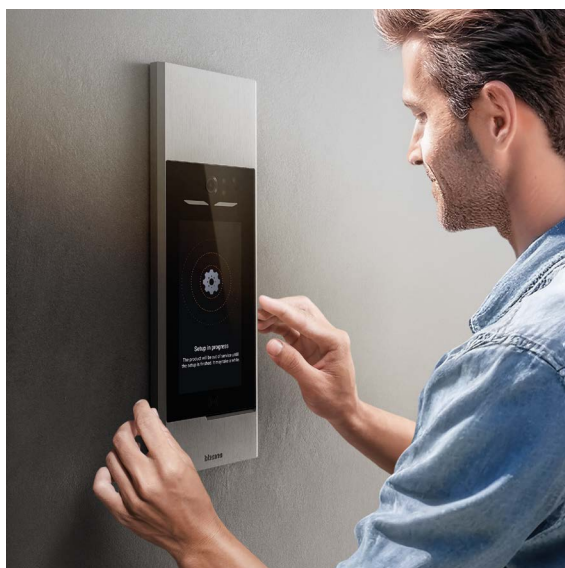

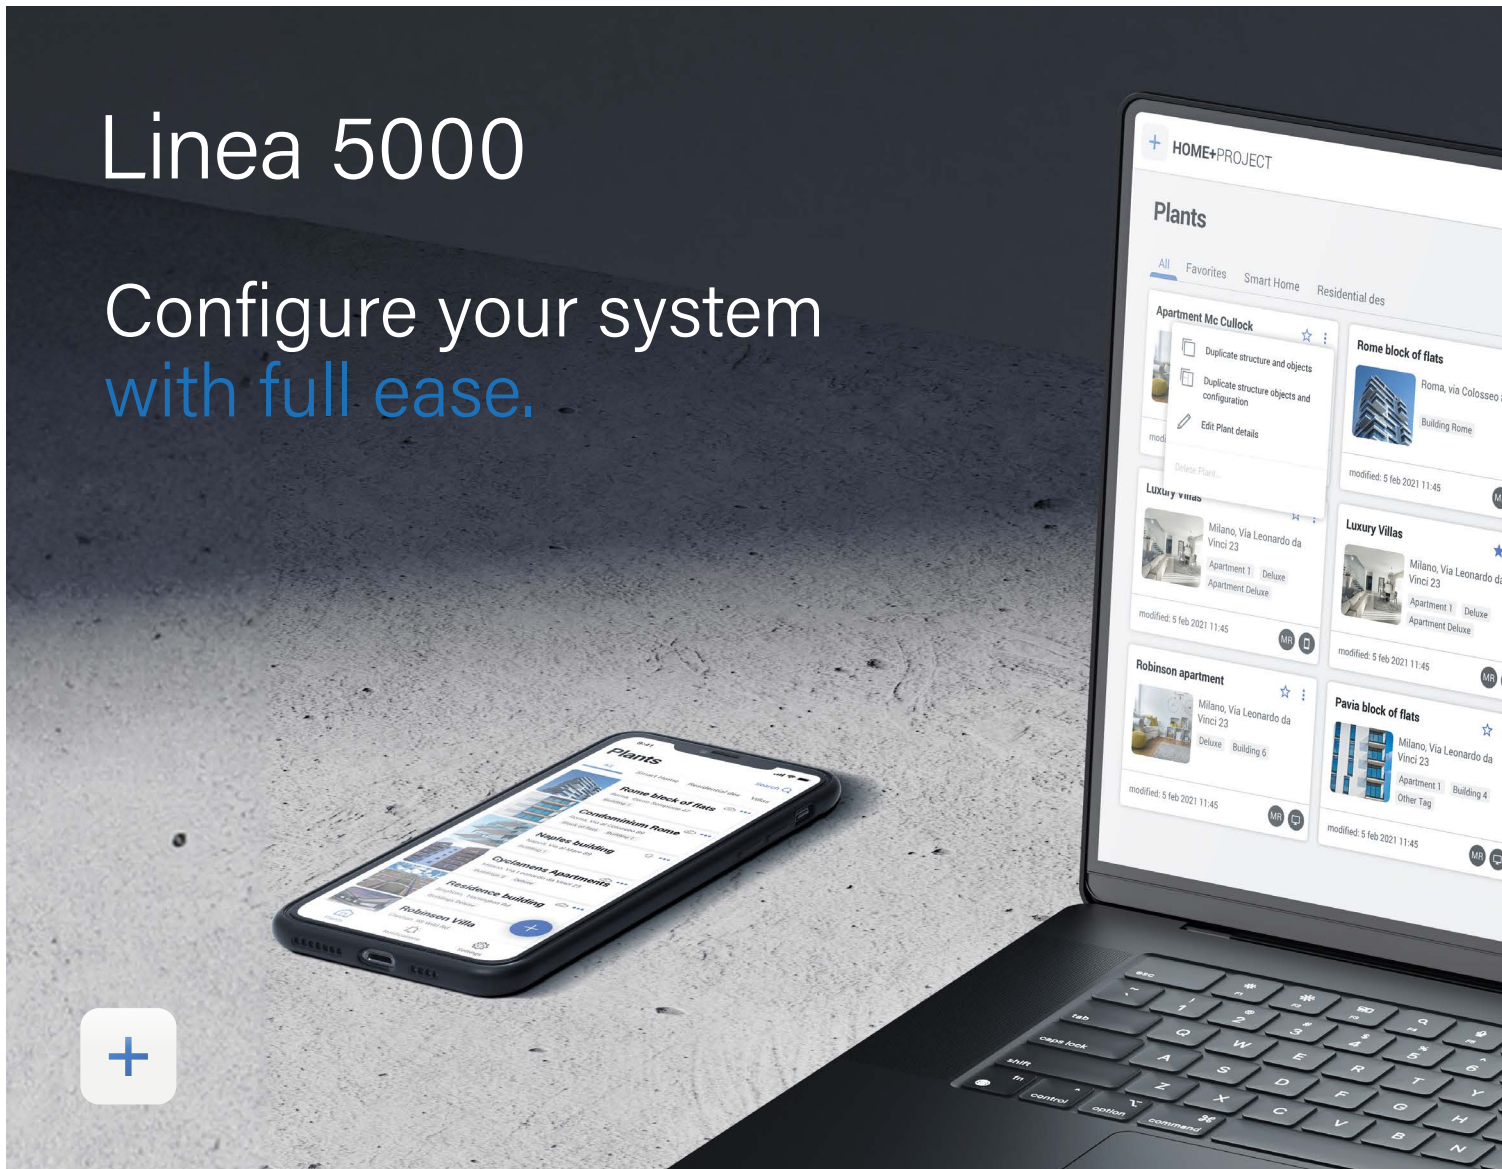

Recycled aluminium

The fixing frames of the Linea 5000 modules and the finishing frames are made of **60% recycled aluminium**.

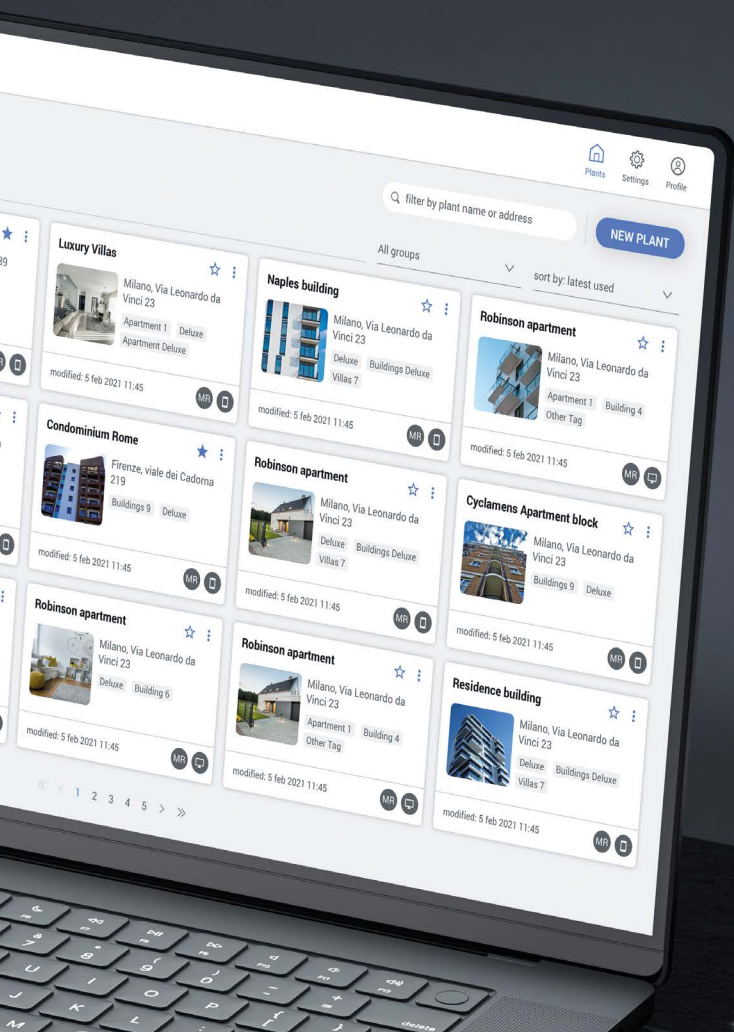

Linea 5000

Configure your system
with full ease.

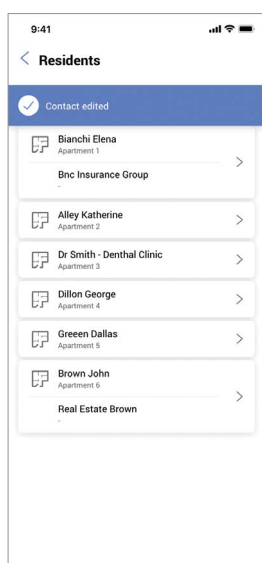

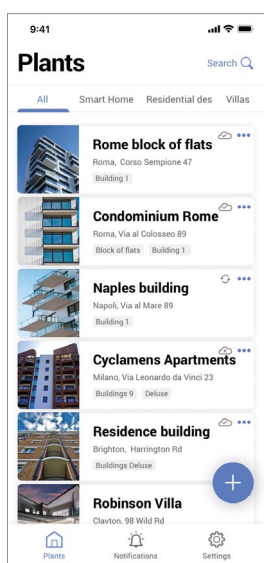

HOME + PROJECT. To digitally design, configure and customise the video door entry system

HOME + PROJECT - a new work tool for the installer. Available as a web app for Desktop PCs at <https://homeproject.legrand.com> and as a smart device mobile app for on-site configuration. Thanks to the App, creating, configuring, and fine-tuning the system has never been easier. The Web App for desktop allows you to create and configure the entire system directly from the office, with the convenience of importing files containing entire resident directories.

SMART REPOSITORY

HOME + PROJECT securely stores all your projects, allowing you to easily access your work from anywhere. Forget about searching for codes, local address book directories, and plant information: everything is centralized on H + P. Share your projects with colleagues or administrators quickly and securely, enhancing collaboration and increasing productivity. H + P is the ideal solution to save time and work more efficiently.

REMOTE ADDRESS BOOK EDITING

This digital tool helps simplify not only the configuration process, but also maintenance and customisation. Modify system parameters, update the address book and download the new entrance panel configuration, either remotely or directly on site via Bluetooth connection.

Linea 5000

Total adaptability.

The extensive customisation options, both physical and digital, bring unique freedom of expression. Possibility of customised finishes, with frames in assorted, logo and street number for total adaptability. All this makes Linea 5000 particularly suitable for **meeting the customisation requests from architects, design studios, real estate developers and customers.**

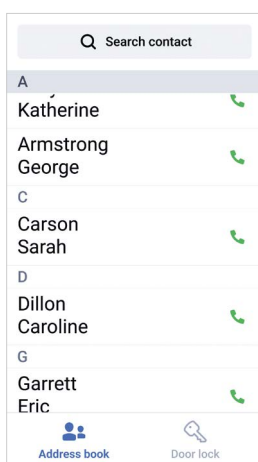

Physical customisation of the finishing frames

Using the specific online tool, it is possible to customise the finishing frames. Frames for customisation must be ordered using the specific custom part numbers (V/345101-02-03-04-05) - see the relevant catalogue pages.

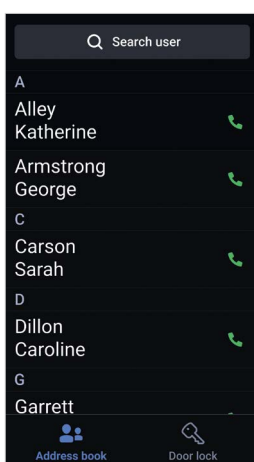

Digital customisation of the display

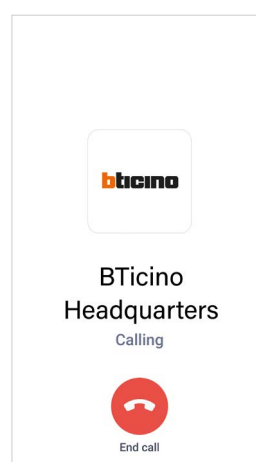

It is also possible to customise the display screens by changing the names of the residents in the address book, the display mode, adding a logo / address, as well as displaying messages for visitors/couriers, etc.

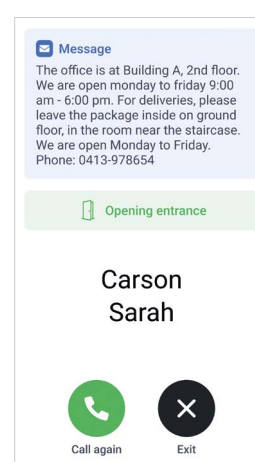

White mode: for clear and intuitive use.

Dark mode: protect your eyes and save battery life.

The logo of adds a very personal touch.

Customisable messages for Airbnb guests, couriers and visitors.

Linea 5000

Multiple call modes.
Smart call.

ADDRESS BOOK

with list of residents' names.

CALL WITH CODE (numeric or alphanumeric)

In this mode, in addition to the code you can also choose to have the address book.

APARTMENT BLOCK/RISER/FLOOR/ APARTMENT

Entering the exact address of the apartment to call in the system.

Multiple access modes. Smart access.

NUMERIC CODE

Pre-set.
(maximum of 5 access codes, also with date/time schedule).

RFID KEYCARD

Pre-programmed / registered.
Keycards available in different colours.

SMARTPHONE

With Home + Security App
via Bluetooth connection.

Home + Security

Linea 5000 - Catalogue

Display module and 3-module finishing frames

Item	Display module
345000	<p>7" vertical display module with wide-angle HQ camera (5 MP).</p> <p>Display and audio/video module to be combined with one of the 5 frames in different finishes for the creation of 2 wires systems. Equipped with an HQ camera with wide-angle field of view (119° horizontal - 92° vertical), white LEDs for lighting and twilight sensor for night vision. High-resolution 7" touch screen display with shatter-proof glass (IK08), anti-fingerprint and proximity sensor for automatic switching on. With a digital microphone and echo eliminator for optimal sound performance. The flexible and user-friendly graphic interface is adaptable to any type of apartment block and allows a choice of 3 different call modes: address book call (list of residents' names), numeric or alphanumeric code call and block-staircase-floor-apartment logic code call. The direct call to the guard station and the customisation of the homepage logos also make it suitable for solutions with concierge or for commercial establishments. With advanced features such as voice feedback, automatic theme change (light/dark), customisation of welcome messages or instructions and temporary access code forwarding, it is suitable for residents and visitors of all ages and abilities. It also supports different modes for accessing the building: lock release with display code, RFID badge or Bluetooth via the Home + Security App, the resident's app. Programming and configuration requires the use of Home + Project (App or PC), the digital tool for the professional. Using this tool, it is possible to complete the entire configuration at the office, share it with other professionals and upload it to the display module via Bluetooth. Changes to residents' names and access codes are quick and smart, either on-site (via Bluetooth) or remotely (if the module has an active WiFi or Ethernet connection). Installation with 3-module flush mounted box 350030 or with wall mounted box 345331 or 345332. The book-like opening of the module allows for easy wiring. It allows the activation of an electrical door lock directly connected to clamps S+ and S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and of connecting a local door lock release pushbutton on clamps PL.</p>

Item **Keypad modules**

- 345500 Additional keypad module in Aluminum finish**
Keypad module with aluminium key finish for door lock opening in 2-wire systems where there is at least one Linea 5000 display module (345000). The keypad module is fitted with relay contacts (C – NO - NC) and clamps (CP - P1) for the connection of a local door release pushbutton and can be programmed using the Home + Project app. It has a programming reset pushbutton, LEDS for the visual notification of the access status and night backlighting. The device, to be completed with an appropriate frame, can be used stand-alone or combined with a display module in a 3+1 composition. To be installed in 1-module flush mounted box 350010, in wall mounted box 345311 or with dedicated accessory 345341 for 3+1 composition.

- 345510 Additional keypad module in Nickel finish**
As 345500 but with NICKEL finish

1-module finishing frames

- 345201 1-module frame – Aluminum finish**
1-module frame in aluminium finish for electronic modules 345500 - 345510 - 345520 - 345530.
- 345202 1-module frame – Nickel finish**

As 345201 but with Steel finish

Item **RFID Smart access module**

- 345520 Additional RFID Smart access module**
RFID/bluetooth smart access module for door lock opening in 2-wire systems where there is at least one Linea 5000 display module (345000), using the badge or using the Home + Security App via bluetooth. The smart access module is fitted with relay contacts (C – NO - NC) and clamps (CP - P1) for the connection of a local door release pushbutton and can be programmed using the Home + Project app. It has a programming reset pushbutton, LEDS for the visual notification of the access status and night backlighting. The device, to be completed with an appropriate finishing frame, can be installed in 1-module flush mounted box 350010 or in wall mounted box 345311 or 345312.

Inductive loop module

- 345530 Additional Inductive loop module**
Inductive loop module to be used in conjunction with the display module Linea 5000 (345000). It allows people wearing hearing aids fitted with (T) selector to use audio door entry communication. In this mode, the hearing aid receives the audio signal directly from the amplification system, bypassing the microphone of the hearing aid itself, improving audio quality and reducing background noise. It is connected to the display module using the appropriate multicable supplied. To be completed with the appropriate finishing frame (available in 5 finishes) The device CANNOT be used stand-alone but only as additional module in conjunction with the Linea 5000 display (345000). To be installed in 1-module flush mounted box 350010 or with the dedicated accessory 345341 or 345342 for 3+1 composition.

352200

Item	Electronic modules
351000	BASIC speaker module for the creation of 2 WIRES audio systems. Fitted with speaker and microphone volume adjustment. It manages up to 100 pushbutton calls using additional double row pushbuttons. It allows the activation of an electrical door lock directly connected to clamps S+ and S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and of connecting a local door lock release pushbutton on clamps PL. To be completed with surround plate. The device must be physically configured.
351100	speaker module for the creation of 2 WIRES audio systems. Fitted with speaker and microphone volume adjustment. It can manage up to 100 pushbutton calls using the additional double row pushbutton modules. It allows the activation of an electrical door lock directly connected to clamps S+ and S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and of connecting a local door lock release pushbutton on clamps PL. Preset for additional power supply. Fitted with front LEDs for the notification of the operating status: door lock release, active communication, forwarded call, and busy system. Integrated optic sensor for the switching on of the night backlighting. To be completed with surround plate. The device can be configured either physically or using the PC and the specific software. - it can be downloaded free of charge from the website www.bticino.com
351500	Sfera audio/video module for the creation of 2 WIRES colour video systems. Fitted with 5 MP wide angle High-Quality camera with digital filters and white LEDs for the lighting of the shooting field. The HQ digital video signal is transmitted to internal units via PAL encoding on 2 Wires BUS SCS technology. Speaker and microphone volume adjustments. It can manage up to 98 pushbutton calls using the additional double row pushbutton modules. Horizontal angle of vision (119°), vertical angle of vision (92°). It allows the activation of an electrical door lock directly connected to clamps S+ and S- (18 V 4 A impulsive - 250 mA holding current 30 Ohm max) and the connection of a local door lock release pushbutton on clamps PL. Preset for additional power supply. Fitted with front LEDs for the notification of the operating status: door lock release, active communication, forwarded call, and busy system. Integrated optic sensor for the switching on of the night backlighting. To be completed with surround plate. The device must be configured physically or using a PC with the specific software, which can be downloaded free of charge from www.bticino.com

Item	Electronic modules
352000	additional 4-pushbutton modules arranged on single column. To be used with speaker modules 351000 - 351100 and with video module 351500. Connection using the appropriate multicable supplied. Backlighting of nameplates controlled by the speaker module or the audio/video module connected. To be completed with surround plate.
352100	additional 8-pushbutton modules arranged on double column. To be used with speaker modules 351000 - 351100 and with audio video module 351500. Connection using the appropriate multicable supplied. Backlighting of nameplates controlled by the speaker module or the audio/video module connected. To be completed with surround plate.
352200	nameplate module normally used for displaying the house number or other notifications (e.g. legend for calls using digital pushbutton panels, opening/closing times, etc.). Connection using the appropriate multicable supplied. Night backlighting controlled by the speaker module or the audio/video module connected. To be completed with surround plate.

SFERA

Sfera pushbutton panels - electronic modules

Electronic modules

- 352500 graphic display module** to be used with speaker module **351100** or with audio/video module **351500** (connection using the multicable supplied). It can operate in two modes: call from address book or digital call. The call from the address book gives the possibility of sending the call by scrolling on the display the names associated to the residents. It is possible to store up to 4000 residents names. Using the keypad module item **353000** it is also possible to directly call the apartment by entering the number corresponding to the resident. The digital call is also performed using the keypad module item **353000** by entering the numerical code. It is recommended that one or more nameplate modules, item **352200**, are installed at the side of the pushbutton panel to display the correspondence between the numerical codes and the names of the users. It is possible to program the names in the address book in two different ways: manual inclusion using the pushbuttons of the display module or inclusion using a PC with the specific software, which can be downloaded free of charge from www.bticino.com, by downloading the file to the display module (RECOMMENDED). System power supply cuts DO NOT cause the loss of memory data. To be completed with finishing front cover.
- 352700 module for inductive loop and control speech synthesis** to be used with speaker module **351100** or with audio video module **351500**. It allows use by hearing (equipped with T-selector) or visually impaired individuals, thanks to the synthesis of voice messages on the connection status (call in progress, end of call, no answer, busy, door open). It is connected to the speaker module using the appropriate multicable supplied. To be completed with surround plate. The device can be configured either physically or using the PC and the specific software. - it can be downloaded free of charge from the website www.bticino.com

Electronic modules

- 353000 Keypad module** for door lock release or for digital call to the apartment (in combination with display module). It's fitted with relay contacts (C – NO - NC) and clamps (CP - P1 - P2) for the connection of a local door release pushbutton. The numerical code for the opening of the door lock can be programmed using the keypad itself, or using a PC after downloading the module programming file. It also has a programming reset pushbutton and LEDS for the visual notification of the access status. Night backlighting with LEDs. To be completed with surround plate. It is connected to the other modules using the appropriate multicable supplied. The device may also be used as a stand alone unit with independent power supply and operation, only for door lock release. Configuration performed using physical configurators, or a PC with the specific software, which can be downloaded free of charge from www.bticino.com
- 353200 RFID key card reader module** for the release of the door lock by swiping the key card. It manages up to 20000 key cards. It's fitted with relay contacts (C – NO - NC) and clamps (CP - P1 - P2) for the connection of a local door release pushbutton. The key card for the release of the door lock can be programmed from the module itself, or using a PC after downloading the module programming file. It also has a programming reset pushbutton and LEDS for the visual notification of the access status. Night backlighting with LEDs. To be completed with surround plate. It is connected to the other modules using the appropriate multicable supplied. The device may also be used as a stand alone unit with independent power supply and operation. Configuration performed using physical configurators, or a PC with the specific software, which can be downloaded free of charge from www.bticino.com
- 346993 The key expansion module** gives the possibility of connecting the call key to the SFERA speaker modules (items **351000**; **351100**; **351500**). Each module can manage up to 8 call keys It is possible to connect several key expansion modules (max 96 call keys for each entrance panel)
- Door lock release transponder and card for Sfera entrance panels and programmer**

 - 348200** door lock release keycard - black
 - 348201** door lock release keycard - red
 - 348202** door lock release keycard - green
 - 348203** door lock release keycard - blue
 - 348204** door lock release keycard - orange
 - 348205** door lock release keycard - grey
 - 348206** door lock release keycard - yellow
 - 3547** door lock release customisable keycard (ISO 50 x 80 mm)
 - 348402** tabletop key card programmer

2 WIRES SYSTEM

Entrance panel

LINEA 3000

LINEA 3000

One entrance panel for every need

LINEA 3000 can be configured both for 1 and 2 family house

ONE FAMILY HOUSE

- Write the name on the one family nameplate label (supplied with the product).
- Set the internal micro-switch on position 1.

TWO FAMILY HOUSE

- Replace the nameplate label with the two family one (supplied with the product).
- Write the names on the two family nameplate label
- Set the internal micro-switch on position 2.

LINEA 3000 inside of the professional kits

For **ONE FAMILY** house installation, you have to buy only the kit and all you need is inside it.

For **TWO FAMILY** house installation, you have to buy the kit + an additional 2 wires internal unit. (refer to 2 wires system internal units range).

High installation flexibility

- **LINEA 3000** is sold for wall mounting installation but with the dedicated **accessories** (to be purchased separately), you can use the entrance panel for **flush mounting installation**.

Also available in black version.

Ideal for renovations.....you can reuse the existing flush mounted box. Same 2 Modules Tersystem and SFERA flush mounting box.

- **LINEA 3000** can be wall mounted with the dedicated **rainshield accessory** (to be purchased separately).

Also available in black version.

CLASSE300X

Simple for everyone. Perfect for you.

Classe 300X

One smart concept,
just two keys.

The new Classe 300X video internal unit has been designed to offer unprecedented interaction simplicity, redefining the user experience in the residential video door entry system sector.

Classe 300X

Advanced technology
accessible to everyone

Classe 300X: designed to be simple and straightforward for anyone.

The Classe 300X video internal unit integrates a 7" touch screen display with 1024 x 600 resolution for sharp, high-quality images. Thanks to the integrated digital echo canceller, audio is crystal clear and free of interference. The dual-band Wi-Fi 6 (2.4 GHz and 5 GHz) connectivity ensures even faster and more stable remote control, fully integrated with the BTicino Home+Security App.

Home + Security App

Classe 300X

Dark
finish

Essential design, absolute elegance.

The Dark finish enhances the refined lines of the Classe 300X, with a full screen glass surface that provides an immersive and contemporary visual experience. A perfect balance of technology and style for every modern environment.

Classe 300X

Light
finish

Classe 300X in Light finish **exhibits an understated and homely elegance.** More traditional than the Dark version, the white look fits naturally in domestic environments, conveying a sense of continuity, tradition and reassuring familiarity.

Classe 300X

Every detail speaks sustainability

Every material, every component and every detail stem from a precise idea: reduce environmental impact and enhance value. It's not just efficiency; it's a new concept of responsibility where every improvement, even technical, is a step toward a sustainable future.

Materials that are reborn: glass and recycled plastic.

The shell is designed to last and to be environmentally friendly.

Dark version: made from more than **80% mechanically recycled plastic**, to give new life to existing materials.

Light version: **more than 25% chemically recycled plastic**, a choice that allows high technical performance but with less environmental impact.

Glass: a recyclable material, synonymous of transparency and quality.

Zero plastic, all substance: 100% plastic-free and FSC-certified packaging.

Packaging made from paper and cardboard.
100% plastic-free.

FSC mix certification, guaranteeing a responsible supply chain and sourcing from sustainably managed forests.

Efficiency that puts less strain on the environment: reduced consumption and lighter components.

A more efficient design even in invisible moments:
-31% stand-by consumption compared to the previous model. Silent saving that reduces waste and environmental costs.

CO₂ under control.

A life cycle designed to put less strain on the environment:
-33% CO₂ emissions compared to the previous model. Result achieved through lower consumption, lighter electronic components and display, and the use of recycled materials.

>80%
of recycled plastic
in the Dark version

100%

344743

344632

346020

Item **Classe 300X video internal unit - Light finish**

344742

2 wires/Wi-Fi hands-free connected video internal unit, Light finish, with 7" horizontal touch screen LCD display, resolution 1024 x 600 pixel. Featuring two physical keys for answering/ending calls, entrance panel activation, and controlling the electric door lock.

The remaining video door entry system functions e.g. entrance panel activation, camera scrolling, additional door lock activation, video door entry system answering machine, staircase light control, intercom etc. are managed via specific menus and touch display.

Featuring a digital echo canceller for better audio quality. LED visual signals for: Wi-Fi network connection status, info / notifications and call exclusion. Using the touch display, it is possible to access the notification list, as well as your favourite door entry controls. Advanced 'Professional Studio' and 'Do Not Disturb' functions: customisable and schedulable by day/time. Possibility of voice communication with the switchboard - if present in the system - after a specific call. The device must be configured by physically connecting the configurators, or using the menu and the touch display, which will give better possibilities of customisation of associated functions and texts.

Thanks to the Wi-Fi 6 connectivity, the video door entry system can connect to 5 GHz or 2.4 GHz band routers to take advantage of the functions available on the Home + Security App (available for Android and iOS): call reception, door lock release, event timeline display, entrance panel activation, camera scrolling and advanced «Professional Studio» and «Do Not Disturb» functions.

Using the Home + Security App, it is also possible to manage products from Netatmo security offering. 15 different ringtones available.

Wall mounted installation using the bracket supplied and tabletop installation (with support 344632) to be purchased separately.

Made with over 25% chemically recycled plastic. Designed, engineered, and manufactured in Italy.

Item **Classe 300X video internal unit - Dark finish**

344743

As the video internal unit 344742 but with Dark finish. Made with over 80% mechanically recycled plastic.

Tabletop support for Video internal unit

344632

Accessory support for the tabletop installation of the Classe 300X video internal units (344742 – 344743).

2 DIN additional power supply

346020

Additional 2 DIN power supply to be used to supply Classe 300X video internal units locally using the clamps (1 – 2).

344842

2 wires/Wi-Fi handsfree connected video internal unit white finish with built-in Amazon Alexa voice assistant, 5" vertical touch screen LCD display and video door entry answering machine. Integrated SCS Server for managing MyHOME wired systems. It can be used alternatively to the SCS Server DIN Item MhServer 1. It has a physical key for door lock release and capacitive keys for the control of the main video door entry functions: handsfree communication, entrance panel activation / camera scrolling and Favourite key (can be configured to activate the quick actions most frequently used – e.g. additional door locks, staircase light control, intercom).
 There are notification LEDs for:
 Wi-Fi network connection status, info / notifications and call exclusion. It is possible to easily interact with the built-in Alexa voice assistant, either using the dedicated capacitive keys or with your voice, and activate several functions, such as the video door entry functions, Smart Home, scenarios, reminders etc. Using the touch display, it is possible to access the notification list, as well as your favourite door entry, security and Smart Home controls (if any). The device must be configured by physically connecting the configurators or using the menu, which will give better possibilities of customisation of associated functions and texts. Thanks to the Wi-Fi connection, you can associate the video internal unit to the Home + Security App (available for Android and iOS). The App allows to use the main video internal unit functions (receiving calls, door lock release, display of the event timeline and activation of the entrance panel/camera cycling). Through the Home + Security App, it is also possible to manage the products of the Netatmo security range. This allows you to quickly and easily create a Smart security system. Wall mounted installation using the supplied bracket. Possibility of Wi-Fi connection or using RJ45 ethernet cable with the dedicated accessory 344844.

Item **CLASSE 300EOS with Netatmo connected video internal unit - black finish**

344884

Same as 344842 but in Black finish.

Ethernet accessory

344844

Accessory cable for the wired connection of the Classe 300EOS video internal unit using an RJ45 Ethernet cable. To be purchased separately.

2 DIN additional power supply

346020

Additional 2 DIN power supply to be used to supply the connected CLASSE 300EOS video internal units (344842 - 344884) locally, when required.

Internal units

Classe 100

Classe 100 X16E

Now the standard is connected

BTicino introduces Wi-Fi connectivity to the standard video door entry segment.

BTicino renews the range of **Classe 100** indoor units by introducing Wi-Fi connectivity in the standard video door entry system offer. The result is a range of video and audio indoor units with a modern and elegant design, capable of meeting all installation needs.

Built-in connectivity for constant connection with the home.

Up to 22 apartments without dedicated power supply.

Immediate association with the Home + Security App.

Ideal for the refurbishment of old door entry systems.

No extra work for the installer; easier to use for the end user.

After being connected to **Classe 100X**, the smartphone becomes an "additional virtual video indoor unit" that can be used to answer calls, activate the opening of the door locks and activate the system cameras.

Item	Smart Original outdoor cameras
------	--------------------------------

392050

Original outdoor camera

The Intelligent Outdoor Security Camera offers advanced detection of people, animals and vehicles. It features a robust monobloc aluminium structure with a white finish and is made of ultra-resistant UV-protected glass and plastic materials. The 5 MP video sensor and 2K resolution enable H.264 encoding, ensuring efficient streaming and storage. The camera provides long-distance detection up to 20 metres, with a wide viewing angle of 130° and 16x digital zoom for detailed video analysis. An integrated microphone allows real-time audio monitoring, while the 12 W LED spotlight offers adjustable brightness for optimal visibility. Infrared night vision ensures clear images even in low light up to 15 meters. Access to the camera is protected by end-to-end encryption thanks to the Home + Security App. Designed specifically for outdoor use, the device is weatherproof and benefits from HZO protection for increased durability. Connectivity is provided by dual-band Wi-Fi, compatible with both 2.4 GHz and 5 GHz frequencies.

392051 As 392050 but with black finish.

392060 **Original outdoor camera with PoE**

The intelligent outdoor security camera combines high-performance technology and refined design, providing reliable surveillance in any environment. The monobloc aluminium body with white finish ensures exceptional durability, while the ultra-resistant glass and plastic components offer robust UV protection. Equipped with a 5 MP video sensor and 2K resolution ($\approx 2560 \times 1440$), the camera delivers sharp, detailed images. Long-distance detection – up to 20 m – enables precise identification of people, animals, and vehicles, supported by a 130° field of view and 16x digital zoom. The integrated microphone allows real-time audio monitoring, while the integrated LED spotlight (12 W) with adjustable intensity improves visibility. Infrared night vision extends up to 15 m, ensuring reliable performance even in total darkness. Access is encrypted and safely managed through the Home + Security App. Designed for outdoor use, the camera features HZO waterproof protection and connects via Power over Ethernet (PoE).

392061 As 392060 but with black finish.

Item	Smart Advance indoor cameras
------	------------------------------

391950

Advance indoor camera

Advance indoor camera with facial recognition optimised by artificial intelligence (AI). Smart shutter for privacy and filming only of strangers. Wi-Fi connection. Access to images live via smartphone and the Home + Security App. It can be combined with the indoor siren item NIS01-PRO to create a customised alarm system. Compatible with Alexa, Apple Homekit and Google Assistant. Adjustable monobloc body in painted aluminium. White colour.

391951 As 391950 but with black finish.

391952 **Advance indoor camera**

Indoor camera 391950 + accessory for installation with 3-module box with depth of at least 40 mm or BTicino 503E and PB503N boxes - white colour.

391953 As 391952 but with black finish.

391954 **PoE adapters**

PoE adapter to exclusively power and connect 391950/51 indoor cameras using a single cable to ensure a reliable and stable wired connection. White colour.

391955 As 391954 but with black finish.

391956 **Mounting accessories in 2-module boxes**

Accessory for installing the Advance indoor camera on a 2-module box with at least 40 mm depth. Also compatible with the BTicino 502E and PB502N boxes - white colour.

391957 As 391956 but with black finish.

CAUTION: The items are expected to be available during 2026. Please check with your technical sales representative.

Home + Security
App

NIS-01-PRO

NSA-PRO-EU

NCO-PRO

Smart indoor siren

NIS-01-PRO

Smart indoor siren with 110 dB alarm, pre-recorded sounds and vibration sensor for tamper detection. Battery power supply or with a cable (not supplied) using the USB micro port. It only works with the smart indoor camera and must be installed in the same room: Bluetooth Low Energy (BLE) wireless connection with the smart indoor camera. Declaration of conformity and FCC declarations. Open-source compatibility. Operation using the Home + Security app.

Smart smoke detector

NSA-PRO-EU

Smart smoke detector with 85 dB alarm, high performance photoelectric sensor, average coverage 50 m², notifications on the smartphone through the Home + Security App

Smart carbon monoxide detector

Item

NCO-PRO

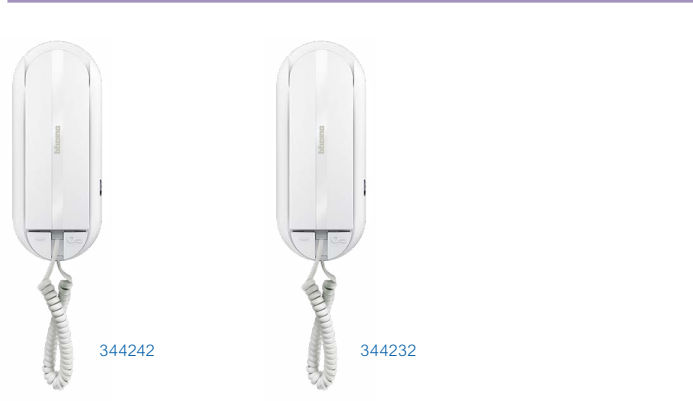

Intelligent wall-mounted carbon monoxide detector. Monitors combustion appliances (boiler, fireplace, wood stove, gas cooker, etc.) by measuring carbon monoxide levels in real time. When carbon monoxide is detected, it triggers its 85-decibel alarm and sends a real-time notification to the smartphone. Featuring a 10-year battery: the maximum lifespan for all carbon monoxide detectors. The Auto-Test function checks for correct operation. If a problem is detected, it sends a notification to the smartphone. Reliability guaranteed by CE (EN 50291) and NF certifications. Standalone device, no hub required. Compatible with Apple HomeKit. Operation using the Home + Security app. Requirements: it needs high-speed wireless internet connection. Public hotspots are not supported. The intelligent carbon monoxide alarm will detect carbon monoxide and emit a sound alarm even if the Wi-Fi is not configured. However, Wi-Fi is required to receive smartphone alerts. Wi-Fi 802.11 b/g/n (2.4 GHz), Open/WEP/ WPA/ WPA2-Personal, Bluetooth Low Energy (BLE)

2 WIRES SYSTEM

Internal units

SPRINT L2

Item	Sprint L2 audio handsets
344242	2 WIRE audio handset (without the possibility of fitting with accessories) for audio systems and mixed audio / video systems. Wall mounted installation without the need of accessories. With door lock release key and auxiliary functions key (that can be configured). Ringtone volume adjustable on 3 levels. White
344232	As item 344242 but with call to the floor function

Universal analogue audio handset

Item	Universal analogue audio handset
334262	Universal audio handset that can be installed in BTicino analogue (1 + n) and (4 + n) systems. Compatible with most competitors analogue systems. It has a lock release button and it is designed for the installation of 4 buttons accessory (Item 337430) for additional functions. Volume adjustment on 3 levels.

Dimensional data

Size in mm

1 Simple and modern design

2 Ringtone volume, adjustable to 3 levels

3 Two pushbuttons:
- door lock release
- available for applications
(e.g. control of staircase lights)

Internal units

Porter switchboards

346310

SP122

346300

Item **Switchboard and accessories**

346310 Switchboard for 2 WIRE audio and video systems. Allows access to various services (video door entry functions, door lock/staircase light management and apartment alarm monitoring) directly from the keypad or via the intuitive icon menu. The switchboard is supplied with an integrated table supporting frame and also features a 7" colour LCD display, receiver and speaker phone, dedicated keys for the main functions and keys which can be configured. The programming can be carried out directly from the device or via PC with TiSwitchBoardDevice software (supplied). The device can manage the phonics of the riser EP (i.e. wired downstream of interface **346851**); it cannot however manage the apartment EP (i.e. wired downstream of interface **346850**). The use of an additional power supply is recommended. It is possible to connect up to a max. of 16 switchboards (configured from 0 to 15).

336982 White 8-way socket for table top installation of switchboard item **346310**

336803 8 – Way cable with connector for the table top installation connection.

SP122 Spare part handset and cord for 2-wire table guard station **346310**.

Item **SOFTSWITCHBOARD software**

346300 Switchboard software for the management of audio and video door entry system calls. The software (Windows operating system compatible) can be installed on any desktop or laptop PC, and gives the possibility of receiving, managing and transferring the calls from the entrance panel and the handset. It implements home video monitoring, with cyclical display of the cameras, night and day functions, and the possibility of displaying the alarms in the various apartments.
 - Supported operating systems:
 Microsoft Windows XP Service Pack 2, Windows Vista and Windows 7.
 - Software required:
 NET Framework 3.5 or higher

Item	Power supplies
346050	Power supply for 2 WIRES system in 6 DIN modular enclosure. Power supply 110 – 240 Vac @ 50 – 60 Hz. The output provides two power supplies in very low safety voltage (one on the 3 TK BUS, IU BUS and SCS clamps, one on the 1 - 2 clamp) to be used alternately and NOT at the same time. To be used in audio, video or mixed audio video systems. The video adapter is integrated in the device (item 346830 must not be used). It is therefore possible to avoid the use of the A/V node (F441) or the Multi-channel Matrix (F441M), if three junctions (MAX 2 IU + 1 TK risers or 1 IU + MAX 2 TK risers) are not exceeded in total from the clamps. It can also be used as additional power supply (1 - 2 output) for the local power supply of the preset internal units or entrance panels (in this case it is not possible to use other outputs). The device is electronically protected against overload and short circuit. It is a SELV double insulation safety device. The installation must be made in compliance with current regulations. The device must not be configured. WARNING: the (IU BUS), (TK BUS) and (SCS) outputs can be used at the same time respecting the total maximum absorption of 1.2 A. WARNING: Disconnect the power supply for 5 minutes after overload or short circuit.
346040	Power supply for 2 WIRES audio systems in 6 DIN modular enclosure. Power supply 110 – 240 Vac @ 50-60 Hz. The output provides 26 Vdc low rated voltage, and a maximum rated current of 600 mA and it is protected on the PRI side (with fuse) against overload and short circuit. It is a SELV double insulation safety device.
346030	Mini power supply with integrated video adapter to make small 2-WIRES video systems (intercom). 2 DIN modular enclosure. Power supply 230 Vac @ 50-60 Hz. The output provides 27 Vdc continuous low voltage, with maximum current of 600 mA and it is protected on the PRI side (with fuse) against overload and short circuit. It is a SELV double insulation safety device.
346020	Additional power supply to be used to supply the set up entrance panels and internal units locally. 2 DIN modular enclosure. Power supply 230 Vac @ 50-60 Hz. The output provides 27 Vdc continuous low voltage, with maximum current of 600 mA and it is protected on the PRI side (with fuse) against overload and short circuit. It is a SELV double insulation safety device.

Item	Video mixers
F441	Audio video node in 6-DIN modular enclosure set up with 4 input terminals and 4 output terminals. Can connect up to 4 source devices (entrance panels or cameras) in input and up to 4 2-WIRES video risers in output. The device must be used with the system power supply 346000. It must be used as an alternative to the audio video adapter 346830
F441M	Multi-channel matrix in 10 DIN modular enclosure. Set up for the connection of video entry system entrance panels, cameras and sound system sources in input and internal units and amplifiers in output. 4 inputs are dedicated to entrance panels/cameras and 4 to the sound system sources. It can be used to create multi-channel sound systems. The device must be used with the system power supply 346000. In the systems it replaces the video adapter 346830 and the audio video node F441
System interfaces	
346850	Apartment interface in 4 DIN modular enclosure. Can interface a dedicated apartment video door system with local CCTV, sound system and control of the Home automation applications to a 2-WIRES riser. The device must be configured using physical configurators
346851	System expansion interface in 4 DIN modular enclosure. Can double the length of the entrance panel-internal unit line, create risers with independent sound and expand the performance of the apartment system. The device must be configured using physical configurators

354000

Item	Interfaces with other BTicino systems
346150	8/2-WIRES interface in 6 DIN modular enclosure. Can make mixed video door entry systems (8-WIRES digital backbone/2-WIRES risers). The device must be configured using physical configurators
349410	Analogue/2 WIRES interface in 4 DIN modular enclosure. Can interface a dedicated apartment 2-WIRE video door entry system with cameras and control of the MyHOME applications to an analogue riser, digital 8-WIRES, audio TERSYSTEM and VIDEOPORTER 2000.
DIN actuators	
346210	Relay actuator in 2 DIN modular enclosure. Can switch on lights, open gates, repeat the call on bells (MOD=SLA) or control other devices from the video internal units. The device must be configured using physical configurators
346230	Door lock relay actuator in 2 DIN modular enclosure. Can supply power and activate an electrical door lock. The device must be configured using physical configurators
346260	Timed door lock relay actuator in 4 DIN modular enclosure. Can switch on lights, open gates or manage electro-magnetic door locks, timed door opening and door lock status (with NC contact). The device must be configured using physical configurators

Item	Devices in basic enclosure
346841	Floor shunt with 4 outputs Can make 2-WIRES video door entry systems with star wiring distribution. The device automatically adapts the video signal. Its small size means it can also be placed inside the flush-mounted box
346833	Call to the floor interface. By connecting a traditional pushbutton, the following functions will be possible: general call to the floor, addressed call to the floor, staircase lights on, and door lock release (specific actuator needed) and association of the video image to the call to the floor. The device must be configured using physical configurators
347400	Interface for the conversion of the coaxial signal into a 2 WIRES BUS signal. It can be used to connect to the BUS of the 2 WIRES video door entry system a camera with coaxial video output powered at 12 Vdc, with maximum absorption 150 mA and 1 Vpp video output (75 Ω). The device must be configured using physical configurators
Wiring accessories	
346870	2 WIRES video amplifier. In video systems wired using non-twisted wires, where the distance between the entrance panels and the internal unit exceeds 50 metres, it enables increasing such distance to up to 100 metres
346250	Relay module for gate opening to be used with LINEA 2000, LINEA 3000, MINISFERA and SFERA pushbutton panels. Can open door locks (NOT managed by BUS) by means of the entrance panel
3499	Line terminator. To be used to terminate the riser or apartment line, when the last installed device is not fitted with line closing micro switch
354000	Flat cable for the connection of several SFERA NEW and SFERA ROBUR pushbutton modules. Length 470 mm

346994

 336904
336905

3515

3501/1

3501K

Item	Universal speaker unit and expansion module
346991	The universal speaker unit can be used to install the 2 WIRES audio system in new or refurbished systems, where pushbutton panels of other manufacturers are present or required (mail boxes, patterned brass, compact sheet metal units, etc.), preset for a traditional speaker module (e.g. 2659N). The universal speaker unit has, as base, contacts for the connection of 8 call keys; to make systems with more keys (up to 56 using the 346000 power supply and up to 24 with the 346010 power supply one or more key expansion modules must be used (1 every 8 pushbuttons).
346992	Expansion module for connecting more than 8 call keys to item 346991 - max. 6 modules (56 calls max.) with power supply 346000. Max. 2 modules (24 calls max.) with power supply 346010

Item	Universal speaker unit with built-in relay
346994	Universal speaker unit with built-in relay (for controlling an electric door lock), designed for the installation of the 2-WIRES audio system in both new and refurbished setups where "special" pushbutton panels are present or required (such as mailboxes, patterned brass, compact sheet metal units, etc.) that are pre-configured for a traditional speaker module (e.g., 2659N). The universal speaker unit includes terminals for connecting up to 4 call pushbuttons and 1 local door release pushbutton. For systems with more than 4 call pushbuttons, it is necessary to add item 346993, with 1 unit required for every 8 pushbuttons (up to a maximum of 100 pushbuttons). The multi-cable with 2 connectors supplied with item 346993 must be used for the connection. Microphone sensitivity and speaker volume can be adjusted using dedicated potentiometers. The microphone of the speaker unit can be detached and placed at a distance of up to 15 cm from the device. In video systems, the device must be paired with cameras featuring coaxial output using interface 347400.

Item	Cable for systems
336904	Specific cable for 2 WIRES video door entry applications with 2 twisted conductors. It can be installed in underground piping, in accordance with standards (CEI 20-13 and CEI 20-14). It ensures the best performance in video systems (higher distance between EP and Handset when compared with other cables). 200 m coil
336905	Specific cable for BUS / SCS unshielded, consisting of a white outer sheath and 2 flexible conductors twisted together with a cross section of 0.50 mm ² . Halogen-free low-toxicity cable; ideal for applications in environments where greater regard is required for safety in the event of fire (halogen free). 400 V insulation. Compliant with standards: EN 50575 EN60811, EN50289, EN50290, EN60228, 50265-2-1, EN50395, EN50396. Cable not suitable for burial. Coil length 200 m. Fire reaction class according to CPR regulation: Ccas1b, d1, a1.

Item	Spare part terminal/clamp
3515	Spare part terminal/clamp for BUS connection of the predisposed devices

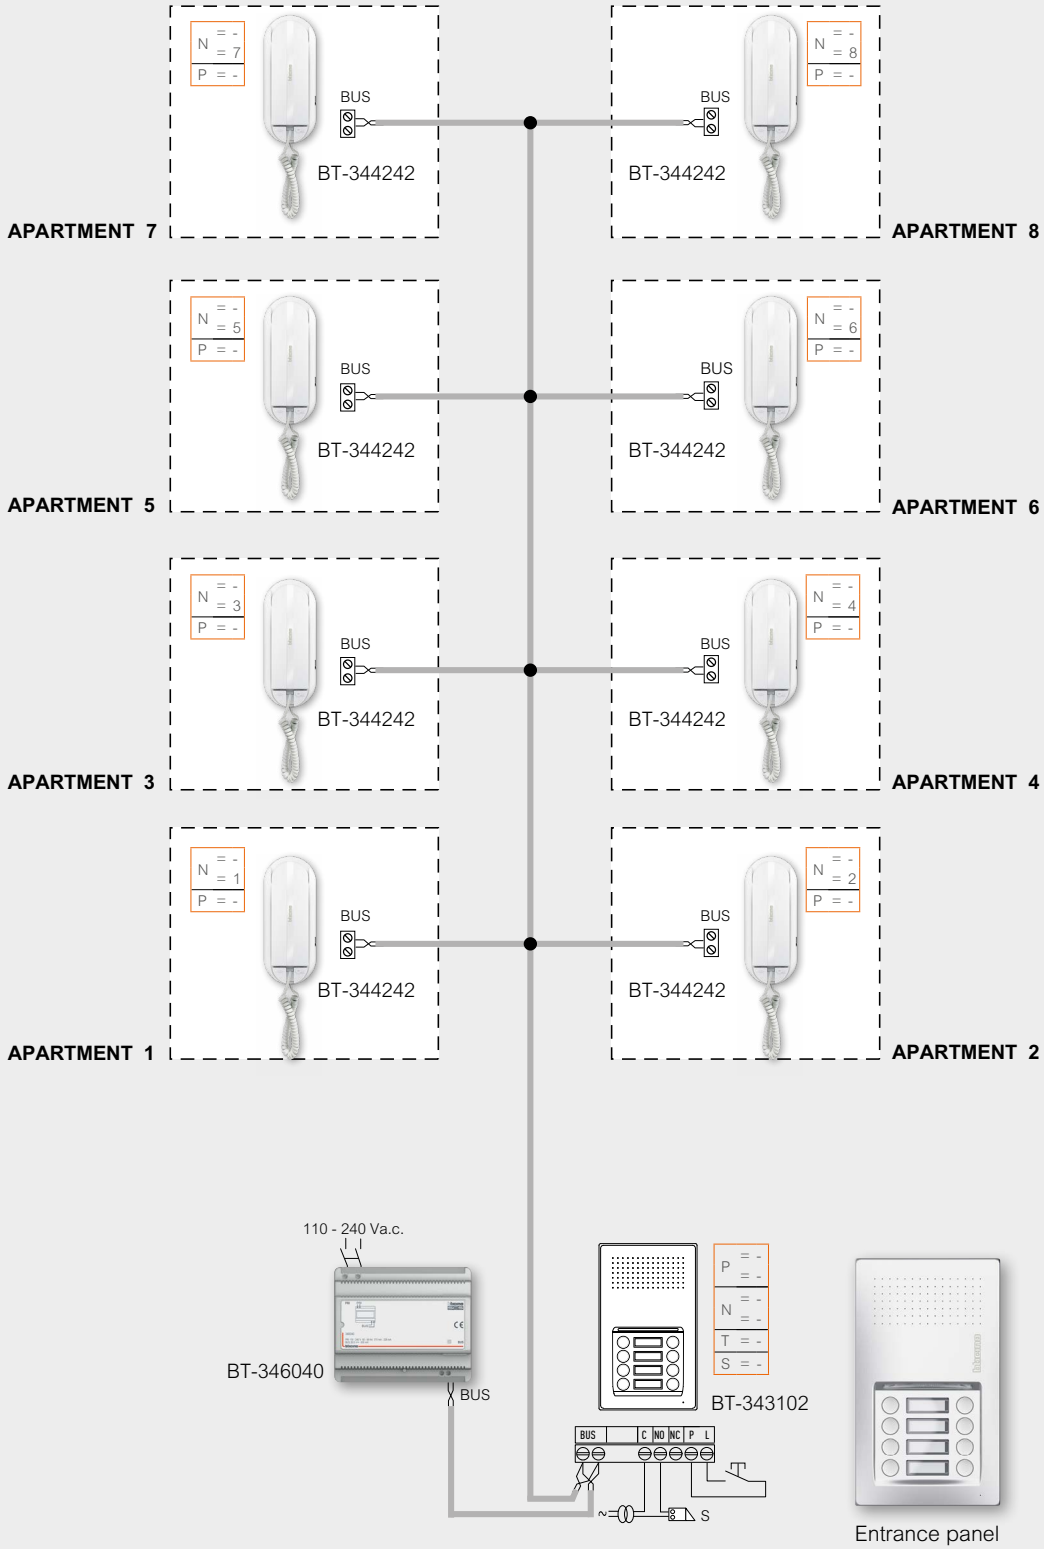

Item	Configurators (package of 10 pieces)

IP SYSTEM

For the best performance

The perfect solution for large residential complexes with a high number of apartments, able to guarantee high performance, long distances and high video signal quality.

Wide range of products with flexible and scalable solutions to satisfy every building needs.

Entrance panel

Video indoor unit

Guard station

reddot winner

MAIN PERFORMANCES AND FUNCTIONALITIES

Multichannel: for simultaneous conversations (no busy lines);

High definition video quality: up to 1280 x 720;

Technology: IP protocol (SIP/TCP);

Cables: FTP and UTP (CAT5 - CAT5E - CAT6) - Fiber optic

Configuration: easy and quick configuration with dedicated software;

Integration: Onvif IP Cameras, Lift control, Alarm sensors;

App Home + Security: incoming calls answering and door locks activation by smartphone;

App Home + Control: Smart Home & Home Automation integration.

Multiple ways to CALL THE APARTMENT

- 1. STANDARD CALL**
Area-Building-Riser
Floor-Apartment
- 2. ALPHANUMERIC CALL**
Create codes
with numbers and letters
- 3. ADDRESS BOOK**
With contact list
(touch displays only)

ACCESS

the building in several ways

FACE RECOGNITION

FINGERPRINT

RFID CARD AND BADGE

ACCESS CODE

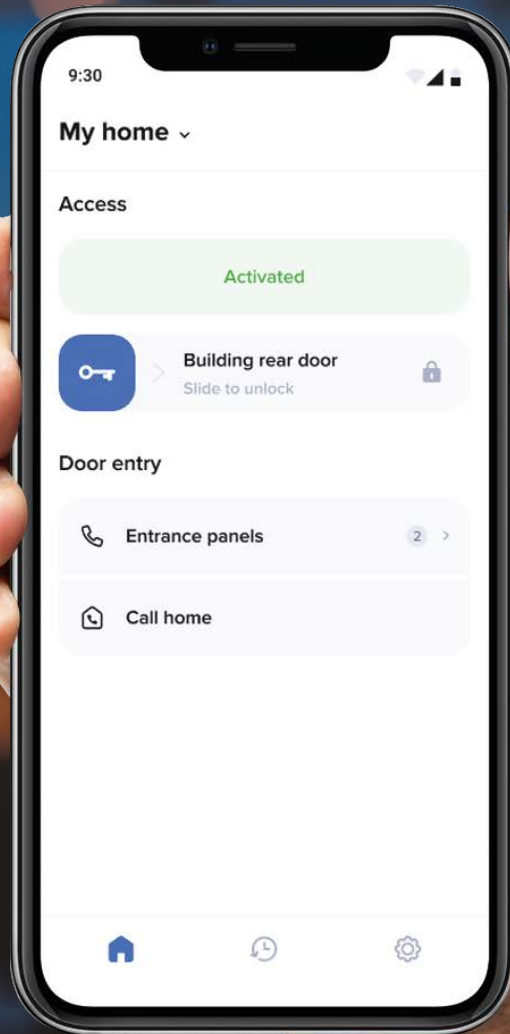

SMARTPHONE

HOME + SECURITY

Always aware with the Home + Security App

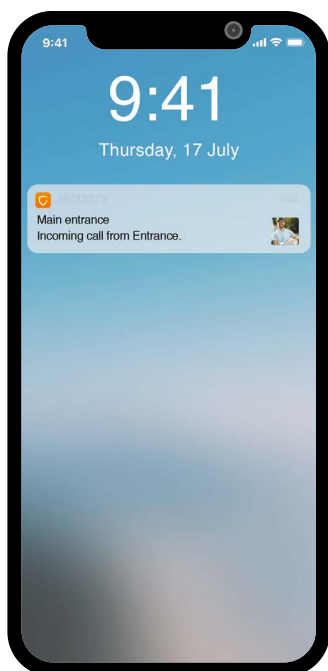

THE BEST APP FOR A SAFE HOME

Alerts and notifications for incoming calls, motion and people detection, event information and door lock management with a simple and intuitive interface.

Home + Security
The best App for a safe home.

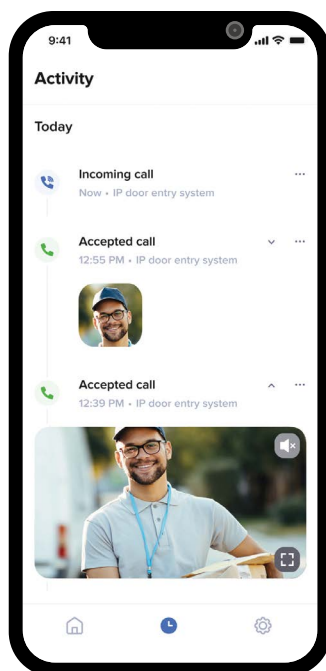

INCOMING CALL

Receive notification when someone is calling

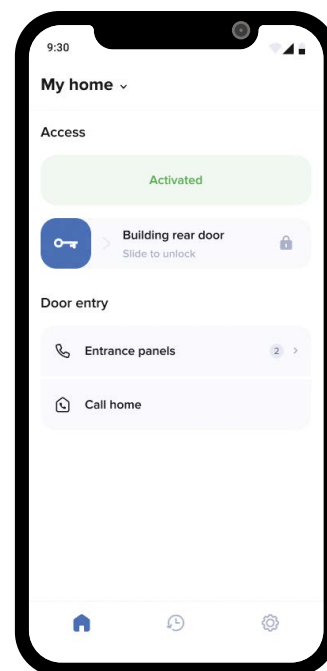

SEE WHO'S CALLING

Answer the call and open the gate for the courier

CHECK THE EVENTS

Check who called you and if they left you a message

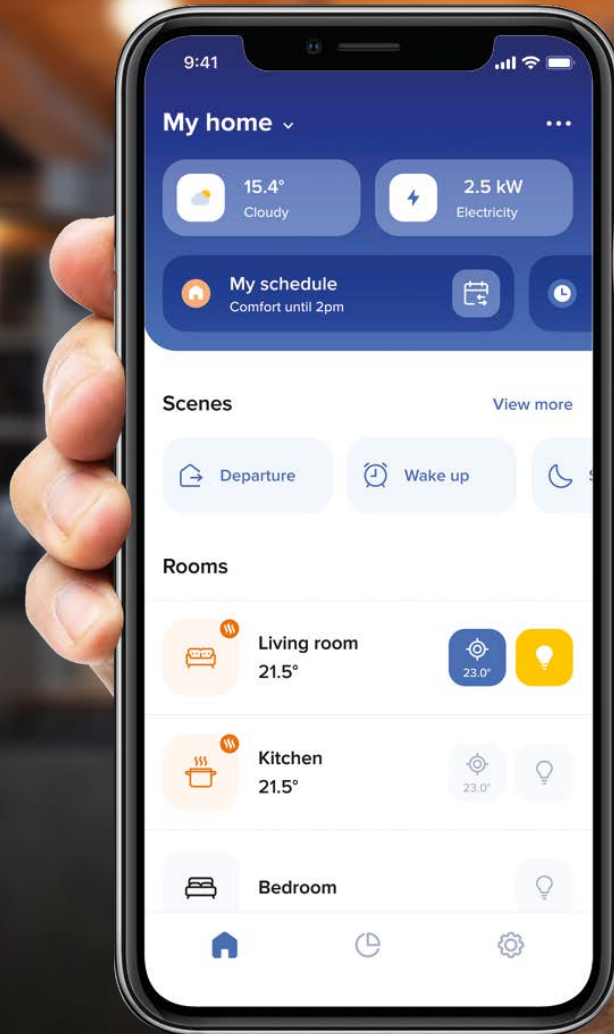

QUICK ACTIONS

- Activate the electrical door locks
- Call home
- Activate the cameras
- Manage the answering machine

Your home under control with the Home + Control App

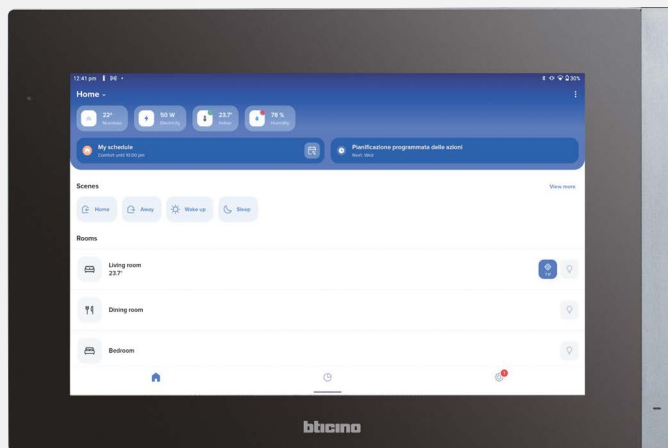

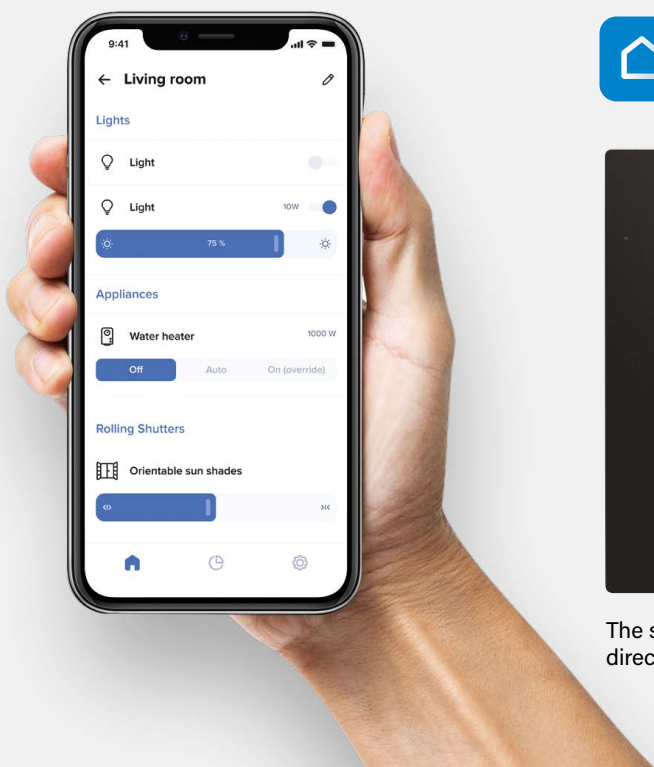

ONE APP: EFFORTLESS COMFORT AND SMART SAVINGS

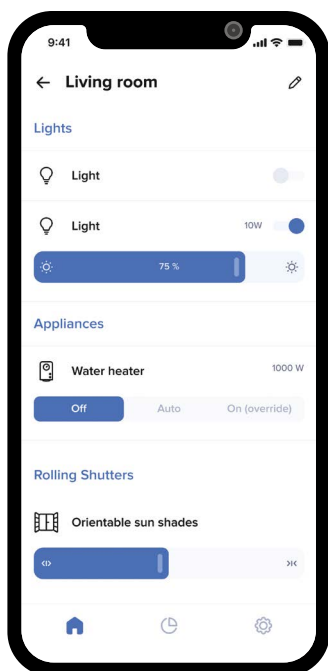

Control lights, shutters, energy usage, temperature and electrical vehicle. Create personalized scenarios for your comfort and efficiency.

Home + Control The best App for the Smart Home.

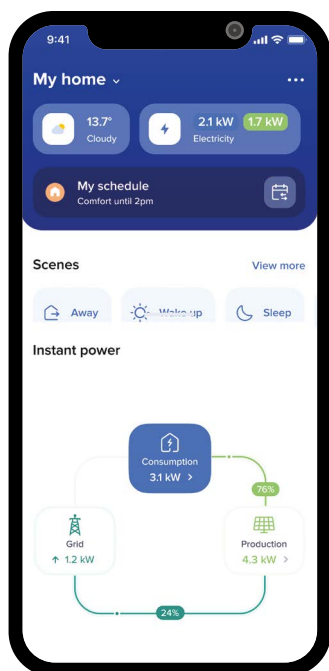

The same user interface as the H + C App is now also available directly on the screen of the 373103 and 373104 video indoor units.

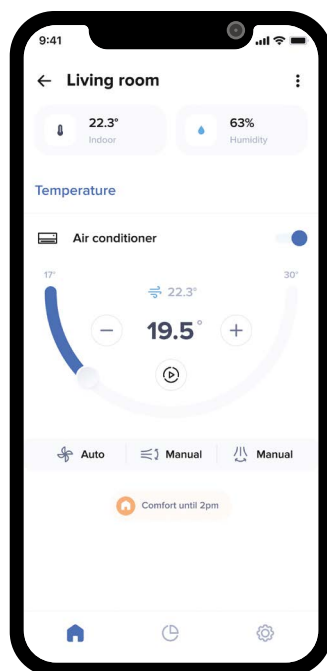

SIMPLIFIED CUSTOMIZATIONS

Manage your home according to your needs through the creation of scenarios, scheduling and automations.

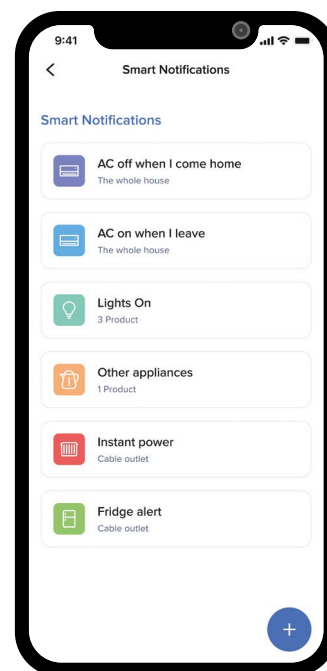

ADVANCED ENERGY MANAGEMENT

Set load priorities, track energy usage, and access reports to view monthly costs, top-consuming appliances, and more.

HOME TEMPERATURE MANAGEMENT

Set and schedule temperatures for heating and cooling. Create weekly programs and manage smart functions.

SMART NOTIFICATIONS

Receive notifications about key events, such as lights left on or power loss.

Integrations

Integrate with ONVIF IP cameras

From the Guard Station it is possible to monitor all the common area IP cameras, while from the indoor units, the resident can monitor private and common area Onvif IP cameras.

Guard station

Indoor unit

Integrate with lift control

Thanks to the access control function, visitors are taken directly to the floor of the called apartment.

NOTE: integration to be performed through Lift Control interface with protocol translator (375010) or with relays (375013).

Item	Guard station
375000	<p>Guard station with 10" touch display and handset. From the touch display, it is possible to: answer and transfer calls, view call logs, release the locks, monitor IP cameras installed in common areas, monitor and process alarms. From the setting menu, it is possible to adjust the guard station settings, like volume and display brightness, and carry out functionality and network tests. Quick and scheduled absence can be activated to transfer the call to another guard station or to apartments if needed. The guard station can be PoE (power over Ethernet) powered, or directly powered using power supply 375005.</p>

Item	Accessories
375001	<p>Server DES (Door Entry System) including configuration and management software must be installed in the building under the VLAN network of the IP door entry system. The configuration software IP DES PRO must be used to create, configure and update the entire installation. The software can be used to create the topology; entrance panels, guard station and indoor units are associated to the corresponding position in an easy and quick way using a scan tool. It also allows the programming of access control tools such as: RFID badges, card, fingerprint and face recognition. The software is also used to: program access control for new residents, view alarm logs, send messages to indoor units, upload advertisements and screensavers and synchronize time/date details on all devices.</p>

375003	<p>Reader for programming card and badges for building access control. Compatible with RFID badges 348200 to ..06 available in different colors. Programming and associating badges to residents requires the use of the configuration software.</p>
--------	---

375004	<p>Reader for programming fingerprints for building access control. Registering and associating the residents' fingerprints requires the use of the configuration software.</p>

Accessories

catalogue

Item	Accessories
375002	PoE (Power over Ethernet) switch with 10 / 100 Mbps, 8 PoE ports and 1 non-POE port uplink and 24 V-100 W power supply. The PoE port is used for network communication and as power supply. DIN mounted installation (Total of 12 DIN modules).
375005	Power supply 100 W with metal box; can be operate as an auxiliary power supply. Protected against short circuits: in case of DC output short circuit, the device will switch to protected mode. Wall mounted installation.
375006	(B) Metal box for video entrance panel with 4.3" display and keypad, flush mounted installation. Compatible with Cat.No: - 374001 video entrance panel with 4.3" display and keypad, with face recognition and fingerprint - 374003 video entrance panel with 4.3" display and keypad
375007	(A) Metal box for video entrance panel with 10" touch display, flush mounted installation. Compatible with Cat.No: - 374000 video entrance panel with 10" touch display with face recognition and fingerprint - 374002 video entrance panel with 10" touch display
375008	(C) Metal box for small video entrance panel flush mounted installation. Compatible with Cat.No: 374004
375009	(D) Metal box for small video entrance panel with 4.3" vertical touch display, flush mounted installation. Compatible with Cat.No: 374005
375010	Lift control interface with protocol translator to integrate lift function in IP door entry system. The configuration is completed using a dedicate software, the interface is connected via RS 485 cable to the entrance panel and the lift.
375011	USB key to be inserted on DES Server 375001 to enable face registration and to provide access mode for face recognition in the installation. At least one of the following devices must be present in the installation: external pushbutton panel with 10" touch display with face recognition and fingerprint (374000), external pushbutton panel with keyboard, facial recognition and fingerprint (374001) or Small pushbutton panel with 4.3 "touch display (374005).
SP111	Plug-in power supply for IP server 375001. Input 100 240 Vac @ 50 60 Hz. Output 19 Vdc. Length of connection cable with IP server = 1200 mm

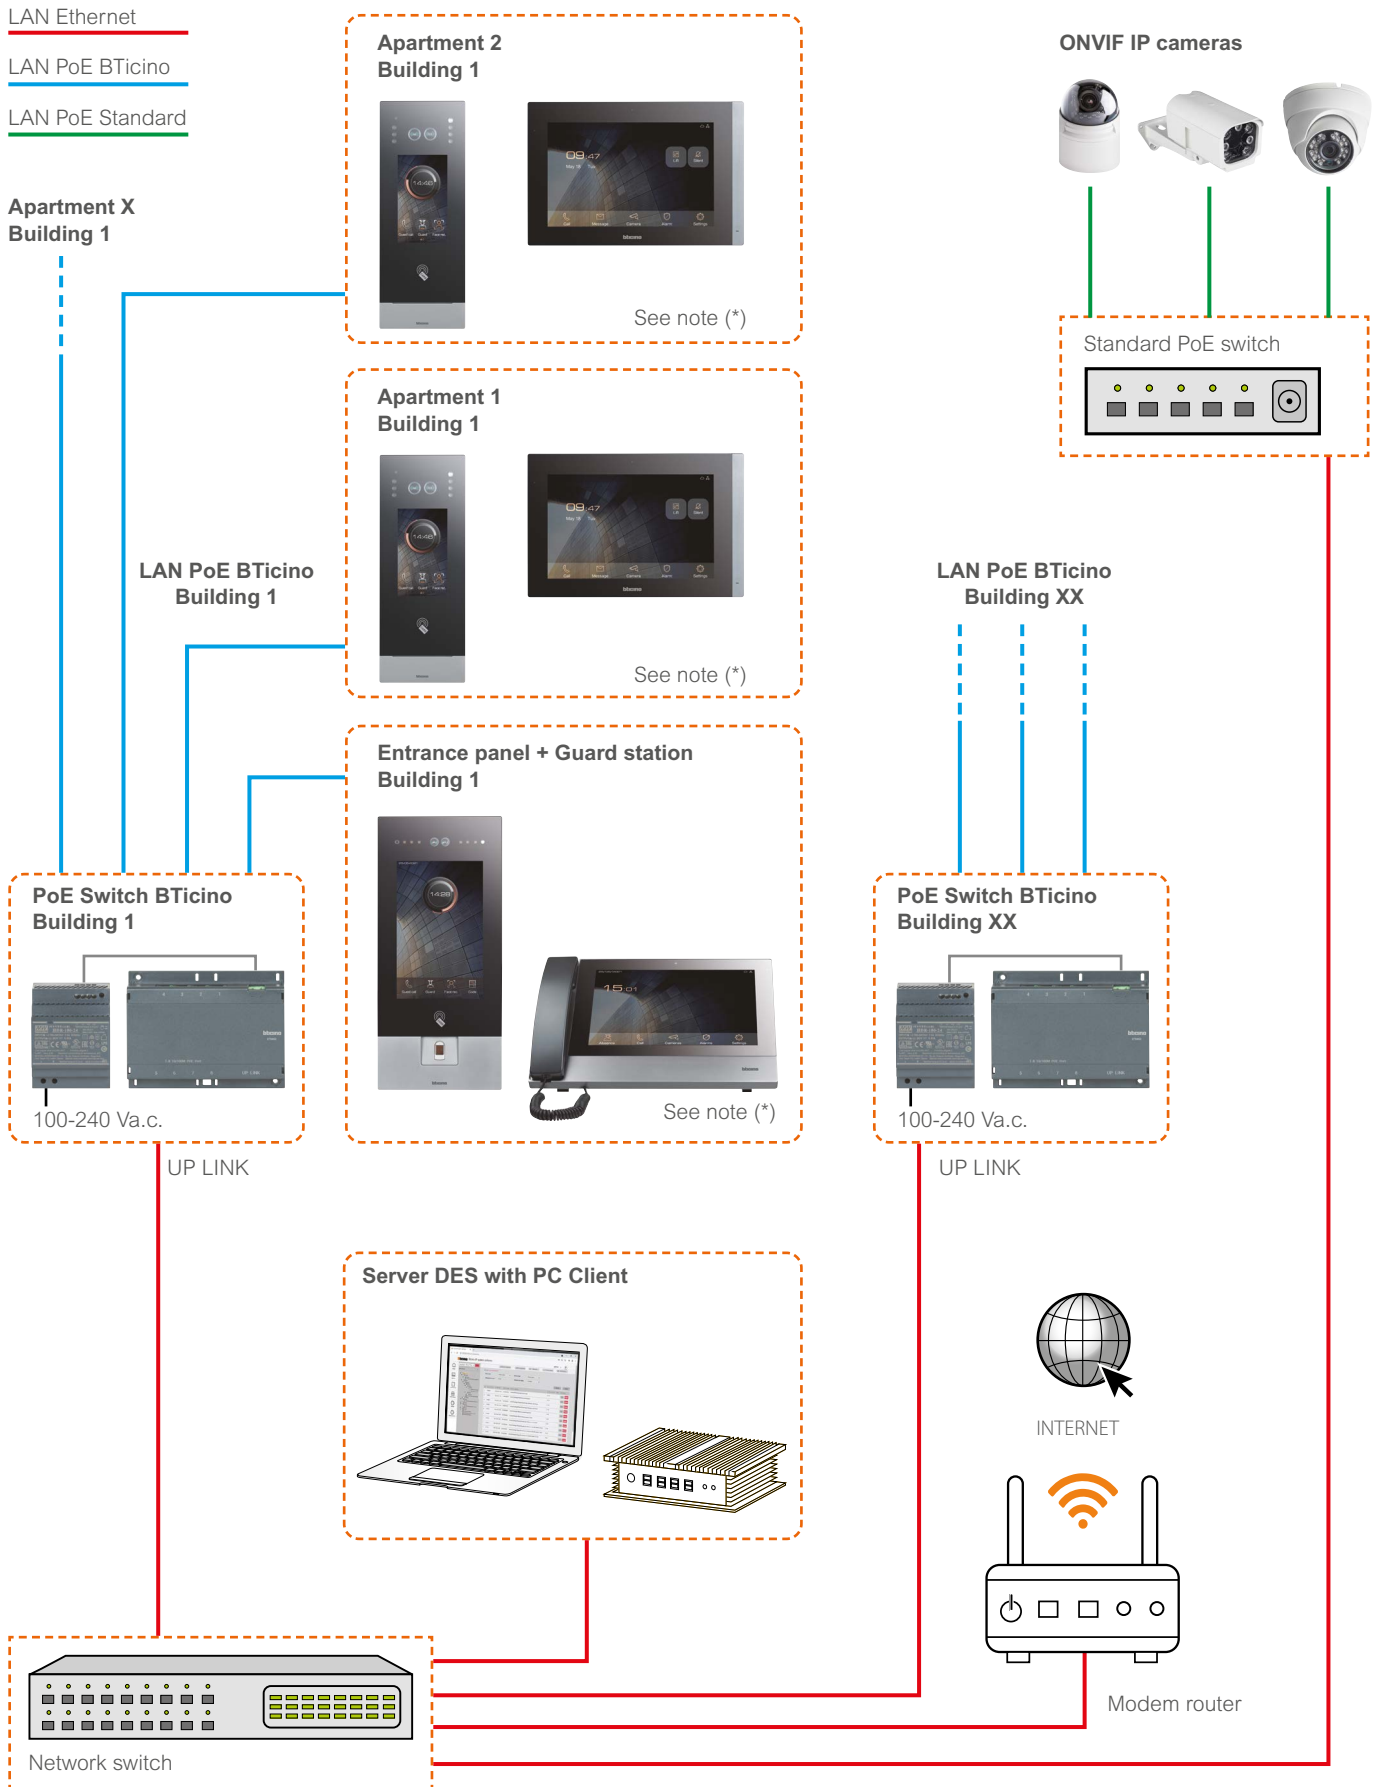

Item	Accessories
375012	PoE converter for BTicino IP DES devices with 24 V PoE to be installed in standard PoE + network.
375013	Lift control interface with 8 relay to integrate the IP DES with the building elevator system in order to enable the lift call after the resident answer the call and open the gate. The configuration is made directly in IP DES configuration tool included in Server DES 375001. NOTE : INSTALLATION AND CONNECTIONS MUST BE ALWAYS PERFORMED ACCORDINGLY TO THE ELEVATOR TYPE.
375014	IP Actuator in 4 DIN Module Actuator with 2 outputs to manage electromagnetic locks, timed locks, to s switch on the lights, opening gates or manage generic actuation. The configuration is done using the IP DES PRO software configuration tool. 4 DIN installation. It can be PoE (power over Ethernet) standard IEEE 802.3af, PoE 24V using item 375002.
375015	Rainshield for Small Entrance Panel 374007 Rainshield accessory for small entrance panel 374007. Surface mounting.
375016	Angular Mounting for Small Entrance Panels Accessory to mount the small entrance panels 374006 and 374007 in angular position. The support has 30° angle and can be installed on both side (on the right / left).
